Directors' Report

PRINCIPAL ACTIVITIES

General

Linde plc is a public limited company formed under the laws of Ireland with its principal offices in the United Kingdom and United States. Linde is the largest industrial gas company worldwide and is a major technological innovator in the industrial gases industry. Its primary products in its industrial gases business are atmospheric gases (oxygen, nitrogen, argon, and rare gases) and process gases (hydrogen, helium, carbon dioxide, carbon monoxide, electronic gases, specialty gases, and acetylene). The company also designs and builds equipment that produces industrial gases and offers customers a wide range of gas production and processing services such as olefin plants, natural gas plants, air separation plants, hydrogen and synthesis gas plants and other types of plants.

Linde serves a diverse group of industries including healthcare, chemicals and energy, manufacturing, metals and mining, food and beverage, and electronics.

Industrial Gases Products and Manufacturing Processes

Atmospheric gases are the highest volume products produced by Linde. Using ambient air as feedstock, Linde produces oxygen, nitrogen and argon through several air separation processes of which cryogenic air separation is the most prevalent. Linde is the market leader in the field of non-cryogenic air separation technologies for the production of industrial gases. As part of this process Linde also produces rare gases, such as krypton, neon, and xenon. As a pioneer and leader in industrial gases, Linde is continuously developing a wide range of proprietary and patented applications and technologies to produce, store, distribute and increase usage of its gases. These technologies open important new markets and provide customers with opportunities to reduce costs, by increasing their operational efficiencies, including vacuum pressure swing adsorption (“VPSA”) and membrane separation technology to produce gaseous oxygen and nitrogen on-site.

Process gases, including hydrogen, helium, carbon dioxide, carbon monoxide, specialty gases and acetylene are produced by other production methods.

Hydrogen is produced from several different feedstocks using a range of technologies. Today, carbon intensity is used to designate and differentiate between the production processes and the respective feedstocks used to produce the molecule. The majority of conventional hydrogen currently produced by Linde is derived from natural gas or methane, using steam methane reformation (SMR) or auto-thermal reforming (ATR) technology. Linde has a range of technologies to produce low-carbon hydrogen from fossil feedstocks, or renewable hydrogen from renewable energy (non-fossil feedstock). Both products are considered sources of clean energy. Low-carbon (blue) hydrogen is produced primarily from methane, by capturing carbon emissions from a hydrogen production plant and sequestering them subsurface for the long term. Renewable (green) hydrogen is produced by electrolysis using renewable energy and water as feedstock. Other sources of low-carbon hydrogen are existing chemical and petrochemical processes, out of which Linde recovers hydrogen for subsequent treatment and cleaning to achieve ultra-high purity levels.

Carbon monoxide can be produced by either SMR or ATR of natural gas or other feedstock such as naphtha, a by-product in the petrochemical industry. Most carbon dioxide comes as an industrial by-product, that is sourced from chemical plants, refineries and other processes or is recovered from natural carbon dioxide sources. Raw carbon dioxide is processed and purified in Linde’s plants to produce commercial and food-grade carbon dioxide. Helium is sourced from certain helium-rich natural gas streams in the United States, with additional supplies being acquired from outside the United States. Acetylene is primarily sourced as a chemical by-product, but may also be produced from calcium carbide and water.

Industrial Gases Distribution

There are three basic distribution methods for industrial gases: (i) on-site or tonnage; (ii) merchant or bulk liquid; and (iii) packaged or cylinder gases. These distribution methods are often integrated, with products from all three supply modes coming from the same plant. The method of supply is generally determined by the lowest cost means of meeting the customer’s needs, depending upon factors such as volume requirements, purity, pattern of usage, and the form in which the product is used (as a gas or as a cryogenic liquid).

On-site. Customers that require the largest volumes of product (typically oxygen, nitrogen and hydrogen) and that have a relatively constant demand pattern are supplied by cryogenic and process gas on-site plants. Linde constructs plants on or adjacent to these customers’ sites and supplies the product directly to customers by pipeline. On-site product supply contracts generally are total requirement contracts with terms typically ranging from 10-20 years and containing minimum purchase requirements and price

escalation provisions. Many of the cryogenic on-site plants also produce liquid products for the merchant market. Therefore, plants are typically not dedicated to a single customer. Air separation technologies also allow on-site delivery to customers with smaller volume requirements.

Merchant. The merchant business is generally associated with distributable liquid oxygen, nitrogen, argon, hydrogen, helium and carbon dioxide. The deliveries generally are made from Linde's plants by tanker trucks to storage containers at the customer's site which are usually owned and maintained by Linde and leased to the customer. Due to distribution cost, merchant oxygen and nitrogen generally have a relatively small distribution radius from the plants at which they are produced. Merchant argon, hydrogen and helium can be shipped much longer distances. The customer agreements used in the merchant business are usually three to seven-year requirement contracts.

Packaged Gases. Customers requiring small volumes are supplied products in metal containers called cylinders, under medium to high pressure. Packaged gases include atmospheric gases, hydrogen, helium, carbon dioxide, acetylene and related products. Linde also produces and distributes in cylinders a wide range of specialty gases and mixtures. Cylinders may be delivered to the customer's site or picked up by the customer at a packaging facility or retail store. Packaged gases are generally sold under one to three-year supply contracts and through purchase orders.

Engineering

Linde's Engineering business has a global presence, with its focus on market segments such as air separation, hydrogen, synthesis, olefin and natural gas plants. The company utilizes its process engineering expertise in the planning, design and construction of efficient plants for the production and processing of gases. Engineering uses sustainable technologies to help customers avoid, capture and utilize carbon dioxide emissions. Its technology portfolio covers the entire value chain for production, liquefaction, storage, distribution and application of hydrogen which supports the transition to clean energy. Its digital services and solutions increase plant efficiency and performance.

Linde's plants are used in a wide variety of fields: in the petrochemical and chemical industries, in refineries and fertilizer plants, to recover air gases, to produce synthesis gases, to treat natural gas and to produce noble gases. The Engineering business either supplies plant components directly to the customer or to the industrial gas business of Linde which operates the plants under long-term gases supply contracts.

BUSINESS REVIEW

CONSOLIDATED RESULTS OF OPERATIONS

The following table provides summary results of operations of Linde plc for 2025 and 2024:

(Millions of dollars, except per share data) **Year Ended December 31,**	**2025**	**2024**	**Variance**	
Sales	$ 33,986	$ 33,005	$ 981	3 %
Cost of sales (includes depreciation)	20,714	20,260	454	2 %
Marketing and selling expenses, Administrative expenses and Research and development costs (includes depreciation and amortization)	4,291	4,295	(4)	— %
Other operating (income) expense - net	58	(185)	243	(131)%
Operating profit	**$ 8,923**	**$ 8,635**	$ 288	3 %
Operating Margin	*26.3 %*	*26.2 %*		
Interest expense - net	255	256	(1)	— %
Net pension and OPEB cost (benefit), excluding service cost	(229)	(190)	39	21 %
Share of profit and loss from associates and joint ventures (at equity)	(150)	(170)	(20)	(12)%
Income tax expense	1,989	2,002	(13)	(1)%
PROFIT FOR THE YEAR	**$ 7,058**	**$ 6,737**	$ 321	5 %
attributable to Linde plc shareholders	$ 6,898	$ 6,565	$ 333	5 %
attributable to noncontrolling interests	$ 160	$ 172	$ (12)	(7)%
DILUTED EARNINGS PER SHARE - LINDE PLC SHAREHOLDERS	$ 14.61	$ 13.62	$ 0.99	7 %

***Results of Operations,* 2025 *Compared With* 2024**

Sales increased $981 million, or 3% for the 2025 year compared to 2024. Sales grew 2% from higher price attainment. Acquisitions increased sales by 1% during the year. Volumes were flat, as new project start-ups were largely offset by base volume declines. Currency translation and cost pass-through, representing the contractual billing of energy cost variances primarily to onsite customers, were flat.

Cost of sales increased 2% to $20,714 million in 2025 compared to $20,260 million in 2024 primarily due to cost inflation partially offset by productivity gains. Cost of sales was 60.9% and 61.4% of revenues, respectively, in 2025 and 2024. The decrease as a percentage of revenues was primarily due to higher pricing and productivity gains.

Marketing and selling expenses, Administrative expenses and Research and development costs ("SG&A/R&D") decreased $4 million in 2025 to $4,291 million. SG&A/R&D was 12.6% of revenues in 2025 versus 13.0% of revenues in 2024.

Other operating (income) expense - net in 2025 was an expense of $58 million compared to a benefit of $185 million in 2024. In 2025 other expense included a charge of $164 million for merger-related purchase accounting impacts. In 2024, other income included a benefit of $41 million related to a settlement with a supplier in the Americas and $45 million in insurance recoveries primarily within the Other segment (see Note 5 to the consolidated financial statements).

Operating profit of $8,923 million in 2025 increased $288 million, or 3%, from operating profit of $8,635 million in 2024. The increase was primarily driven by higher pricing and savings from productivity initiatives which more than offset the adverse impacts of cost inflation, and higher cost reduction program and other charges. A discussion of operating profit by segment is included in the segment discussion that follows.

Interest expense – net was an expense of $255 million in 2025 versus $256 million in 2024. (See Note 6 to the consolidated financial statements).

Net pension and OPEB cost (benefit), excluding service cost were benefits of $229 million and $190 million in 2025 and 2024, respectively. The increase primarily relates to lower interest cost due to lower benefit obligations and higher amortization of deferred gains year-over-year. (See Note 16 to the consolidated financial statements).

Share of profit and loss from associates and joint ventures (at equity) decreased $20 million in 2025 versus 2024 (see Note 12 to the consolidated financial statements).

The reported effective tax rate ("ETR") for 2025 was 22.4% versus 23.4% in 2024. The decrease in the rate was primarily due to a tax rate decrease in Germany including merger-related purchase accounting impacts, partially offset by tax benefits in 2024 from a repatriation that did not recur in 2025. The benefit related to the tax rate decrease in Germany was $158 million. (See Note 7 to the consolidated financial statements).

Profit for 2025 was $7,058 million, $321 million or 5% higher than $6,737 million in 2024. This is primarily driven by higher operating profit in the year versus the respective 2024 period.

Diluted earnings per share - Linde plc shareholders ("EPS") of $14.61 in 2025 increased 7% versus 2024, primarily due to higher profit and lower diluted shares outstanding.

SEGMENT DISCUSSION

Linde's operations consist of two major product lines: industrial gases and engineering. As further described in the following paragraph, Linde's industrial gases operations are managed on a geographic basis, which represents three of the company's reportable segments - Americas, EMEA (Europe/Middle East/Africa), and APAC (Asia/South Pacific); a fourth reportable segment, which represents the company's Engineering business, designs and manufactures equipment for air separation and other industrial gas applications specifically for end customers and is managed on a worldwide basis operating in all geographic segments. Other consists of corporate costs and a few smaller businesses which individually do not meet the quantitative thresholds for separate presentation.

The industrial gases product line centers on the manufacturing and distribution of atmospheric gases (oxygen, nitrogen, argon, rare gases) and process gases (hydrogen, helium, carbon dioxide, carbon monoxide, electronic gases, specialty gases, acetylene). Many of these products are co-products of the same manufacturing process. Linde manufactures and distributes nearly all of its products and manages its customer relationships on a regional basis. Linde's industrial gases are distributed to various end-markets within a regional segment through one of three basic distribution methods: on-site or tonnage; merchant or bulk; and packaged or cylinder gases. The distribution methods are generally integrated in order to best meet the customer's needs and very few of its products can be economically transported outside of a region. Therefore, the distribution economics are specific to the various geographies in which the company operates and are consistent with how management assesses performance.

The company's measure of profit/loss for segment reporting purposes is segment operating profit. Segment operating profit is defined as operating profit excluding purchase accounting impacts of the Linde AG merger, cost reduction program and other charges, and items not indicative of ongoing business trends. This is the manner in which the company's Chief Operating Decision Maker ("CODM") assesses performance and allocates resources.

The table below presents sales and operating profit information about reportable segments and Other for the years ended December 31, 2025 and 2024.

(Millions of dollars) Year Ended December 31,	2025	2024	Variance	
Sales				
Americas	$ 15,208	$ 14,442	$ 766	5 %
EMEA	8,549	8,352	197	2 %
APAC	6,661	6,632	29	— %
Engineering	2,250	2,322	(72)	(3)%
Other	1,318	1,257	61	5 %
Total sales	$ 33,986	$ 33,005	981	3 %
Operating Profit				
Americas	$ 4,747	$ 4,550	$ 197	4 %
EMEA	3,055	2,780	275	10 %
APAC	1,933	1,918	15	1 %
Engineering	408	410	(2)	(1)%
Other	(6)	62	(68)	(110)%
Segment operating profit	10,137	9,720	417	4 %
Reconciliation to Consolidated Operating Profit				
Cost reduction program and other charges [1]	(273)	(145)		
Purchase accounting impacts - Linde AG [2]	(941)	(940)		
Total Operating Profit	$ 8,923	$ 8,635		

(1) Related to Note 5 to the consolidated financial statements.
(2) Impacts of the required purchase accounting related to the merger transaction, primarily the increased depreciation and amortization of assets recorded at fair value.

Americas

The Americas segment includes Linde's industrial gases operations in approximately 20 countries including the United States, Canada, Mexico and Brazil.

Sales

Sales for the Americas segment increased $766 million, or 5%, in 2025 versus 2024. Higher pricing contributed 3% to sales.Volumes increased sales by 1% primarily driven by electronics, metals and mining, and chemicals and energy end markets including project start-ups. Cost pass-through increased sales by 1% with minimal impact on operating profit. The impact of net acquisitions increased sales by 1%. Currency translation decreased sales by 1% driven primarily by the weakening of the Brazilian real and Mexican peso against the U.S. dollar.

Operating Profit

Operating profit in the Americas segment increased $197 million, or 4%, in 2025 versus 2024 driven primarily by higher pricing and continued productivity initiatives, which more than offset cost inflation. 2024 included a settlement gain with a supplier.

EMEA

The EMEA segment includes Linde's industrial gases operations in approximately 50 European, Middle Eastern, and African countries including Germany, the U.K, France, Sweden, and the Republic of South Africa.

Sales

EMEA segment sales increased $197 million, or 2%, in 2025 versus 2024. Currency translation increased sales by 3% driven primarily by the strengthening of the Euro and British pound against the U.S. dollar. Higher price attainment increased sales by 2%. Cost pass-through was flat. Volumes decreased sales by 3% primarily driven by the metals and mining, manufacturing, and chemicals and energy end markets.

Operating Profit

Operating profit for the EMEA segment increased $275 million, or 10%, in 2025 versus 2024. The increase was driven primarily by higher pricing, currency translation, and continued productivity initiatives, partially offset by lower volumes.

APAC

The APAC segment includes Linde's industrial gases operations in approximately 15 Asian and South Pacific countries and regions including China, Australia, India and South Korea.

Sales

Sales for the APAC segment were flat in 2025 versus 2024. Acquisitions increased sales by 2%. Volumes decreased sales by 1%. Currency translation decreased sales by 1% primarily due to the weakening of the Australian dollar and Korean won against the U.S. dollar. Cost pass-through and pricing were flat.

Operating Profit

Operating profit in the APAC segment increased $15 million, or 1%, in 2025 versus 2024. The increase was primarily driven by productivity initiatives and acquisitions, partially offset by cost inflation, lower volumes, and currency translation.

Engineering

Sales

Engineering segment sales decreased $72 million, or 3%, in 2025 versus 2024 driven by project timing. Currency translation increased sales by 3%, primarily due to the strengthening of the Euro against the U.S. dollar.

Operating Profit

Engineering segment operating profit decreased $2 million, or 1%, in 2025 versus 2024, as declines driven by project timing were largely offset by currency translation impacts.

Other

Other consists of corporate costs and a few smaller businesses including: Linde Advanced Materials Technology ("LAMT") and global helium wholesale; which individually do not meet the quantitative thresholds for separate presentation.

Sales

Sales for Other increased $61 million, or 5%, in 2025 versus 2024. Underlying sales increased 4% in 2025 versus 2024 primarily due to higher volumes in LAMT partially offset by helium. The impact of currency translation increased sales by 1% in 2025 versus 2024.

Operating Profit

Operating profit in Other decreased $68 million, or 110%, in 2025 versus 2024. The decrease was driven by helium and an insurance recovery in 2024, partially offset by LAMT volumes and continued productivity initiatives.

CONSOLIDATED FINANCIAL POSITION

The following table provides a summary of consolidated financial position of Linde plc as of December 31, 2025 and 2024:

(Millions of dollars) ***Year Ended December 31,***	**2025**	**2024**	**Variance**	
Goodwill	$ 27,927	$ 25,937	$ 1,990	8 %
Other intangible assets	11,871	11,330	541	5 %
Property, plant and equipment	28,260	24,775	3,485	14 %
Other assets	13,703	13,255	448	3 %
Cash and cash equivalents	5,056	4,850	206	4 %
Total Assets	**$ 86,817**	**$ 80,147**	6,670	8 %
Equity	$ 39,728	$ 39,475	253	1 %
Pensions obligations and other provisions	3,768	3,564	204	6 %
Financial debt	26,989	21,623	5,366	25 %
Other liabilities	16,332	15,485	847	5 %
Total Liabilities and Equity	**$ 86,817**	**$ 80,147**	6,670	8 %

Goodwill increased $1,990 million, from $25,937 million as of December 31, 2024 to $27,927 million as of December 31, 2025. The increase primarily related to currency translation during the year ended December 31, 2025 (see Note 3 and Note 9 to the consolidated financial statements).

Other intangible assets increased $541 million, from $11,330 million as of December 31, 2024 to $11,871 million as of December 31, 2025. The increase primarily related to currency translation impacts, partially offset by the amortization of assets (see Note 3 and Note 10 to the consolidated financial statements).

Property, plant and equipment increased $3,485 million, from $24,775 million as of December 31, 2024 to $28,260 million as of December 31, 2025. The increase primarily related to capital expenditures and currency translation impacts, partially offset by the depreciation of property, plant and equipment during the year ended December 31, 2025 (see Note 3 and Note 11 to the consolidated financial statements).

Other assets increased $448 million, from $13,255 million as of December 31, 2024 to $13,703 million as of December 31, 2025. The increase was primarily driven by a higher funded status surplus in the retirement plans resulting from currency translation impacts and favorable plan asset performance, which increased pension assets (see Note 16 to the consolidated financial statements).

Cash and cash equivalents increased $206 million, from $4,850 million as of December 31, 2024 to $5,056 million as of December 31, 2025. Cash provided from operating activities of $10,350 million was largely offset by cash outflows for investing and financing activities of $5,721 million and $4,554 million, respectively. See the "Liquidity and Capital Resources" discussion below for further detail. The cash is available for corporate uses, including among others, capital expenditures, dividends and share repurchases.

Equity increased $253 million, from $39,475 million as of December 31, 2024 to $39,728 million as of December 31, 2025. The increase was primarily driven by profit for the year of $7,058 million and favorable currency translation of $614 million (see the consolidated statement of changes in equity and Note 15 to the consolidated financial statements). These increases were partially offset by net share repurchases of $4,578 million and $2,811 million of dividend payments to Linde plc shareholders.

Pensions obligations and other provisions increased $204 million, from $3,564 million as of December 31, 2024 to $3,768 million as of December 31, 2025. The increase was primarily driven by cost reduction programs, partially offset by lower pension liabilities resulting from annual remeasurement (see Note 16 and Note 28 to the consolidated financial statements).

Financial debt (the sum of current debt and non-current debt) increased $5,366 million, from $21,623 million as of December 31, 2024 to $26,989 million as of December 31, 2025, driven by higher debt issuances and currency, partially offset by repayments (see the "Liquidity and Capital Resources" discussion below and Note 18 to the consolidated financial statements).

Other liabilities increased $847 million, from $15,485 million as of December 31, 2024 to $16,332 million as of December 31, 2025. The increase was driven primarily by currency, partially offset by the timing of tax payments (see Note 4 to the consolidated financial statements).

LIQUIDITY AND CAPITAL RESOURCES

Following is a summary of the consolidated statement of cash flows:

(Millions of dollars)

Year Ended December 31,	2025	2024	Variance
Cash flow from operating activities	$ 10,350	$ 9,423	$ 927
Cash flow for investing activities	(5,721)	(4,644)	(1,077)
Cash flow for financing activities	(4,554)	(4,359)	(195)
Other cash activity	131	(234)	365
Change in cash and cash equivalents	206	186	20
Cash and cash equivalents, beginning-of-period	4,850	4,664	186
Cash and cash equivalents, end-of-period	$ 5,056	$ 4,850	$ 206

Cash flow from operating activities

Cash flows from operations were $10,350 million, an increase of $927 million from 2024. The increase was driven primarily by higher net income adjusted for non-cash charges and lower net working capital requirements, including higher inflows for contract liabilities from engineering customer advance payments when compared with 2024.

Cash flow for investing activities

Net cash used for investing activities was $5,721 million in 2025 compared to $4,644 million in 2024. The increase was primarily attributable to higher capital expenditures.

Capital expenditures in 2025 were $5,261 million, an increase of $764 million from 2024. Capital expenditures during 2025 related primarily to investments in new plant and production equipment for backlog growth requirements. Approximately 60% of the capital expenditures were in the Americas segment with 21% in the APAC segment and the rest largely in the EMEA segment.

At December 31, 2025, Linde's sale of gas backlog of large projects under construction was approximately $7.3 billion. This represents the total estimated capital cost of large plants under construction.

Acquisitions, net of cash acquired for 2025 were $412 million, an increase of $95 million from 2024. In 2025, acquisitions were primarily related to the EMEA and APAC segments. Acquisitions in the prior year were $317 million, primarily related to packaged gas businesses in the Americas (see Note 3 to the consolidated financial statements).

Divestitures, net of cash divested and asset sales in 2025 were $42 million compared with $170 million in 2024. Divestiture proceeds in 2024 included $69 million in net proceeds for a divestiture in APAC and a settlement with a supplier in the Americas (see Note 3 to the consolidated financial statements).

Other investing, net for 2025 was an outflow of $90 million and relates to the cash settlement of foreign exchange contracts designated in a net investment hedging relationship. There were no cash settlements in 2024.

Cash flow for financing activities

Linde’s financing strategy is to secure long-term committed funding by issuing public notes and debentures and commercial paper backed by a long-term bank credit agreement. Linde’s international operations are funded through a combination of local borrowing and intercompany funding to minimize the total cost of funds and to manage and centralize currency exchange exposures. As deemed necessary, Linde manages its exposure to interest-rate changes through the use of financial derivatives (see Note 22 to the consolidated financial statements and "Financial Instruments" section of Directors' Report).

Cash used for financing activities was $4,554 million in 2025 as compared to $4,359 million in 2024. Cash provided by debt was $2,911 million in 2025 versus $3,167 million in 2024, driven primarily by lower net debt issuances in 2025, partially offset by higher commercial paper issuances. For the twelve months ended December 31, 2025, Linde issued €4,000 million Euro-denominated notes and CHF500 million Swiss-franc denominated notes, and redeemed or repaid $1,000 million U.S. dollar-denominated notes and €1,000 million Euro denominated notes (see Note 18).

Net purchases of ordinary shares were $4,578 million in 2025 versus $4,451 million in 2024. For additional information related to share repurchase programs, see "Own Shares" section of the Directors' Report.

Cash dividends increased to $2,811 million in 2025 versus $2,655 million in 2024 driven primarily by an 8% increase in dividends per share to $6.00 per share from $5.56 per share, partially offset by lower shares outstanding. Cash used for Noncontrolling interest

transactions and other was $76 million for the year ended December 31, 2025 versus cash used of $420 million for the respective 2024 period, driven primarily by cash inflows from financing related derivatives and the collection of notes receivable from the sale of the Company's GIST business (see Note 14).

Linde's total net debt outstanding at December 31, 2025 was $21,933 million, $5,160 million higher than $16,773 million at December 31, 2024, and included higher foreign currency translation impacts of approximately $2,400 million. The December 31, 2025 net debt balance includes $26,388 million in public securities, and $601 million representing primarily worldwide bank borrowings, net of $5,056 million of cash. Linde's global effective borrowing rate was approximately 2.3% for 2025.

The company believes that it has sufficient operating flexibility, cash reserves, and funding sources to maintain adequate amounts of liquidity to meet its business needs around the world. At December 31, 2025, Linde's credit ratings as reported by Standard & Poor's and Moody's were A-1 and P-1 for short-term debt, respectively, and A and A2 for long-term debt, respectively. The company maintains a $5 billion and a $1.5 billion unsecured and undrawn revolving credit agreement with no associated financial covenants. No borrowings were outstanding under the credit agreements as of December 31, 2025. The company does not anticipate any limitations on its ability to access the debt capital markets and/or other external funding sources and remains committed to its strong ratings from Moody's and Standard & Poor's.

Note 18 to the consolidated financial statements includes information with respect to the company's debt activity, current debt position, debt covenants and the available credit facilities; and Note 22 includes information relating to derivative financial instruments. Linde's credit facilities are with major financial institutions and are non-cancelable until maturity. Therefore, the company believes the risk of the financial institutions being unable to make required loans under the credit facilities, if requested, to be low. Linde's major bank credit and long-term debt agreements contain standard covenants. The company was in compliance with these covenants at December 31, 2025 and expects to remain in compliance for the foreseeable future.

FINANCIAL INSTRUMENTS

In its normal operations, Linde is exposed to market risks relating to fluctuations in interest rates, foreign currency exchange rates, energy and commodity costs. The objective of financial risk management at Linde is to minimize the negative impact of such fluctuations on the company's earnings and cash flows. To manage these risks, among other strategies, Linde routinely enters into various derivative financial instruments ("derivatives") including interest-rate swap and treasury rate lock agreements, forward contracts, and commodity-swap agreements. These instruments are not entered into for trading purposes and Linde only uses commonly traded and non-leveraged instruments.

There are three types of derivatives that the company enters into: (i) those relating to fair-value exposures, (ii) those relating to cash-flow exposures, and (iii) those relating to foreign currency net investment exposures. Fair-value exposures relate to changes in the fair value of recognized assets or liabilities, primarily financial assets and financial liabilities, and firm commitments. Cash-flow exposures relate to the variability of future cash flows associated with recognized assets or liabilities, or forecasted transactions for which no underlying exposure is yet reported in the consolidated statement of financial position. Net investment exposures relate to the impact of foreign currency exchange rate changes on the carrying value of net assets denominated in foreign currencies.

Interest Rate Risk

At December 31, 2025, Linde had debt totaling $26,989 million ($21,623 million at December 31, 2024). For fixed-rate instruments, interest rate changes affect the fair market value but do not impact earnings or cash flows. Conversely, for floating-rate instruments, interest rate changes generally do not affect the fair market value of the instrument but impact future earnings and cash flows, assuming that other factors are held constant. At December 31, 2025, including the impact of derivatives, Linde had fixed-rate debt of $21,879 million and floating-rate debt of $5,110 million, representing 81% and 19%, respectively, of total debt. At December 31, 2024, including the impact of derivatives, Linde had fixed-rate debt of $17,584 million and floating-rate debt of $4,039 million, representing 81% and 19%, respectively, of total debt.

Foreign Currency Risk

Linde's exchange-rate exposures result primarily from its investments and ongoing operations in Latin America (primarily Brazil and Mexico), Europe (primarily Germany, Scandinavia, and the U.K.), Canada, Asia Pacific (primarily Australia and China) and other business transactions such as the procurement of equipment from foreign sources. Linde frequently utilizes currency contracts to hedge these exposures. See Note 22 to the consolidated financial statements for additional information.

Further details of the financial risk management objectives and policies and the exposure of the company to price risk, credit risk, liquidity risk and cash flow risk are provided in Note 22 to the consolidated financial statements.

RESEARCH AND DEVELOPMENT

Linde's research and development are directed toward development of gas processing, separation and liquefaction technologies, and clean energy technologies; improving distribution of industrial gases and the development of new markets and applications for these gases. This results in the development of new advanced air separation, hydrogen, synthesis gas, natural gas, adsorption and chemical process technologies; novel clean energy and carbon management solutions; as well as the frequent introduction of new industrial gas applications. Research and development is primarily conducted in Pullach, Germany, Tonawanda, New York, Burr Ridge, Illinois and Shanghai, China. See the Consolidated Statement of Profit and Loss for additional information.

PRINCIPAL RISKS AND UNCERTAINTIES

Due to the size and geographic reach of the company's operations, a wide range of factors, many of which are outside of the company's control, could materially affect the company's future operations and financial performance. Management believes the following risks may significantly impact the company:

Weakening economic conditions in markets in which Linde does business may adversely impact its financial results and/or cash flows.

Linde serves a diverse group of industries across more than 80 countries, which generally leads to financial stability through various business cycles. However, a broad decline in general economic or business conditions in the industries served by its customers could adversely affect the demand for Linde's products and impair the ability of its customers to satisfy their obligations to Linde, resulting in uncollected receivables and/or unanticipated contract terminations or project delays. For example, global political and economic uncertainty could reduce investment activities of Linde's customers, which could adversely affect Linde's business.

In addition, many of Linde's customers are in businesses that are cyclical in nature, such as the chemicals, and energy, and metals and mining end markets. Downturns in these industries may adversely impact Linde during these cycles. Additionally, such conditions could impact the utilization of Linde's manufacturing capacity which may require it to recognize impairment losses on tangible assets such as property, plant and equipment, as well as intangible assets such as goodwill, customer relationships or intellectual property.

Increases in the cost of energy and raw materials and/or disruption in the supply of these materials could result in lost sales or reduced profitability.

Energy is the single largest cost item in the production and distribution of industrial gases. Most of Linde's energy requirements are in the form of electricity, natural gas and diesel fuel for distribution. Linde attempts to minimize the financial impact of variability in these costs through the management of customer contracts and reducing demand through operational productivity and energy efficiency. Large customer contracts typically have escalation and pass-through clauses to recover energy and feedstock costs. Such attempts may not successfully mitigate cost variability, which could negatively impact Linde's financial condition or results of operations. The supply of energy has not been a significant issue in the geographic areas where Linde conducts business. However, regional energy conditions are unpredictable and may pose future risk.

For hydrogen, helium, carbon dioxide, carbon monoxide, and specialty gases, raw materials are largely purchased from outside sources. Where feasible, Linde sources several of these raw materials, including hydrogen, carbon dioxide, and calcium carbide, as chemical or industrial byproducts. In addition, Linde has contracts or commitments for, or readily available sources of, most of these raw materials; however, their long-term availability and prices are subject to market conditions. A disruption in supply of such raw materials could impact Linde's ability to meet contractual supply commitments.

Linde's international operations are subject to the risks of doing business abroad and international events and circumstances may adversely impact its business, financial condition or results of operations.

Linde has substantial international operations which are subject to risks including devaluations in currency exchange rates, transportation delays and interruptions, political and economic instability and disruptions, restrictions on the transfer of funds, trade conflicts and the imposition of duties and tariffs, import and export controls, changes in governmental policies, labor unrest, possible nationalization and/or expropriation of assets, changes in U.S. and non-U.S. tax policies and compliance with governmental regulations. These events could have an adverse effect on the international operations of Linde in the future by reducing the demand for its products, decreasing the prices at which it can sell its products, reducing the revenue from international operations or otherwise having an adverse effect on its business.

Currency exchange rate fluctuations and other related risks may adversely affect Linde's results.

Because a significant portion of Linde's revenue is denominated in currencies other than its reporting currency, the U.S. dollar, changes in exchange rates will produce fluctuations in revenue, costs and earnings and may also affect the book value of assets and liabilities and related equity. Although the company from time to time utilizes foreign exchange forward contracts to hedge these exposures, its efforts to minimize currency exposure through such hedging transactions may not be successful depending on market and business conditions. As a result, fluctuations in foreign currency exchange rates could adversely affect Linde's financial condition, results of operations or cash flows.

Macroeconomic factors may impact Linde's ability to obtain financing or increase the cost of obtaining financing which may adversely impact Linde's financial results and/or cash flows.

Volatility and disruption in the U.S., European and global credit and equity markets, from time to time, could make it more difficult for Linde to obtain financing for its operations and/or could increase the cost of obtaining financing. In addition, Linde's borrowing costs can be affected by short- and long-term debt ratings assigned by independent rating agencies which are based, in significant part, on its performance as measured by certain criteria such as interest coverage and leverage ratios. A decrease in these debt ratings could increase the cost of borrowing or make it more difficult to obtain financing.

An impairment of goodwill or intangible assets could negatively impact the company's financial results.

As of December 31, 2025, the net carrying value of goodwill and other indefinite-lived intangible assets was approximately $28 billion and $2 billion, respectively, primarily as a result of the business combination and the related acquisition method of accounting applied to the 2018 merger between Linde plc's predecessor companies. In accordance with generally accepted accounting principles, the company periodically assesses these assets to determine if they are impaired. Significant negative industry or economic trends, disruptions to business, unexpected significant changes or planned changes in use of the assets, divestitures and sustained market capitalization declines may result in recognition of impairments to goodwill or other indefinite-lived assets. Any charges relating to such impairments could have a material adverse impact on Linde's results of operations in the periods recognized.

Catastrophic events could disrupt the operations of Linde and/or its customers and suppliers and may have a significant adverse impact on the results of operations.

Linde's operations are exposed to physical risks associated with the occurrence of natural disasters linked to climate change, such as extreme weather, events including hurricanes and floods, as well as catastrophic events such as health epidemics; pandemics and acts of war or terrorism. These events could disrupt or delay Linde's ability to produce and distribute its products to customers, result in asset impairments, and could potentially expose Linde to third-party liability claims. In addition, such events could impact Linde's customers and suppliers resulting in temporary or long-term outages and/or the limitation of supply of energy and other raw materials used in normal business operations. Linde evaluates the direct and indirect business risks, consults with vendors, insurance providers and industry experts, makes investments in suitably resilient design and technology, and conducts regular reviews of the business risks with management. Despite these steps, however, such events are outside Linde's control and may have a significant adverse impact on its financial results.

The inability to attract and retain qualified personnel may adversely impact Linde's business.

If Linde fails to attract, hire and retain qualified personnel, it may not be able to develop, market or sell its products or successfully manage its business. Linde is dependent upon a highly skilled, experienced and efficient workforce to be successful. Much of Linde's competitive advantage is based on the expertise and experience of key personnel regarding marketing, technology, manufacturing and distribution infrastructure, systems and products. The inability to attract and hire qualified individuals or the loss of key employees in very skilled areas could have a negative effect on Linde's financial results.

If Linde fails to keep pace with technological advances in the industry or if new technology initiatives do not become commercially accepted, customers may not continue to buy Linde's products and results of operations could be adversely affected.

Linde's research and development is directed toward developing new and improved methods for the production and distribution of industrial gases, the design and construction of plants and toward developing new markets and applications for the use of industrial and process gases. This results in the introduction of new applications and the development of new advanced process technologies. As a result of these efforts, Linde develops new and proprietary technologies and employs necessary measures to protect such technologies within the global geographies in which Linde operates. These technologies help Linde to create a competitive advantage and to provide a platform to grow its business. If Linde's research and development activities do not keep pace with competitors or if Linde does not create new technologies that benefit customers, future results of operations could be adversely affected.

Risks related to pension benefit plans may adversely impact Linde's results of operations and cash flows.

Pension benefits represent significant financial obligations that will be ultimately settled in the future with employees who meet eligibility requirements. Because of the uncertainties involved in estimating the timing and amount of future payments and asset returns, significant estimates are required to calculate pension expense and liabilities related to Linde's plans. Linde utilizes the services of independent actuaries, whose models are used to facilitate these calculations. Several key assumptions are used in the actuarial models to calculate pension expense and liability amounts recorded in the consolidated financial statements. In particular, significant changes in actual investment returns on pension assets, discount rates, or legislative or regulatory changes could impact future results of operations and required pension contributions.

Operational risks may adversely impact Linde's business or results of operations.

Linde's operating results are dependent on the continued operation of its production facilities and its ability to meet customer contract requirements and other needs. Insufficient or excess capacity threatens Linde's ability to generate competitive profit margins and may expose Linde to liabilities related to contract commitments. Operating results are also dependent on Linde's ability to complete new construction projects on time, on budget and in accordance with performance requirements. Failure to do so may expose Linde's business to loss of revenue, potential litigation and loss of business reputation.

Also inherent in the management of Linde's production facilities and delivery systems, including storage, vehicle transportation and pipelines, are operational risks that require continuous training, oversight and control. Material operating failures at production, storage facilities or pipelines, including fire, toxic release and explosions, or the occurrence of vehicle transportation accidents could result in loss of life, damage to the environment, loss of production and/or extensive property damage, all of which may negatively impact Linde's financial results.

Linde may be subject to information technology system failures, network disruptions and cybersecurity breaches or other related incidents.

Linde relies on information technology systems and networks, including systems that utilize advanced technologies for business and operational activities, and also stores and processes sensitive business and proprietary information in these systems and networks. These systems are susceptible to outages due to fire, flood, power loss, telecommunications failures, viruses, break-ins and similar events, or breaches of security.

Linde has taken steps to address these risks and concerns by implementing advanced security technologies, internal controls, network and data center resiliency and recovery processes. Despite these steps, however, our information technology systems have in the past been and in the future will likely be subject to increasingly sophisticated cyber attacks and disruptions. Operational failures and breaches of security from such attempts could lead to the loss or disclosure of confidential information or personal data belonging to Linde or our employees and customers or suppliers. These failures and breaches could result in business interruption or malfunction and lead to legal or regulatory actions that could result in a material adverse impact on Linde's operations, reputation and financial results. To date, such attempts have not had any significant impact on Linde's operations or financial results.

The inability to effectively integrate acquisitions or collaborate with joint venture partners could adversely impact Linde's financial position and results of operations.

Linde has evaluated and expects to continue to evaluate, a wide array of potential strategic acquisitions and joint ventures. Many of these transactions, if consummated, could be material to its financial condition and results of operations. In addition, the process of integrating an acquired company, business or group of assets may create unforeseen operating difficulties and expenditures. Although historically Linde has been successful with its acquisition strategy and execution, the areas where Linde may face risks include:

- the need to implement or remediate controls, procedures and policies appropriate for a larger public company at companies that prior to the acquisition lacked these controls, procedures and policies;
- diversion of management time and focus from operating existing business to acquisition integration challenges;
- cultural challenges associated with integrating employees from the acquired company into the existing organization;
- the need to integrate each company's accounting, management information, human resources and other administrative systems to permit effective management;
- difficulty with the assimilation of acquired operations and products;
- failure to achieve targeted synergies and cost reductions; and
- inability to retain key employees and business relationships of acquired companies.

Foreign acquisitions and joint ventures involve unique risks in addition to those mentioned herein, including those related to integration of operations across different cultures and languages, currency risks and the particular economic, political and regulatory risks associated with specific countries.

Also, the anticipated benefit of potential future acquisitions may not materialize. Future acquisitions or dispositions could result in the incurrence of debt, contingent liabilities or amortization expenses, or impairments of goodwill or other intangible assets, any of which could adversely impact Linde's financial results.

Linde is subject to a variety of international laws and government regulations and changes in, or failure to comply with, these laws or regulations could have an adverse impact on the company's business, financial position and results of operations.

Linde is subject to regulations in the following areas, among others:

- securities laws applicable in the United States, the European Union, and other jurisdictions;
- U.S. and non-U.S. tax laws and currency controls;
- trade and import/export restrictions, as well as economic sanctions laws;
- antitrust matters;
- safety;
- environmental protection, including climate change and energy efficiency laws and policies, and environmental related reporting and disclosures;
- data protection including artificial intelligence;
- global anti-bribery laws, including the U.S. Foreign Corrupt Practices Act; and
- healthcare regulations.

Changes in these or other regulatory areas may impact Linde's profitability and may give rise to new or increased compliance risks: it may become more complex and costly to ensure compliance, and the level of sanctions in the event of non-compliance may rise. Noncompliance with such laws and regulations could result in penalties or sanctions, cancellation of marketing rights or restrictions on participation in, or even exclusion from, public tender proceedings, all of which could have a material adverse impact on Linde's financial results and/or reputation.

Such changes may also restrict Linde's ability to compete effectively in the marketplace. Changes to regulations in the areas of environmental protection and climate change, for example, may impact customer and competitor behavior driving structural changes in key end markets. While Linde will work to mitigate these risks through the pursuit of strategic alliances and investment in applications technologies to capture new growth areas, given the uncertainty about the type and scope of new regulations, it is difficult to predict how such changes and their impact on market behavior will ultimately impact Linde's business. However, such changes could have a material adverse impact on Linde's results of operations.

Doing business globally requires Linde to comply with anti-corruption, trade, compliance and economic sanctions and similar laws, and to implement policies and procedures designed to ensure that its employees and other intermediaries comply with the applicable restrictions. These restrictions include prohibitions on the sale or supply of certain products, services and any other economic resources to embargoed or sanctioned countries, governments, persons and entities. Compliance with these restrictions requires, among other things, screening of business partners. Despite its commitment to legal compliance and corporate ethics, the company cannot ensure that its policies and procedures will always protect it from intentional, reckless or negligent acts committed by employees or agents under the applicable laws. If Linde fails to comply with laws governing the conduct of international operations, Linde may be subject to criminal and civil penalties and other remedial measures, which could materially adversely affect its reputation, business and results of operations.

The outcome of litigation or governmental investigations may adversely impact the company's business or results of operations.

Linde's subsidiaries are party to various lawsuits and governmental investigations arising in the ordinary course of business. Adverse outcomes in some or all of the claims pending may result in significant monetary damages or injunctive relief that could adversely affect Linde's ability to conduct business. Linde and its subsidiaries may in the future become subject to further claims and litigation, which is impossible to predict. The litigation and other claims Linde faces are subject to inherent uncertainties. Legal or regulatory judgments or agreed settlements might give rise to expenses which are not covered, or are not fully covered, by insurance benefits and may also lead to negative publicity and reputational damage. An unfavorable outcome or determination could cause a material adverse impact on the company's results of operations.

Potential product defects or inadequate customer care may adversely impact Linde's business or results of operations.

Risks associated with products and services may result in potential liability claims, the loss of customers or damage to Linde's reputation. Principal possible causes of risks associated with products and services are product defects or an inadequate level of customer care when Linde is providing services.

Linde is exposed to legal risks relating to product liability in the countries where it operates, including countries such as the United States, where legal risks (in particular through class actions) have historically been more significant than in other countries. The outcome of any pending or future products and services proceedings or investigations cannot be predicted and legal or regulatory judgments or agreed settlements may give rise to significant losses, costs and expenses.
The manufacturing and sale of products as well as the construction and sale of plants by Linde may give rise to risks associated with the production, filling, storage, handling and transport of raw materials, goods or waste. Industrial gases are potentially hazardous substances and medical gases and the related healthcare services must comply with the relevant specifications in order to not adversely affect the health of patients treated with them.

Linde's products and services, if defective or not handled or performed appropriately, may lead to personal injuries, business interruptions, environmental damages or other significant damages, which may result, among other consequences, in liability, losses, monetary penalties or compensation payments, environmental clean-up costs or other costs and expenses, exclusion from certain market sectors deemed important for future development of the business and loss of reputation. All these consequences could have a material adverse effect on Linde's business and results of operations.

U.S. civil liabilities may not be enforceable against Linde.

Linde is organized under the laws of Ireland and substantial portions of its assets are located outside of the United States. In addition, certain directors and officers of Linde and its subsidiaries reside outside the United States. As a result, it may be difficult for investors to effect service of process within the United States upon Linde or such persons, or to enforce outside the United States judgments obtained against such persons in U.S. courts in any action, including actions predicated upon the civil liability provisions of the U.S. federal securities laws. In addition, it may be difficult for investors to enforce, in original actions brought in courts in jurisdictions located outside the United States, rights predicated upon the U.S. federal securities laws.

A judgment for the payment of money rendered by a court in the United States based on civil liability would not be automatically enforceable in Ireland. There is no treaty between Ireland and the United States providing for the reciprocal enforcement of foreign judgments. The following requirements must be met before the foreign judgment will be deemed to be enforceable in Ireland (i) the judgment must be for a definite sum, (ii) the judgment must be final and conclusive; and (iii) the judgment must be provided by a court of competent jurisdiction.

An Irish court will also exercise its right to refuse judgment if the foreign judgment (i) was obtained by fraud; (ii) violated Irish public policy; (iii) is in breach of natural justice; or (iv) if the judgment is irreconcilable with an earlier foreign judgment.

In addition, there is doubt as to whether an Irish court would accept jurisdiction and impose civil liability on Linde or such persons in an original action predicated solely upon the U.S. federal securities laws brought in a court of competent jurisdiction in Ireland against Linde or such member, officer or expert, respectively.

Changes in tax laws or policy could adversely impact the company's financial position or results of operations.

Linde and its subsidiaries are subject to the tax rules and regulations in the U.S., Germany, Ireland, the U.K. and other countries in which they operate. Those tax rules and regulations are subject to change on a prospective or retroactive basis. Under current economic and political conditions tax rates and policies in any jurisdiction, including the U.S., the U.K. and the EU, are subject to significant changes which could result in a significant change to Linde's current and deferred income tax. In particular, since Linde is currently treated as U.K. tax resident, any potential changes in the tax rules applying to U.K. tax-resident companies would directly affect Linde.

A change in Linde's tax residency could have a negative effect on the company's future profitability and may trigger taxes on dividends or exit charges. If Linde ceases to be resident in the U.K. and becomes resident in another jurisdiction, it may be subject to U.K. exit charges, and/or could become liable for additional tax charges in the other jurisdiction. If Linde were to be treated as resident in more than one jurisdiction, it could be subject to duplicative taxation. Furthermore, although Linde is incorporated in Ireland and is not expected to be treated as a domestic corporation for U.S. federal income tax purposes, it is possible that the IRS could challenge this result or that changes in U.S. federal income tax law could alter this result. If the IRS successfully asserted such a

position or the law were to change, significant adverse tax consequences may result for Linde, the company and Linde's shareholders.

Changes in tax laws may result in higher tax expense and tax payments. In addition, changes in tax legislation and uncertainty about the tax environment in some regions may restrict Linde's opportunity to enforce its respective rights under the law. Linde also operates in countries with complex tax regulations which could be interpreted in different ways. Linde and its subsidiaries are subject to audits by taxing authorities in various jurisdictions or other review actions by the relevant financial or tax authorities. The ultimate tax outcome may differ from the amounts recorded in Linde's or its subsidiaries' financial statements and may materially affect their respective financial results for the period when such determination is made.

FUTURE DEVELOPMENTS

Linde provides quarterly updates on operating results, material trends that may affect financial performance, and financial earnings guidance via earnings releases and investor teleconferences. These materials are available on the company's website, www.linde.com but are not incorporated herein.

POLITICAL DONATIONS

No political contributions that require disclosure under Irish law were made during fiscal years 2025 or 2024.

OWN SHARES

On October 23, 2023, the company's board of directors approved the repurchase of $15.0 billion of its ordinary shares ("2023 program") which could take place from time to time on the open market (and could include the use of 10b5-1 trading plans), subject to market and business conditions. The 2023 program began on October 23, 2023 and will terminate on the earlier of the date as the maximum authority under the 2023 program is reached or the board terminates the 2023 program. As of December 31, 2025, Linde has repurchased $7.7 billion shares under the 2023 program.

As of December 31, 2025 and 2024, the company had treasury shares of 27,086 thousand and 17,530 thousand, respectively. During the year ended December 31, 2025, 10,262 thousand ordinary shares were purchased by the company for total considerations of $4.6 billion, or an average purchase price of $448.81 per share (€0.001 nominal value). The consideration includes stamp duty, commission and all customary fees. These shares were acquired in order to reduce the shares outstanding or to meet obligations under Linde plc equity awards. See Note 15 to the consolidated financial statements for more information.

All share purchases by the company are structured as redemptions under Irish law.

DIVIDENDS

On February 25, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the first quarter of 2025 (the "Q1 Dividend"). The Q1 Dividend was paid on March 27, 2025 to shareholders of record on March 13, 2025.

On April 28, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the second quarter of 2025 (the "Q2 Dividend"). The Q2 Dividend was paid on June 18, 2025 to shareholders of record on June 4, 2025.

On July 29, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the third quarter of 2025 (the "Q3 Dividend"). The Q3 Dividend was paid on September 18, 2025 to shareholders of record on September 4, 2025.

On October 27, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the fourth quarter of 2025 (the "Q4 Dividend"). The Q4 Dividend was paid on December 17, 2025 to shareholders of record on December 3, 2025.

For additional information, see Note 15 to the consolidated financial statements.

NON-FINANCIAL INFORMATION

Linde plc ("Linde" or the "company") publishes non-financial indicators and qualitative information in this combined non-financial report in accordance with the Irish implementation of the European Directives 2014/95/EU and 2013/34/EU as set out in the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017, as amended (the "Irish Regulations").

This combined non-financial report forms part of the 2025 Directors' Report. It includes reportable information on Board of Directors (the "Board") diversity and on company social and employee matters; environmental matters; respect for human rights and combating

bribery and corruption. Reportable information includes governance, policies, due diligence in implementing these policies and the outcomes of these actions, risk identification and management, and key performance indicators ("KPIs").

Financial numbers disclosed in this non-financial report are according to US GAAP to the extent that the use of those principles in the preparation of the financial statements does not contravene any provision of the Republic of Ireland's Companies Act 2014 (the "Companies Act") or of any regulations made thereunder.

Business model and strategy

The business model of Linde is described in the "Principal Activities" section of the Directors' Report. Linde's sustainable development program and targets are an integral part of Linde's strategy.

Risk management

Main risks are reported in sections relating to environmental matters; social and employee matters; human rights; and bribery and corruption; as well as action towards their mitigation. In addition, the section "Principal Risks and Uncertainties" describes further risks related to the above matters which could have an adverse financial impact on Linde as well as connected non-financial risks. Issues relating to non-financial matters are included in the company-wide enterprise risk management system. The company assesses potential risks on a regular basis and defines and implements mitigation actions. This process also incorporates relevant conclusions from its regular dialogue with stakeholders, including customers, investors and suppliers.

Governance of non-financial matters

Linde has established five core values: safety, inclusion, accountability, integrity and community. These are the basis of what the company stands for and how it behaves. A code of ethics has been adopted that provides clear instructions on expected behavior and for reporting of concerns about potential non-conformance. This code has been approved by the Linde Board of Directors and is named the "Code of Business Integrity". This document is made widely available to employees and third parties. 100% of targeted employees certify each year that they understand and agree with Linde's Code of Business Integrity.

Linde's Code of Business Integrity is supplemented by Linde's code of conduct for suppliers. This "Supplier Code of Conduct" defines Linde's minimum requirements for its supplier concerning their responsibilities towards Linde and its stakeholders, societies, and the environment.

It is the view of Linde's Board that non-financial issues are a component of the company's values, culture, and performance expectations, and are a basis on which employees drive financial results. The Board has confirmed the importance of setting non-financial objectives as part of variable compensation to reinforce leadership's focus on maintaining a culture that supports both short- and long-term sustainable results. It has established non-financial goals with respect to elements such as safety, health & environment; sustainability; human capital, and compliance & integrity, as well as relative performance and strategic positioning. The annual payout of executive variable compensation is also determined, in part, by the performance against pre-established goals related to reducing greenhouse gas ("GHG") emissions. These measures are described in Linde's most recent annual Proxy Statement.

Linde's Board monitors the implementation of the Code of Business Integrity which includes commitments to prevent bribery and corruption, compete fairly, work safely, embrace diversity and inclusion, and respect human rights.

The Board's oversight of Environmental, Social and Governance (ESG) risks and opportunities is integral to our business strategy. The Board and its committees actively oversee Linde's ESG strategy, programs and policies. At least one of its committees maintains oversight over each of the four aspects of ESG.

The Audit committee has oversight over integrity, compliance, and certain enterprise risks. The Human Capital Committee has oversight over the policies, practices and goals related to Linde's workforce generally, including diversity and inclusion, safety and community engagement. The Nomination & Governance Committee actively monitors the changing ESG landscape and recommends changes to Linde's governance programs and practices. The Sustainability Committee focuses on environmental matters, including climate change, decarbonization solutions, greenhouse gas emission reduction, and other key programs and initiatives.

Linde's leadership develops policies and processes to reinforce these non-financial elements and manage them on a day-to-day basis.

For purposes of external reporting, Linde consolidates and reports non-financial issues from its sustainable development function, led by the Vice President of Sustainability, who is also the central point of contact for stakeholders interested in sustainability-related matters.

Board diversity

The Board acknowledges the importance of ensuring that it has the mix of perspectives, skills, experience, qualities and competencies that is appropriate to the company's strategies, and its business, market, geographic, and regulatory environments. The Board also recognizes that its effectiveness is dependent on having directors who have the time to focus on the company's issues and who contribute to an open Board culture that encourages frank discussion and the free exchange of information.

Consistent with the Board's Corporate Governance Guidelines, the Nomination and Governance Committee seeks to build and maintain a Board that contains a range of experiences, competencies, and perspectives that is well-suited for advice and counsel to, and oversight of, the company's business and operations. In doing so, the Committee considers a variety of factors, including the mix of experiences, competencies, and perspectives (including gender, ethnic and cultural diversity) currently represented on the Board.

The Nomination and Governance Committee assists the Board in its oversight of the selection, qualifications, compensation and performance of Linde's directors and is responsible for evaluating the mix of Board member skills required in connection with filling any vacancy on the Board. It maintains a process to establish and periodically reevaluate criteria for Board membership and selection of new directors including independence standards; and determines as necessary the portfolio of skills, experience, perspective and background required for the effective functioning of the Board considering the company's strategy and its regulatory, geographic and market environments.

On December 31, 2025, the Board of Directors of Linde was 67 percent male and 33 percent female, representing a mix of skills and professional backgrounds, including among others, industry experience including industrial gases, basic materials, and/or Linde end-markets, experience in foreign markets and international business, risk management, operations experience and public company board experience. See the table at the end of this section: "Indicators Relating to Board Diversity and Employee-Related Matters".

Each of the directors has experience as a senior executive of a public company or comparable business organization. Each is serving or has served as a director of one or more public companies and on a variety of board committees. Each has executive management and director oversight experience in most, if not all of the following areas considered critical to the conduct of the company's business. These include: strategy development and implementation; risk assessment and management; financial accounting and reporting; internal controls; corporate finance; capital project evaluation; the evaluation, compensation, motivation and retention of senior executive talent; public policies as they affect global industrial corporations; compliance; corporate governance; productivity management; safety management; project management; sustainable development; and, in most cases, global operations. Many of the directors also bring particular insights into specific end markets and foreign markets that are important to the company. These nominees collectively provide a range of perspectives, experiences and competencies well suited to providing advice and counsel to management and to overseeing the company's business and operations.

Social and Employee-related matters

Occupational Health and Safety

There is inherent operational risk in the management of Linde's production facilities and delivery systems, including storage, vehicle transportation and pipelines. Material operating failures at production, storage facilities or pipelines, including fire, toxic release and explosions, or the occurrence of vehicle transportation accidents could result in loss of life, damage to the environment, loss of production and/or extensive property damage.

Safety is a core value for Linde and is always a first priority. Linde continuously works to improve its safety culture and performance worldwide through measures that include continuous training, oversight and control.

Linde businesses around the world conform to requirements in Linde's Global Safety, Health, Environment and Security (SHE&S) Management System and locally adapted requirements. These are aligned with industry and international standards for environment and safety management systems such as Responsible Care®, OHSAS 18001/ISO 45001, and ISO 14001. Linde is also a signatory of the global chemical industry Responsible Care Global Charter®.

Linde's worldwide Health, Safety & Environment ("HSE") policy reinforces its ambition of zero incidents causing harm to people, communities or the environment. It asserts that all incidents and injuries are preventable and that each Linde employee is responsible for their own safety and that of others around them. Linde's global Quality Policy describes Linde's commitments to design, produce and deliver safe, reliable products and services that meet customer expectations.

Linde’s Board of Directors reviews safety and environmental risk at each Board meeting. The Board has established a strategic business objective to maintain best-in-class performance in safety. Annual payout of executive variable compensation depends on performance in several strategic non-financial areas, including safety. Safety and health issues are managed by the Vice President of Safety, Health, Environment & Quality ("SHEQ").

Linde’s safety culture is embedded into all operational processes and in transport and distribution. Linde’s strong worldwide safety and health management system ensures that measures are in place to enable process, personnel, product and distribution safety. These measures are communicated to all employees and relevant business partners and contractors, who are regularly trained in the safe handling of Linde’s products and are expected to adhere to the same high standards. Safety performance is monitored continuously in all businesses and reported monthly and on a major event basis to leadership.

In 2025, Linde's safety results continued to outperform industry benchmarks. Linde's sustainable development targets in Safety include targets focused on operational safety, including distribution and product safety.

Employees

On December 31, 2025, Linde had 65,177 employees (2024: 65,289) in diverse occupations working in more than 80 countries. The decrease in full-time employees was primarily due to the impact of ongoing cost reduction programs partially offset by acquisitions.

Personnel expenses in 2025 and 2024 totaled $6.0 billion and $5.9 billion, respectively, of which $4.0 billion (2024: $3.9 billion) related to salaries.

The company sources talent from an ever-changing and competitive environment. The ability to source and retain qualified and committed employees is a prerequisite for the company’s success.

Inclusion is a Linde core value. The company embraces diversity and inclusion to attract, develop and retain the best talent and build high-performing teams. By leveraging diverse opinions, thoughts and perspectives, the company gains a competitive advantage by maximizing performance and innovation from its employees. The value of inclusion is reflected in Linde's Code of Business Integrity, which states that employees must not be discriminated against on the basis of their race, color, religion, gender, gender identity, national origin, age, disability, veteran status, pregnancy, sexual orientation or other protected characteristic. In addition, Linde's Global Diversity and Inclusion Guidelines state that the company's goal is to foster diversity and inclusion within the company by providing equal employment opportunities for all and recruiting, hiring, promoting and compensating people based on merit, qualification and the company's financial performance.

The Board of Directors ("Board") has established a strategic business objective to maintain world-class standards in talent management. Executive variable compensation is assessed annually based on performance in financial measures as well as in several strategic non-financial areas, including talent management. The Human Capital Committee assists the Board in its oversight of Linde’s compensation policies and programs, particularly in regard to reviewing executive compensation for Linde’s executive officers. The Human Capital Committee also annually reviews the company’s management development and succession programs, diversity policies and objectives, and the associated programs to achieve those objectives. The global head of Human Resources reports to the Chief Executive Officer ("CEO").

Linde has aligned inclusion as a core value with its business strategies and implemented inclusive workforce development planning into business process and performance management. Advancing inclusivity is a line management responsibility and Linde seeks competitive advantage through proactive management of its talent pipeline and recruiting processes. Linde provides equal employment opportunity, and recruits, hires, promotes and compensates people based solely on their performance and ability.

Employees receive a competitive salary and variable compensation components based on performance and job level. Linde has collective bargaining agreements with unions at numerous locations throughout the world. Additional benefits are offered such as occupational pensions and contributions towards health insurance or medical screening, reflecting regional conditions and local competition. Senior managers participate directly in the company’s growth in value through the Long Term Incentive Plan of Linde plc. In addition, annually managers have the ability to grant leadership equity awards under the Long Term Incentive Plan to certain eligible employees. Linde also invests in professional development of its employees through formal and on-the-job training.

On December 31, 2025, employees worldwide comprised of approximately 28 percent women and 72 percent men.

Community engagement

Community is a core value. Linde is committed to improving the communities where employees live and work. Its charitable contributions, along with employee voluntarism, support initiatives that make important and sustainable contributions to the world.

This includes educational investments and research projects related to core business areas and supporting charitable projects in communities and neighborhoods. Charitable contributions are mainly made through the Global Giving Program.

Employee community engagement in all businesses and functions is promoted by the sustainable development (SD) department. In 2025, Linde employee volunteers carried out community engagement projects benefiting people in our communities around the world. This includes students whose lives were enriched through educational projects. In such efforts, Linde teams work in concert with community stakeholders to help address compelling needs.

Environmental matters

Linde’s business is resource transformation through resource productivity. Principal operations relate to the production and distribution of atmospheric and other industrial gases, many of which are used to help customers reduce their emissions. Linde’s operations are energy intensive. Energy use is mostly electricity for air separation, and natural gas for energy and as a feedstock for making hydrogen. Where Linde’s energy is sourced from fossil fuels, these cause direct Scope 1 Greenhouse Gas ("GHG") emissions (principally from steam methane reforming in hydrogen production and from vehicle fuel use in distribution) and indirect Scope 2 GHG emissions (principally from air separation).

Other environmental impacts, e.g., from waste generation or other air and water emissions are minimal and do not present significant business or social risks. Most water is used for cooling processes and is returned to its source with little change in water quality.

Linde’s core value of Community includes a commitment to minimize Linde’s environmental impact. Linde’s Code of Business Integrity emphasizes that care for the environment is incumbent in Linde’s business. In addition to its focus on safety, Linde's worldwide HSE Policy includes a focus on environmental responsibility. Employees are responsible for compliance with laws and striving to ensure that no harm results from actions to the environment and communities. The policy reiterates that environmental responsibility is a core value at Linde and integral in all activities. Linde’s participation in Responsible Care® provides additional policy direction on environmental stewardship.

The Board has established a strategic business objective to maintain best-in-class performance in environmental responsibility, Linde’s Board of Directors reviews safety and environmental risk at each Board meeting. The Board’s Sustainability Committee is responsible for oversight of the Company's programs and policies related to environmental matters, including climate change, greenhouse gas reduction goals and decarbonization solutions, such as clean energy and carbon management, and has meetings scheduled through the year. Strategies related to climate change, greenhouse gas reduction, as well as targets and associated reporting are managed by the Vice President, Sustainability.

In addition to its global HSE policy, Linde has aligned its comprehensive environmental standards and work procedures. Linde businesses around the world conform to requirements in Linde's Global Safety, Health, Environment and Security (SHE&S) Management System and locally adapted requirements and international standards (see the section on "Occupational Health and Safety"). This ensures that measures are in place to enable pollution prevention and control, the responsible management of direct and indirect atmospheric emissions and waste, the protection of natural resources and biodiversity and the management of environmental impacts from transportation or from the use and disposal of products and services.

Linde has issued several position statements related to environmental matters, including its water position statement, which describes its approach to water stewardship, and its position statement on the importance of ecosystems.

Linde has programs and sustainability targets in place for both waste and water management. Linde also focuses management efforts on areas of high water use that are also considered areas of high water stress and assesses water availability based on local sources and the latest Water Risk Atlas of the World Resource Institute.

In 2025, Linde had no substantial fines for environmental violations. The environmental protection costs in 2025 were not significant. Linde anticipates that future annual environmental protection expenditures will be similar to 2025, subject to any significant changes in existing laws and regulations. Based on historical results and current estimates, management does not believe that environmental expenditures will have a material adverse effect on the consolidated financial position, the consolidated results of operations or cash flows in any given year.

Linde is aligned with the Paris Accord and an active player in advancing the world to limit global warming.

Linde's SD 2028 goals include the reduction of its greenhouse gas emissions intensity versus EBITDA by 35% from 2018 to 2028. This is the result of several operational targets around energy and emissions efficiency as well as doubling the total amount of low carbon electricity (zero CO2 emission) procured from 2018 to 2028.

Linde set additional climate change targets in 2021. These include the absolute reduction of GHG emissions by 35% by 2035, from a 2021 baseline, as well as an ambition for climate neutrality by 2050. The 2035 absolute reduction target has been validated by the Science Based Targets Initiative (SBTi) as aligned with "well below 2 °C" in 2022.

The Board of Directors' Sustainability Committee reviews progress toward these goals in environmental sustainability in meetings scheduled through the year.

Linde operates in jurisdictions that have, or are developing, laws and/or regulations to reduce or mitigate the adverse effects of GHG emissions and therefore faces a highly uncertain regulatory environment in this area. Linde continues to evaluate emerging regulatory changes and assess appropriate responses. For example, hydrogen production plants and other manufacturing and electricity-generating plants have been identified as sources of carbon dioxide emissions and are subject to carbon taxation or cap-and-trade regulations in jurisdictions including California, China, Singapore and the European Union impacting both Linde and its customers. Linde believes it will be able to mitigate the costs of these regulations through the terms of its product supply contracts. However, legislation that limits GHG emissions may impact growth by increasing capital, compliance, operating and maintenance costs and/or decreasing demand.

To manage business risks from current and potential GHG emission regulation as well as physical risks associated with climate change, Linde actively monitors emerging developments, evaluates the direct and indirect business risks, and takes appropriate actions. Among others, actions include: increasing relevant resources and training; maintaining contingency plans; obtaining advice and counsel from expert vendors, insurance providers and industry experts; incorporating GHG provisions in commercial agreements; and conducting regular reviews of the business risks with management. Although there are considerable uncertainties, Linde believes that the business risk from potential regulations can be effectively managed through its commercial contracts. Additionally, Linde's plant design, operations, and risk management teams are engaged to manage and mitigate losses from physical climate change, and the company does not anticipate material effects regarding its plant operations or business arising from potential physical risks of climate change.

At the same time, external factors may provide Linde with future business opportunities. Linde anticipates continued growth in clean hydrogen sales due to increased focus on decarbonization projects. Other factors include governmental regulation of GHG and other emissions; uncertain costs of energy and certain natural resources; the development of renewable energy alternatives; and new technologies that help extract natural gas, improve air quality, increase energy efficiency and mitigate the impacts of climate change. Linde continues to develop new applications that can help customers lower emissions by reducing energy consumption and increasing product throughput. Linde's oxyfuel combustion technology is a significant advancement in industrial combustion processes offering enhanced efficiency, higher productivity, reduced emissions and effective carbon capture solutions across various industries including metals, glass, refining and chemicals processes. Stricter regulation of water quality in emerging economies such as China provide a growing market for a number of gases, e.g., oxygen for wastewater treatment. Increased concern about drought in areas such as California and Australia may create additional markets for carbon dioxide for desalination. Renewable fuel standards in the European Union and U.S. can create a market for second-generation biofuels which use industrial gases such as oxygen, carbon dioxide, and hydrogen.

Linde continuously seeks opportunities to optimize energy use and reduce GHG emissions through research and development in customer applications and operational energy efficiency, sourcing low-carbon energy, and purchasing hydrogen as a chemical byproduct where feasible. Linde tracks GHG emission performance versus targets and reports regularly to business management and the Sustainability Committee of Linde's Board of Directors. The Sustainability Committee is responsible for oversight of the company's programs and policies related to environmental matters, including climate change, greenhouse gas reduction goals and decarbonization and clean energy efforts.

Changes to regulations in the areas of environmental protection and climate change, for example, may impact customer and competitor behavior driving structural changes in key end markets. While Linde will work to mitigate these risks through the pursuit of strategic alliances and investment in applications technologies to capture new growth areas, given the uncertainty about the type and scope of new regulations, it is difficult to predict how such changes and their impact on market behavior will ultimately impact Linde's business. However, such changes could have a material adverse impact on Linde's results of operations.

Products that offer environmental and social advantages

Linde provides a competitive advantage to its customers by continuously developing new products and applications, which allow them to improve their productivity, energy efficiency and environmental footprint. Linde's products help the company's customers develop more sustainable processes in many ways - for example by boosting energy efficiency or reducing emissions. Linde's products also contribute positively to the health and well-being of our customers. Homecare patients worldwide benefit from our medical gases, devices, services and therapies primarily in respiratory care.

In 2025, Linde spent a total of $208 million on research and development (2024: $210 million).

Linde views hydrogen as a key enabler of decarbonization and the transition towards a cleaner economy. Linde is advancing a number of clean energy and carbon management activities aligned with its strategy to decarbonize the company's own operations, to help customers decarbonize their operations, and to address new market needs. Hydrogen is a cornerstone of the company's clean energy strategy. As one of the world's leading industrial gases and engineering companies, Linde covers the full spectrum of the hydrogen value chain. Strong collaborations are critical in this evolving decarbonization market to reduce financial risk and drive project success by using complementary strengths in specific functional areas. Linde is committed to working with all stakeholders to build a better future that is lower in emissions and maximizes value.

The company reports on its sustainability portfolio and on the carbon productivity, as demonstrated by a subset of products and applications.

Ethics and Integrity

Responsible corporate governance is incumbent for Linde's business success. This means ensuring compliance with the law, rules and regulations and voluntary commitments. Integrity is a company core value. Linde strives continuously to achieve its goals ethically and with the highest integrity. Interaction between management, employees and Linde's business partners is expected to be transparent and respectful, consistent with its Code of Business Integrity.

The Linde Board believes that strong integrity, ethics and compliance culture is a social obligation to those impacted by the company, necessary for maintaining investor trust and a necessary condition for effective corporate governance. The Board believes further that such a culture must be driven by example and emphasis at the top of the organization.

Ethical values and performance are significant factors in the selection of directors, the CEO and members of the leadership team. The Board has established financial incentives for the achievement of compliance results as a key non-financial element in executive variable compensation.

Linde has appointed a Chief Compliance Officer ("CCO"), who reports to the General Counsel, who in turn reports to the CEO. The Board reviews the company's key compliance risks and compliance program, including that program's design, implementation and effectiveness, with the CCO and the General Counsel.

Linde's Code of Business Integrity affirms the company's commitment to fairness, transparency and trust as the basis for growth and prosperity for employees, customers, suppliers, markets and our communities. The Board is responsible for monitoring the implementation of the Code of Business Integrity. Its responsibilities include the periodic review of the policy and overseeing management's preventative, reporting, investigation and resolution programs for implementing this policy.

The Code is communicated to employees. It provides clear instructions on expected behavior to conform with the Code and for reporting concerns about potential non-conformance. Employees also receive training and certification to the Code. Subcontractors and other stakeholders are expected to follow this standard.

In addition to several expectations, Linde's Supplier Code of Conduct ("SCOC") outlines Linde's requirements of suppliers and business partners for fair and ethical behavior.

Linde follows the law and is governed by all local laws wherever it is located. In the event of a conflict between local law and the Code of Business Integrity or company policy, Linde will follow the stricter standard within the framework of the applicable laws.

Combating corruption and bribery

Linde's Code of Business Integrity affirms that the company does not tolerate the use of kickbacks or bribery in any form. Third parties acting on behalf of Linde are prohibited from giving or accepting bribes, directly or indirectly. Linde's Code of Business Integrity prohibits activities that are corrupt or may give appearance of corruption and prohibits any form of bribery. A global

compliance program designed to prevent possible policy breaches focuses on information, training sessions and management advice. The global compliance organization helps identify potential compliance-related risks and develops measures to mitigate them. Concerns are reported to the Leadership and the Board's Audit Committee.

Linde's commitment to anti-corruption is communicated to employees using different internal channels, including mandatory compliance training using face-to-face and e-learning tools. Employees and third parties are encouraged to utilize Linde's Integrity Hotline to report potential non-compliance issues and concerns.

Human rights

Human rights are basic rights inherent to all human beings, regardless of differences such as in race, color, religion, gender, gender identity, national origin, sexual orientation. These include the right to life and freedom, the right to work and education and the right to well-being, among others. Linde has an obligation to comply with the law and be responsible to protect its employees, business operations, the environment, the communities in which it works, its business relationships and its company reputation. Linde affirms commitments to human rights through participation in global initiatives, including as a signatory to the U. N. Global Compact and its internal policies, including the company's Human Rights Policy.

Linde's Human Rights Policy, Code of Business Integrity, corporate HSE Policy and other corporate and country-level policies, make clear the company's commitment and management processes to address relevant areas of potential Human Rights concern. These include:

- Safety and health protection; a safe work environment
- The prevention of discrimination and harassment of employees
- Equal opportunity and equal treatment
- Prohibition of child and forced labor
- Prohibition of human trafficking
- Merit-based decisions on recruitment, hiring, promotion and compensation
- Compliance with regulations including working hours
- The right to privacy
- Freedom of association and freedom of peaceful assembly, including the freedom to choose whether to engage in collective bargaining and employees' participation in works agreements in various countries

Linde's Human Rights Policy and its Code of Business Integrity makes clear its commitment to human rights. Linde recognizes every person's innate humanity and treats everyone with dignity and respect. In supporting the protection and promotion of human rights worldwide, Linde abides by the principles of the International Bill of Human Rights enacted by the United Nations, and does not condone nor engage in discrimination, harassment, violations of privacy, slavery or servitude, restrictions on free assembly or unfair employment practices. Linde prohibits any form of child labor or forced labor, including human trafficking. Linde commits to adhering to these human rights principles and expects similar standards to be observed by all with whom it conducts business.

Suppliers and other third parties play a critical role in Linde's ability to operate and provide products and services to its customers. Their actions and practices also reflect on Linde. Therefore, the company chooses suppliers carefully based on merit and a due diligence process.

Linde expects suppliers to comply with legal requirements and to act in a manner that is consistent with Linde's values and the principles outlined in its Code of Business Integrity as well as its supplier-specific guidelines. In addition to several expectations, Linde's SCOC outlines Linde's requirements for its suppliers with regards to human rights and labor standards, such as promoting non-discrimination and respect for employees, and prohibiting any form of forced labor or child labor. In addition, Linde's conflict minerals policy requires Linde suppliers or their sub-suppliers to only source materials from environmentally and socially responsible sources.

Together, policies and measures help to promote respectful practices and workspaces, in line with Linde's values, across the supply chain within our company and into our communities.

DIRECTORS DURING FINANCIAL YEAR

The directors of the company during the financial year are listed in the table below.

Directors	Appointment Date
Mr. Stephen F. Angel (1)	March 1, 2023
Mr. Sanjiv Lamba	March 1, 2023
Prof. Dr. Ann-Kristin Achleitner	March 1, 2023
Dr. Thomas Enders	March 1, 2023
Mr. Hugh Grant	March 1, 2023
Mr. Joe Kaeser	March 1, 2023
Dr. Victoria Ossadnik	March 1, 2023
Ms. Paula Rosput Reynolds	February 27, 2024
Mr. Alberto Weisser	March 1, 2023
Mr. Robert Wood	March 1, 2023

(1) Retired from the Board of Directors on January 31, 2026

DIRECTORS' AND COMPANY SECRETARY'S INTERESTS

No director, company secretary or any member of their immediate families had any interest in shares or debentures of any subsidiary. Directors' remuneration is set forth in Note 27 to the consolidated financial statements. The interests of the directors and the secretaries of the company in office as at December 31, 2025 in the ordinary share capital of Linde plc as of December 31, 2025 and 2024, (or, if he or she was not a director on December 31, 2024, when he or she became a director), as required to be stated pursuant to section 329 of the Act, are presented in the table below.

	December 31, 2025	
Directors	**Ordinary Shares (1)**	**Options**
Mr. Stephen F. Angel	704,880	874,260
Mr. Sanjiv Lamba	90,794	193,703
Prof. Dr. Ann-Kristin Achleitner	4,473	—
Dr. Thomas Enders	10,595	—
Mr. Hugh Grant	1,082	—
Mr. Joe Kaeser	2,605	—
Dr. Victoria Ossadnik	3,335	—
Ms. Paula Rosput Reynolds	716	—
Mr. Alberto Weisser	1,651	—
Mr. Robert Wood	14,463	—
Secretary		
Susan Kelly	17	—
Anthony M. Pepper	1,267	4,870

(1) Excludes stock units, including restricted share units, deferred stock units and performance share units, as the units have no ordinary share voting rights. Any interests in stock units as of December 31, 2025 *are reported in Note 27 of this report.*

DIRECTORS' COMPLIANCE STATEMENT

As required by section 225(2) of the Act, the directors acknowledge that they are responsible for securing the company's compliance with its relevant obligations (as defined in section 225(1)). The directors further confirm that a "compliance policy statement" (as defined in section 225(3)(a)) has been drawn up, that appropriate arrangements and structures that are, in the directors' opinion, designed to secure material compliance with the relevant obligations have been put in place and that a review of those arrangements and structures has been conducted in the financial year to which this report relates.

STATEMENT OF DISCLOSURES TO AUDITORS

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditor is unaware. Having made enquiries of fellow directors and the company's auditor, each director has taken all the steps that he/she is obliged to take as a director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of that information.

DIRECTORS' RESPONSIBILITY STATEMENT

The directors are responsible for preparing the directors' report and the financial statements in accordance with Irish law.

Irish law requires the directors to prepare financial statements for each financial year that gives a true and fair view of the company's assets, liabilities and financial position as at the end of the financial year and of the profit and loss of the company for the financial year. Under that law, the Directors have prepared the Group financial statements in accordance with U.S. accounting standards, as defined in Section 279(1) of the Companies Act 2014, to the extent that the use of those principles in the preparation of the financial statements does not contravene any provision of the Companies Act or of any regulations made thereunder and the Company financial statements in accordance with Irish Generally Accepted Accounting Practice (accounting standards issued by the UK Financial Reporting Council, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and Irish law).

Under Irish law, the directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the company's assets, liabilities and financial position as at the end of the financial year and the profit and loss of the company for the financial year.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the company;
- enable, at any time, the assets, liabilities, financial position and profit and loss of the company to be determined with reasonable accuracy; and
- enable the directors to ensure that the financial statements comply with the Companies Act and enable those financial statements to be audited.

The directors are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

EVENTS SINCE THE STATEMENT OF FINANCIAL POSITION DATE

Dividends After Year End

On February 24, 2026, the directors of Linde plc declared an interim dividend of $1.60 per share for the first quarter of 2025 (the "Q1 Dividend"). The Q1 Dividend was payable on March 26, 2026 to shareholders of record on March 11, 2026.

On April 27, 2026, the directors of Linde plc declared an interim dividend of $1.60 per share for the second quarter of 2025 (the "Q2 dividend"). The Q2 Dividend is payable on June 18, 2026 to shareholders of record on June 4, 2026.

Own Shares

From the period January 1, 2026 through March 31, 2026, an additional 1,662 thousand ordinary shares were purchased by the company for total consideration of $791 million, or an average price of $470.58 per share.

ACCOUNTING RECORDS

The measures that the directors have taken to secure compliance with the requirements of sections 281 to 285, with regard to the keeping of accounting records, include the provision of appropriate resources to maintain adequate accounting records throughout the company, including the appointment of personnel with appropriate qualifications, experience and expertise.

The company's accounting records are maintained at Forge, 43 Church Street West, Woking, Surrey, GU21 6HT, United Kingdom and 10 Riverview Drive, Danbury, Connecticut, 06810, United States.

SUBSIDIARY COMPANIES AND BRANCHES

Information regarding subsidiary undertakings, including information regarding branches, is provided in Note 30 to the consolidated financial statements.

AUDIT COMMITTEE

In accordance with Section 167 of the Companies Act 2014, the directors have established an audit committee which makes regular reports to the board of directors. The audit committee oversees financial reporting and related matters.

Approved by the Board of Directors and signed on its behalf on April 27, 2026 by:

/s/ Sanjiv Lamba	/s/ Mr. Alberto Weisser
Sanjiv Lamba	Alberto Weisser
Chairman, Chief Executive Officer and Director	*Director*

Independent auditors' report to the members of Linde plc

Report on the audit of the financial statements

Opinion

In our opinion:

- Linde plc's consolidated financial statements and company financial statements (the "financial statements") give a true and fair view of the group's and the company's assets, liabilities and financial position as at December 31, 2025 and of the group's profit and the group's cash flows for the year then ended;
- the consolidated financial statements have been properly prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP"), as defined in Section 279 of the Companies Act 2014, to the extent that the use of those principles in the preparation of consolidated financial statements does not contravene any provision of Part 6 of the Companies Act 2014;
- the company financial statements have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014.

We have audited the financial statements, included within the Directors' Report and Financial Statements (the "Annual Report"), which comprise:

- the Consolidated and Company Statements of Financial Position as at December 31, 2025;
- the Consolidated Statement of Profit and Loss and Consolidated Statement of Comprehensive Income for the year then ended;
- the Consolidated Statement of Cash Flows for the year then ended;
- the Consolidated and Company Statements of Changes in Equity for the year then ended; and
- the notes to the financial statements, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law. Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Our audit approach

Overview

Audit scope

- We conducted a full scope audit of 2 components.
- Audits of specific account balances or transactions were performed in respect of 6 components.
- Specified audit procedures were performed at 12 additional components.
- We audited certain activities controlled and managed centrally such as intangible assets, goodwill impairment testing, income taxes, and legal matters.
- Overall, we obtained coverage of 60% of group sales and in excess of 70% total group assets.

Key audit matters

- Revenue Recognition - Estimated Costs at Completion

Materiality

- Overall group materiality: $450 million (2024: $420 million) based on c. 5% of profit before tax.
- Overall company materiality: $770 million (2024: $754 million) based on 1% of net assets.
- Performance materiality: $335 million (2024: $315 million) (group) and $577 million (2024: $566 million) (company).

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

This is not a complete list of all risks identified by our audit.

Key audit matter	How our audit addressed the key audit matter
Revenue Recognition - Estimated Costs at Completion	
Refer to Note 2 - "Summary of Accounting Policies; Revenue Recognition" and Note 4 - "Revenue Recognition". As discussed in Note 4 to the consolidated financial statements, $2,250 million of the group's total revenues for the year ended December 31, 2025 was generated from sale of equipment contracts ("engineering contracts"). Revenue from sale of equipment is generally recognized over time as the group has an enforceable right to payment for performance completed to date and performance does not create an asset with alternative use. For contracts recognized over time, revenue is recognized primarily using a cost incurred input method. Costs incurred to date relative to total estimated costs at completion are used to measure progress toward satisfying performance obligations. Costs incurred include material, labour, and overhead costs and represent work contributing and proportionate to the transfer of control to the customer. Changes to cost estimates and contract modifications are typically accounted for as part of the existing contract and are recognised as cumulative adjustments for the inception-to-date effect of such change. We determined estimated costs of material and labour at completion as it relates to revenue recognition for the sale of equipment contracts to be a key audit matter as significant judgement was exercised by management when developing these estimated costs at completion.	We tested the effectiveness of controls relating to the revenue recognition process, including controls over developing the estimated costs at completion for the sale of equipment contracts. We tested management's process for developing the estimated costs at completion for the sale of equipment contracts, and evaluated the reasonableness of management's significant assumptions, including the estimates of expected material and labour costs. PwC professionals with specialised skill and knowledge in the area of capital projects and infrastructure were used to assist in evaluating management's estimates and the significant assumptions related to the expected material and labour costs. Evaluating the reasonableness of management's significant assumptions involved evaluating management's ability to reasonably estimate costs at completion for the sale of equipment contracts on a sample basis by: (i) considering whether circumstances that may warrant a modification to estimated costs at completion of ongoing contracts, including actual costs in excess of estimates, were identified in a timely manner, and (ii) performing a comparison of the originally estimated and actual costs incurred on similar completed equipment contracts. We also assessed the appropriateness of the related disclosures within the financial statements.

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the group and the company, the accounting processes and controls, and the industry in which they operate.

The group's operations consist of two major product lines: industrial gases and engineering. Industrial gases operations are managed on a geographic basis, which represent three of the reportable segments - Americas, EMEA (Europe/Middle East/Africa), and APAC (Asia/South Pacific); a fourth reportable segment represents the Engineering business.

In determining our audit scope we focused on individual reporting components and determined the type of work that needed to be performed at the reporting components by us, as the group engagement team, and other component auditors within other PwC network firms. Where the work was performed by other component auditors within other PwC network firms, we determined the level of involvement we needed to have in the audit work of those components to be able to conclude that sufficient appropriate audit evidence had been obtained as a basis for our opinion on the financial statements as a whole.

A full scope audit was performed by component auditors within the PwC network firms in respect of two components.

Based on our risk assessment and to achieve the overall level of audit coverage we considered appropriate, an audit of specific account balances, and classes of transactions were performed in respect of 6 components. Specified audit procedures were performed on certain account balances and transactions of 12 other components by other PwC network firms.

We audited certain activities controlled and managed centrally such as intangible assets, goodwill impairment testing, income taxes, and legal matters.

The group engagement team was responsible for the scope and direction of the audit. We allocated materiality levels and issued instructions to each component auditor. In addition to the report from each of the component auditors, we received detailed memoranda of examinations on work performed and relevant findings which supplemented our understanding of the component, the results and the audit findings. Senior members of the Irish group engagement team used video conferencing to facilitate our oversight of the component auditor work and had meetings and discussions with certain management and component audit teams through planning, interim procedures and year end. This, together with additional procedures performed at the group level, gave us the evidence we needed for our opinion on the financial statements as a whole.

Overall, through the full scope audit, audit of specific account balances and the specified audit procedures by reporting components and on centrally managed activities, we obtained coverage of 60% of group sales and in excess of 70% of total assets.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

	Consolidated financial statements	**Company financial statements**
Overall materiality	$450 million (2024: $420 million).	$770 million (2024: $754 million).
How we determined it	c. 5% of profit before tax.	1% of net assets.
Rationale for benchmark applied	We applied this benchmark as profit before tax is a key accounting benchmark which is also consistent with the measures of performances utilised by management, analysts and the general market.	The company is a holding company. Consequently, we believe that net assets is the most relevant measure to reflect the nature of its activities and transactions. Financial statement line items that do not eliminate on consolidation have been audited to the materiality level applicable to the consolidated financial statements.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% (2024: 75%) of overall materiality, amounting to $335 million (2024: $315 million) for the group audit and $577 million (2024: $566 million) for the company audit.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with those charged with governance that we would report to them misstatements identified during our audit above $32 million (group audit) (2024: $30 million) and $32 million (company audit) (2024: $30 million) as well as misstatements below those amounts that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

Our evaluation of the directors' assessment of the group's and the company's ability to continue to adopt the going concern basis of accounting included:

- obtaining management's going concern assessment for a period of at least twelve months from the date on which the financial statements are authorised for issue;
- considering liquidity and available financial resources throughout the going concern assessment period;
- assessing the ability of the company to generate cash based on management approved forecasts and assessing how these forecasts are compiled;
- evaluating the key assumptions within management's forecasts. In evaluating these forecasts, we considered the group's historic performance and its past record of achieving strategic objectives; and
- performing our own independent sensitivity analysis to assess further appropriate downside scenarios.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group's or the company's ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the group's or the company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 (excluding the information included in the "Non Financial Statement" as defined by that Act on which we are not required to report) have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report (excluding the information included in the "Non Financial Statement" on which we are not required to report) for the year ended December 31, 2025 is consistent with the financial statements and has been prepared in accordance with the applicable legal requirements.
- Based on our knowledge and understanding of the group and company and their environment obtained in the course of the audit, we did not identify any material misstatements in the Directors' Report (excluding the information included in the "Non Financial Statement" on which we are not required to report).

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Directors' Responsibility Statement set out on page 26, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the group and industry, we identified that the principal risks of non-compliance with laws and regulations related to U.S. Foreign Corrupt Practices Act and anti-bribery legislation, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2014 and relevant tax legislation. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to manipulate financial results and potential management bias in accounting estimates. Audit procedures performed by the engagement team included:

- Discussions with the Audit Committee, senior management and internal audit including consideration of known or suspected instances of non-compliance with laws and regulations and fraud;
- Reading the meeting minutes of the Board of Directors, the Audit Committee, the Nomination and Governance Committee and the Human Capital Committee;
- Challenging assumptions made by senior management in its significant accounting estimates, particularly in relation to the key audit matter and evaluating whether there was evidence of management bias;
- Identifying and testing journal entries based on our risk assessment which included unexpected account combinations and material consolidation journals; and
- Designing audit procedures to incorporate elements of unpredictability into our audit approach.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at: https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the company financial statements to be readily and properly audited.
- The Company Statement of Financial Position is in agreement with the accounting records.

Other exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Prior financial year Non Financial Statement

We are required to report if the company has not provided the information required by Regulation 5(2) to 5(7) of the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017 in respect of the prior financial year. We have nothing to report arising from this responsibility.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

[1] Business Overview and Basis of Preparation

Linde (Registration number 606357) is an incorporated public limited company formed under the laws of Ireland. Linde's registered office is located at Ten Earlsfort Terrace, Dublin 2, D02 T380 Ireland. Linde's principal executive offices are located at Forge, 43 Church Street West, Woking, Surrey, GU21 6HT, United Kingdom and 10 Riverview Drive, Danbury, Connecticut, 06810, United States. Linde trades on the Nasdaq under the symbol LIN as of December 31, 2025.

The directors have elected to prepare the consolidated financial statements in accordance with Section 279 of the Companies Act 2014, which provides that a true and fair view of the state of affairs and profit or loss may be given by preparing the financial statements in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"), as defined in Section 279 of the Companies Act 2014, to the extent that the use of those principles in the preparation of the financial statements does not contravene any provision of the Republic of Ireland's Companies Act 2014 (the "Companies Act") or of any regulations made thereunder. Accordingly, these financial statements include disclosures required by the Companies Act in addition to those required under U.S. GAAP. The consolidated financial statements include the accounts of subsidiaries, after elimination of intercompany accounts and transactions. The consolidated financial information presented herein reflects all financial information that, in the opinion of management, is necessary for a fair statement of financial position, profit and loss and cash flows for the periods presented.

The consolidated financial statements of Linde have been prepared on a historical cost basis, except for the following: 1) certain financial assets and liabilities (including derivative instruments) - measured at fair value and 2) defined benefit pension plans - plan assets measured at fair value.

The consolidated financial statements of Linde have been prepared on a going concern basis. The company believes that it has sufficient operating flexibility, cash reserves, and funding sources to maintain adequate amounts of liquidity to meet its business needs around the world. The company maintains a $5 billion and a $1.5 billion unsecured and undrawn revolving credit agreement with no associated financial covenants. No borrowings were outstanding under the credit agreements as of December 31, 2025 (see Note 18). The company does not anticipate any limitations on its ability to access the debt capital markets and/or other external funding sources and remains committed to its strong credit ratings.

The reporting currency is the US dollar ("USD"). All amounts are shown in millions of US dollars ($ million), unless stated otherwise. Expenses are presented by function in the consolidated statement of profit and loss.

The annual financial statements of companies included in the consolidation are prepared at the same reporting date as the annual financial statements of Linde plc.

[2] Summary of Accounting Policies

Principles of Consolidation – The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America (" U.S. GAAP") and include the accounts of all significant subsidiaries where control exists and, in limited situations, variable-interest entities where the company is the primary beneficiary. Intercompany transactions and balances are eliminated in consolidation and any significant related-party transactions have been disclosed.

Equity investments generally consist of 20% to 50% owned operations where the company exercises significant influence, but does not have control. Income from equity investments in corporations is reported on an after-tax basis. Pre-tax income from equity investments that are partnerships or limited-liability corporations is included in other operating (income) expense – net with related taxes included in income tax expense. Equity investments are reviewed for impairment whenever events or circumstances reflect that an impairment loss may have been incurred.

Changes in ownership interest that result either in consolidation or deconsolidation of an investment are recorded at fair value through earnings, including the retained ownership interest, while changes that do not result in either consolidation or deconsolidation of a subsidiary are treated as equity transactions.

Use of Estimates – The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. While actual results could differ, management believes such estimates to be reasonable.

Operations – Linde is the largest industrial gases company globally. The company produces, sells and distributes atmospheric, process and specialty gases to a diverse group of industries including aerospace, chemicals, food and beverage, electronics, energy, healthcare, manufacturing, and metals. Linde's Engineering business offers its customers an extensive range of gas production and processing services including supplying plant components and services directly to customers.

Revenue Recognition – Revenue is recognized as control of goods or services are transferred to customers in an amount that reflects the consideration to which the company expects to be entitled to receive in exchange for the goods or services. See Note 4 for additional details regarding Linde's revenue recognition policies.

Cash Equivalents – Cash equivalents are considered to be highly liquid securities with original maturities of three months or less.

Inventories – Inventories are stated at the lower of cost or net realizable value. Cost is determined using the average-cost method.

Property, Plant and Equipment – Property, plant and equipment are carried at cost, net of accumulated depreciation. The company capitalizes labor, applicable overhead and interest as part of the cost of constructing major facilities. Expenditures for additions and improvements that extend the lives or increase the capacity of plant assets are also capitalized. Depreciation is calculated on the straight-line method based on the estimated useful lives of the assets, which range from 3 years to 40 years (see Note 11). Linde uses accelerated depreciation methods for tax purposes where appropriate. Maintenance of property, plant and equipment is generally expensed as incurred.

The company performs a test for impairment whenever events or changes in circumstances indicate that the carrying amount of an individual asset or asset group may not be recoverable. Should projected undiscounted future cash flows be less than the carrying amount of the asset or asset group, an impairment charge reducing the carrying amount to fair value may be required. Fair value is determined based on the most appropriate valuation technique, including discounted cash flows.

Asset-Retirement Obligations – An asset-retirement obligation is recognized in the period in which sufficient information exists to determine the fair value of the liability with a corresponding increase to the carrying amount of the related property, plant and equipment which is then depreciated over its useful life. The liability is initially measured at fair value and then accretion expense is recorded in each subsequent period. The company's asset-retirement obligations are primarily associated with its on-site long-term supply arrangements where the company has built a facility on land leased from the customer and is obligated to remove the facility at the end of the contract term. The company's asset-retirement obligations are not material to its consolidated financial statements.

Foreign Currency Translation – For most foreign operations, the local currency is the functional currency and translation gains and losses are reported as part of the other reserves component of equity as a cumulative translation adjustment (see Note 15).

Translation differences arising from the translation of items into the reporting currency are recognized in other comprehensive income. Assets and liabilities, contingent liabilities, and other financial commitments are translated at the closing rate on the reporting date (closing rate method). Items in the consolidated statement of profit and loss for the year are translated at a rate which approximates to the translation rate on the date of the transaction (the average rate).

Financial Instruments – Linde enters into various derivative financial instruments to manage its exposure to fluctuating interest rates, currency exchange rates, commodity pricing and energy costs. Such instruments primarily include interest-rate swap and treasury rate lock agreements; forward contracts; and commodity-swap agreements. These instruments are not entered into for trading purposes. Linde only uses commonly traded and non-leveraged instruments.

There are three types of derivatives the company enters into: (i) those relating to fair-value exposures, (ii) those relating to cash-flow exposures, and (iii) those relating to foreign currency net investment exposures. Fair-value exposures relate to recognized assets or liabilities, and firm commitments; cash-flow exposures relate to the variability of future cash flows associated with recognized assets or liabilities, or forecasted transactions; and net investment exposures relate to the impact of foreign currency exchange rate changes on the carrying value of net assets denominated in foreign currencies.

When a derivative is executed and hedge accounting is appropriate, it is designated as either a fair-value hedge, cash-flow hedge, or a net investment hedge. Currently, Linde designates all interest-rate and treasury rate locks as hedges for accounting purposes when used. Currency contracts are generally not designated as hedges for accounting purposes. However, currency contracts related to certain forecasted transactions and net investments in foreign-denominated subsidiaries are designated as hedges for accounting purposes. Whether designated as hedges for accounting purposes or not, all derivatives are linked to an appropriate underlying exposure. On an ongoing basis, the company assesses the hedge effectiveness of all derivatives designated as hedges for accounting purposes to determine if they continue to be highly effective in offsetting changes in fair values or cash flows of the underlying hedged items. If it is determined that the hedge is not highly effective, then hedge accounting will be discontinued prospectively.

Changes in the fair value of derivatives designated as fair-value hedges are recognized in earnings as an offset to the change in the fair values of the underlying exposures being hedged. The changes in fair value of derivatives that are designated as cash-flow hedges are deferred in other reserves and are reclassified to earnings as the underlying hedged transaction affects earnings. Provided the hedge remains highly effective, any ineffectiveness is deferred in other reserves and is reclassified to earnings as the underlying hedged

transaction affects earnings. Hedges of net investments in foreign subsidiaries are recognized in the cumulative translation adjustment component of other reserves on the consolidated statement of financial position to offset translation gains and losses associated with the hedged net investment. Derivatives that are entered into for risk-management purposes and are not designated as hedges (primarily related to currency derivatives other than for firm commitments) are recorded at their fair market values and recognized in current earnings.

See Note 22 for additional information relating to financial instruments.

Goodwill – Acquisitions are accounted for using the acquisition method which requires allocation of the purchase price to assets acquired and liabilities assumed based on estimated fair values. Any excess of the purchase price over the fair value of the assets and liabilities acquired is recorded as goodwill. Allocations of the purchase price are based on preliminary estimates and assumptions at the date of acquisition and are subject to revision based on final information received, including appraisals and other analyses which support underlying estimates.

The company performs a goodwill impairment test annually as of 1 October or more frequently if events or circumstances indicate that an impairment loss may have been incurred. The impairment test allows an entity to first assess qualitative factors to determine if it is more likely than not that the fair value of a reporting unit is less than carrying value. If it is determined that it is more likely than not that the fair value of a reporting unit is less than carrying value then the company will estimate and compare the fair value of its reporting units to their carrying value, including goodwill. Reporting units are determined based on one level below the operating segment level. The qualitative analysis of goodwill for the year ended December 31, 2025 showed the fair value of the reporting units substantially exceeded the carrying value, as such further analysis was not performed.

Irish Company Law requires goodwill and indefinite lived intangible assets to be amortized, unless reasons for different application are provided. However, the Company does not believe this gives a true and fair view, as not all goodwill and intangible assets decline in value. In addition, since goodwill that does decline in value rarely does so on a straight-line basis, straight-line amortization of goodwill and indefinite lived intangible assets over an arbitrary period does not reflect the economic reality. Therefore, goodwill and indefinite lived intangible assets are not amortized.

See Note 9 for additional information relating to goodwill.

Other Intangible Assets – Other intangible assets, primarily customer relationships, are amortized over the estimated period of benefit. The determination of the estimated period of benefit will be dependent upon the use and underlying characteristics of the intangible asset. Linde evaluates the recoverability of its intangible assets subject to amortization when facts and circumstances indicate that the carrying value of the asset may not be recoverable. If the carrying value is not recoverable, impairment is measured as the amount by which the carrying value exceeds its estimated fair value. Fair value is generally estimated based on either appraised value or other valuation techniques. Indefinite lived intangible assets related to the Linde brand are evaluated for impairment on an annual basis or more frequently if events or circumstances indicate an impairment loss may have occurred.

See Note 10 for additional information relating to other intangible assets.

Income Taxes – Deferred income taxes are recorded for the temporary differences between the financial statement and tax bases of assets and liabilities using currently enacted tax rates. Valuation allowances are established against deferred tax assets whenever circumstances indicate that it is more likely than not that such assets will not be realized in future periods.

Under the guidance for accounting for uncertainty in income taxes, the company can recognize the benefit of an income tax position only if it is more likely than not (greater than 50%) that the tax position will be sustained upon tax examination, based solely on the technical merits of the tax position. Otherwise, no benefit can be recognized. The tax benefits recognized are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. Additionally, the company accrues interest and related penalties, if applicable, on all tax exposures for which reserves have been established consistent with jurisdictional tax laws. Interest and penalties are classified as income tax expense in the financial statements.

See Note 7 for additional information relating to income taxes.

Retirement Benefits – Most Linde employees participate in a form of defined benefit or contribution retirement plan, and additionally certain employees are eligible to participate in various post-employment health care and life insurance benefit plans. The cost of contribution plans is recognized in the year earned while the cost of other plans is recognized over the employees' expected service period to the company, all in accordance with the applicable accounting standards. The funded status of the plans is recorded as an asset or liability in the consolidated statement of financial position. Funding of retirement benefits varies and is in accordance with local laws and practices.

See Note 16 for additional information relating to retirement programs.

Share-based Compensation– The company has historically granted share-based awards which consist of stock options, restricted stock and performance-based stock. Share-based compensation expense is generally recognized on a straight-line basis over the stated vesting period. For stock awards granted to full-retirement-eligible employees, compensation expense is recognized over the period

from the grant date to the date retirement eligibility is achieved. For performance-based awards, compensation expense is recognized only if it is probable that the performance condition will be achieved.

See Note 21 for additional disclosures relating to share-based compensation.

Reclassifications – Certain prior years' amounts have been reclassified to conform to the current year's presentation.

Recently Issued Accounting Standards

Accounting Standards Implemented in 2025

Improvements to Income Tax Disclosures - In December 2023, the FASB issued guidance requiring enhanced disclosure related to income taxes. The standard requires additional or modified disclosures related to the income tax rate reconciliation, disaggregation of income taxes paid, and several other disclosures. The new standard is effective for fiscal years beginning after 15 December 2024, with early adoption permitted. The adoption of this standard impacted disclosures within the company's consolidated financial statements. Linde has adopted this guidance retrospectively for fiscal year 2025. (See Note 7).

Accounting Standards to be Implemented

Disaggregation of Income Statement Expenses - In November 2024, the FASB issued guidance requiring disaggregated disclosure of income statement expenses. The new standard is effective for fiscal years beginning after 15 December 2026, and interim periods with fiscal years after 15 December 2027, with early adoption permitted. The standard can be applied either prospectively after the effective date or retrospectively to any or all periods presented. The adoption of this standard will only impact disclosures within the company's consolidated financial statements and the company is evaluating the impact this guidance will have on those disclosures.

Targeted Improvements to the Accounting for Internal-Use Software - In September 2025, the FASB issued guidance that amends the existing standard for internal-use software by removing the software development project stage model and introducing a recognition and capitalization framework to reflect current software development practices. The new standard is effective for fiscal years beginning after 15 December 2027, and interim periods within those annual reporting periods, with early adoption permitted. The standard can be applied prospectively, retrospectively, or via a modified prospective transition method. The adoption of this standard is not expected to have a material impact on the financial statements.

[3] Acquisitions and Divestitures

Acquisitions

The fair value of purchase consideration for acquisitions, net of cash acquired was $412 million and $317 million for the years ended December 31, 2025 and 2024, respectively. Acquisitions in 2025 primarily related to APAC and EMEA. Acquisitions in 2024 primarily related to the Americas.

Divestitures

Divestitures, net of cash divested and asset sales were $42 million and $170 million for the years ended December 31, 2025 and 2024, respectively. Divestiture proceeds in 2024 include $69 million in net proceeds for a divestiture in APAC and a settlement with a supplier in the Americas.

[4] Revenue Recognition

Revenue is accounted for in accordance with ASC 606. Revenue is recognized as control of goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled to receive in exchange for the goods or services.

Contracts with Customers

Linde serves a diverse group of industries including healthcare, chemicals and energy, manufacturing, metals and mining, food and beverage, and electronics.

Industrial Gases

Within each of the company's geographic segments for industrial gases, there are three basic distribution methods: (i) on-site or tonnage; (ii) merchant or bulk liquid; and (iii) packaged or cylinder gases. The distribution method used by Linde to supply a customer is determined by many factors, including the customer's volume requirements and location. The distribution method generally determines the contract terms with the customer and, accordingly, the revenue recognition accounting practices. Linde's primary products in its industrial gases business are atmospheric gases (oxygen, nitrogen, argon, rare gases) and process gases (hydrogen, helium, carbon dioxide, carbon monoxide, electronic gases, specialty gases, acetylene). These products are generally sold through one of the three distribution methods.

Following is a description of each of the three industrial gases distribution methods and the respective revenue recognition policies:

On-site. Customers that require the largest volumes of product and that have a relatively constant demand pattern are supplied by cryogenic and process gas on-site plants. Linde constructs plants on or adjacent to these customers' sites and supplies the product directly to customers by pipeline. Where there are large concentrations of customers, a single pipeline may be connected to several plants and customers. On-site product supply contracts generally are total requirement contracts with terms typically ranging from 10-20 years and contain minimum purchase requirements and price escalation provisions. Many of the cryogenic on-site plants also produce liquid products for the merchant market. Therefore, plants are typically not dedicated to a single customer. Additionally, Linde is responsible for the design, construction, operations and maintenance of the plants and our customers typically have no involvement in these activities. Advanced air separation processes also allow on-site delivery to customers with smaller volume requirements.

The company's performance obligations related to on-site customers are satisfied over time as customers receive and obtain control of the product. Linde has elected to apply the practical expedient for measuring progress towards the completion of a performance obligation and recognizes revenue as the company has the right to invoice each customer, which generally corresponds with product delivery. Accordingly, revenue is recognized when product is delivered to the customer and the company has the right to invoice the customer in accordance with the contract terms. Consideration in these contracts is generally based on pricing which fluctuates with various price indices. Variable components of consideration exist within on-site contracts but are considered constrained.

Merchant. Merchant deliveries generally are made from Linde's plants by tanker trucks to storage containers at the customer's site. Due to the relatively high distribution cost, merchant oxygen and nitrogen generally have a relatively small distribution radius from the plants at which they are produced. Merchant argon, hydrogen and helium can be shipped much longer distances. The customer agreements used in the merchant business are usually three to seven year supply agreements based on the requirements of the customer. These contracts generally do not contain minimum purchase requirements or volume commitments.

The company's performance obligations related to merchant customers are generally satisfied at a point in time as the customers receive and obtain control of the product. Revenue is recognized when product is delivered to the customer and the company has the right to invoice the customer in accordance with the contract terms.

Packaged Gases. Customers requiring small volumes are supplied products in containers called cylinders, under medium to high pressure. Linde distributes merchant gases from its production plants to company-owned cylinder filling plants where cylinders are then filled for distribution to customers. Cylinders may be delivered to the customer's site or picked up by the customer at a packaging facility or retail store. Linde invoices the customer for the industrial gases and the use of the cylinder container(s). The company also sells hardgoods and welding equipment purchased from independent manufacturers. Packaged gases are generally sold under one to three-year supply contracts and purchase orders and do not contain minimum purchase requirements or volume commitments.

The company's performance obligations related to packaged gases are satisfied at a point in time. Accordingly, revenue is recognized when product is delivered to the customer or when the customer picks up product from a packaged gas facility or retail store, and the company has the right to payment from the customer in accordance with the contract terms.

Engineering

The company designs and manufactures equipment for air separation and other industrial gas applications manufactured specifically for end customers. Sale of equipment contracts are generally comprised of a single performance obligation. Revenue from sale of equipment is generally recognized over time as Linde has an enforceable right to payment for performance completed to date and performance does not create an asset with alternative use. For contracts recognized over time, revenue is recognized primarily using a cost incurred input method. Costs incurred to date relative to total estimated costs at completion are used to measure progress toward satisfying performance obligations. The result is applied to total expected revenue and results in financial statement recognition of revenue in addition to costs incurred to date. Any expected loss on a contract is recognized as an expense immediately. Costs incurred include material, labor, and overhead costs and represent work contributing and proportionate to the transfer of control to the customer. Changes to cost estimates and contract modifications are typically accounted for as part of the existing contract and are recognized as cumulative adjustments for the inception-to-date effect of such change. We assess performance as progress towards completion is achieved on specific projects, earnings will be impacted by changes to our forecast of revenues and costs on these projects.

The cost incurred input method places considerable importance on accurate estimates of the extent of progress towards completion and may involve estimates on the scope of deliveries and services required to fulfill the contractually defined obligations. The key source of estimation uncertainty is the total estimated costs at completion including material, labor and overhead costs and the resultant state of completion of the contracts. There are inherent uncertainties associated with the estimation process, including technical complexity, duration of construction cycle, potential cost inflation (whether equipment or manpower), and scope considerations all of which may affect the total estimation process. Changes in these estimates may lead to a significant impact on future financial statements.

Contract Assets and Liabilities

Contract assets and liabilities result from differences in timing of revenue recognition and customer invoicing. Contract assets primarily relate to sale of equipment contracts for which revenue is recognized over time. The balance represents unbilled revenue which occurs when revenue recognized under the measure of progress exceeds amounts invoiced to customers. Customer invoices may be based on the passage of time, the achievement of certain contractual milestones or a combination of both criteria. Contract liabilities include advance payments or right to consideration prior to performance under the contract. Contract liabilities are recognized as revenue as performance obligations are satisfied under contract terms. Linde has contract assets of $336 million at December 31 2025 (current contract assets of $269 million and $67 million within other non-current assets in the consolidated statement of financial position). Total contract assets were $263 million at December 31 2024, all classified as current contract assets in the consolidated statement of financial position. Total contract liabilities are $2,515 million at December 31 2025 (current contract liabilities of $1,231 million and $1,284 million within other non-current liabilities in the consolidated statement of financial position). Total contract liabilities were $2,292 million at December 31 2024 (current contract liabilities of $1,194 million and $1,098 million within other non-current liabilities in the consolidated statement of financial position). Revenue recognized for the twelve months ended December 31 2025 that was included in the contract liability at December 31 2024 was $732 million. Contract assets and liabilities primarily relate to the Engineering business and customer prepayments for certain on-site supply agreements

Payment Terms and Other

Linde generally receives payment after performance obligations are satisfied, and customer prepayments are not typical for the industrial gases business. Payment terms vary based on the country where sales originate and local customary payment practices. Linde does not typically offer extended financing outside of customary payment terms. Amounts billed for sales and use taxes, value-added taxes, and certain excise and other specific transactional taxes imposed on revenue producing transactions are presented on a net basis and are not included in sales within the consolidated statement of profit and loss. Additionally, sales returns and allowances are not a normal practice in the industry and are not significant.

Disaggregated Revenue Information

As described above and in Note 24, the company manages its industrial gases business on a geographic basis, while the Engineering and Other businesses are generally managed on a global basis. Furthermore, the company believes that reporting sales by distribution

method by reportable geographic segment best illustrates the nature, timing, type of customer, and contract terms for its revenues, including terms and pricing.

The following tables show sales by distribution method at the consolidated level and for each reportable segment and Other for the years ended December 31 2025 and 2024:

(Millions of dollars)	Year Ended December 31 2025						
Sales	**Americas**	**EMEA**	**APAC**	**Engineering**	**Other**	**Total**	**%**
Merchant	$ 4,892	$ 2,860	$ 2,213	$ —	$ 194	$ 10,159	30 %
On-Site	3,609	1,685	2,789	—	—	8,083	24 %
Packaged Gas	6,460	3,970	1,398	—	25	11,853	35 %
Other	247	34	261	2,250	1,099	3,891	11 %
	$ 15,208	$ 8,549	$ 6,661	$ 2,250	$ 1,318	$ 33,986	100 %

(Millions of dollars)	Year Ended December 31 2024						
Sales	**Americas**	**EMEA**	**APAC**	**Engineering**	**Other**	**Total**	**%**
Merchant	$ 4,572	$ 2,765	$ 2,233	$ —	$ 208	$ 9,778	30 %
On-Site	3,239	1,722	2,695	—	—	7,656	23 %
Packaged Gas	6,414	3,805	1,376	—	28	11,623	35 %
Other	217	60	328	2,322	1,021	3,948	12 %
	$ 14,442	$ 8,352	$ 6,632	$ 2,322	$ 1,257	$ 33,005	100 %

Remaining Performance Obligations

As described above, Linde's contracts with on-site customers are under long-term supply arrangements which generally require the customer to purchase their requirements from Linde and also have minimum purchase requirements. Additionally, plant sales from the Linde Engineering business are primarily contracted on a fixed price basis. As of December 31 2025, the company estimates the consideration related to future minimum purchase requirements and plant sales was approximately $62 billion. This amount excludes all on-site sales above minimum purchase requirements, which can be significant depending on customer needs. In the future, actual amounts will be different due to impacts from several factors, many of which are beyond the company’s control including, but not limited to, timing of newly signed, terminated and renewed contracts, inflationary price escalations, currency exchange rates, and pass-through costs related to natural gas and electricity. The actual duration of long-term supply contracts ranges up to thirty years. The company estimates that approximately half of the revenue related to minimum purchase requirements will be earned in the next six years and the remaining thereafter.

[5] Other operating income and expenses

Other Operating Income

(Millions of dollars)	**2025**	**2024**
Exchange gains including hedges	$ 508	$ 133
Profit on disposal of non-current assets	42	78
Partnership income	2	3
Insurance Recoveries	2	45
Miscellaneous operating income	169	186
TOTAL	**$ 723**	**$ 445**

Other Operating Expense

(Millions of dollars)	2025	2024
Exchange losses including hedges	$ 521	$ 143
Loss on disposal of non-current assets	8	1
Purchase accounting impacts - Linde AG merger	164	17
Miscellaneous operating expenses	88	99
TOTAL	**$ 781**	**$ 260**

Cost reduction program and other charges

2025 Cost reduction program and other charges

Cost reduction program and other charges were $273 million for the year ended December 31, 2025. Costs include global severance charges of $308 million, largely related to Engineering, and other benefits of $35 million largely related to a divestiture. Cost reduction program and other charges for 2025 included an income tax benefit of $81 million.

2024 Cost reduction program and other charges

Cost reduction program and other charges were $145 million for the year ended December 31, 2024. Costs include severance of $165 million, other cost reduction charges of $23 million, and a benefit of $43 million related to a divestiture in APAC. Cost reduction program and other charges for 2024 included an income tax benefit of $35 million.

[6] Interest income and expenses

Interest Income

(Millions of dollars)	2025	2024
Interest Income	**$ 209**	**$ 228**

Interest Expense

(Millions of dollars)	2025	2024
Interest incurred on debt including hedged transactions	575	555
Amortization on acquired debt	—	(3)
Capitalized interest	(111)	(68)
TOTAL	**$ 464**	**$ 484**

In interest income and expenses, gains and losses from fair value hedge accounting on debt instruments were offset against each other, in order to give a fair presentation of the economic effect of the underlying hedging relationship. Interest income and expenses relating to derivatives were also disclosed net.

[7] Income Tax Expense

Pre-tax income applicable to U.S. and non-U.S. operations is as follows:

(Millions of dollars) **Year Ended December 31,**	2025	2024
United States	$ 2,934	$ 2,717
Non-U.S.	5,963	5,852
Total income before income taxes	$ 8,897	$ 8,569

Provision for Income Taxes

The following is an analysis of the provision for income taxes:

(Millions of dollars) Year Ended December 31,	2025	2024
Current tax expense (benefit)		
U.S. federal	$ 475	$ 436
State and local	114	106
Non-U.S.	1,865	1,602
	2,454	2,144
Deferred tax expense (benefit)		
U.S. federal	46	3
State and local	(15)	11
Non-U.S.	(496)	(156)
	(465)	(142)
Total income taxes	$ 1,989	$ 2,002

Effective Tax Rate Reconciliation

Linde plc is not subject to tax in Ireland, its country of incorporation. For purposes of the effective tax rate reconciliation, the company utilizes the U.S. statutory income tax rate of 21%. An analysis of the difference between the provision for income taxes and the amount computed by applying the U.S. statutory income tax rate to pre-tax income follows:

(Dollar amounts in millions) Year Ended December 31,	2025		2024	
U.S. Federal statutory income tax	$ 1,868	21.0 %	$ 1,800	21.0 %
State and local income taxes, net of Federal income tax effect (a)	88	1.0 %	102	1.2 %
Foreign tax effects				
Germany				
Changes in tax laws or rates	(158)	(1.8)%	—	— %
Other	60	0.7 %	49	0.6 %
Other foreign jurisdictions	201	2.2 %	172	2.0 %
Share-based compensation	(60)	(0.7)%	(63)	(0.7)%
Tax credits	(42)	(0.5)%	(45)	(0.5)%
Changes in unrecognized tax benefits	10	0.2 %	2	— %
Other adjustments	22	0.3 %	(15)	(0.2)%
Provision for income taxes	$ 1,989	22.4 %	$ 2,002	23.4 %

(a) In 2025 and 2024, state taxes in California, Illinois, Indiana, New Jersey, Michigan, Pennsylvania, Texas, Florida, Minnesota, and Oregon made up the majority (greater than 50 percent) of the tax effect in this category.

Income Taxes Paid

Income taxes paid by federal, state/local, and foreign:

(Millions of dollars) Year Ended December 31,	2025	2024
U.S. Federal	$ 544	$ 503
State and local	100	106
Non-U.S.	1,630	1,607
Total	$ 2,274	$ 2,216

Income taxes paid by jurisdiction:

(Millions of dollars) Year Ended December 31,	2025	2024
United States	$ 644	$ 609
Germany	82	224
China	199	201
Mexico	237	158
Others	1,112	1,024
Total	$ 2,274	$ 2,216

Net Deferred Tax Liabilities

Net deferred tax liabilities included in the consolidated statement of financial position are comprised of the following:

(Millions of dollars) December 31,	2025	2024
Deferred tax liabilities		
Fixed assets	$ 2,462	$ 2,378
Goodwill	263	233
Other intangible assets	2,672	2,638
Subsidiary/equity investments	492	535
Benefit plans and related (b)	40	—
Other (a)	488	736
	$ 6,417	$ 6,520
Deferred tax assets		
Carryforwards	$ 380	$ 505
Benefit plans and related (b)(c)	—	16
Inventory	87	87
Accruals and other (d)	968	827
	$ 1,435	$ 1,435
Less: Valuation allowances (e)	(151)	(146)
	$ 1,284	$ 1,289
Net deferred tax liabilities	$ 5,133	$ 5,231
Recorded in the consolidated statement of financial position as:		
Other non-current assets	423	428
Deferred credits	5,556	5,659
	$ 5,133	$ 5,231

(a) Includes $236 million in 2025 and $235 million in 2024 related to right-of-use lease assets and includes $82 million in 2025 and $335 million in 2024 related to timing differences regarding certain engineering projects accounted for on the cost incurred input method.

(b) Includes deferred tax liabilities of $102 million and $95 million in 2025 and 2024, respectively, related to pension / OPEB funded status (see Note 15 and 16).

(c) The amounts are net of deferred tax assets of $137 million in 2025 and deferred tax liabilities of $290 million in 2024.

(d) Includes $244 million in 2025 and $244 million in 2024 related to lease liabilities.

(e) Summary of changes in valuation allowances relating to deferred tax assets follows (millions of dollars):

	2025	2024
Balance, January 1,	$ (146)	$ (176)
Income tax (charge) benefit	1	26
Other, including write-offs	—	—
Translation adjustments	(6)	4
Balance, December 31,	$ (151)	$ (146)

The company evaluates deferred tax assets quarterly to ensure that estimated future taxable income will be sufficient in character (e.g., capital gain versus ordinary income treatment), amount and timing to result in their recovery. After considering the positive and negative evidence, a valuation allowance is established to reduce the assets to their realizable value when management determines that it is more likely than not (i.e., greater than 50% likelihood) that a deferred tax asset will not be realized. Considerable judgment is required in establishing deferred tax valuation allowances.

As of December 31, 2025, the company had $380 million of deferred tax assets relating to net operating losses ("NOLs") and tax credits and $151 million of valuation allowances. These deferred tax assets include $338 million relating to NOLs, of which $46 million expire within 5 years, $20 million expire after 5 years, and $272 million have no expiration. The deferred tax assets also include $42 million related to credits of which $2 million expire within 5 years, $36 million expire after 5 years, and $4 million have no expiration. The valuation allowances of $151 million primarily relate to NOLs. Management has determined, based on financial projections and available tax strategies, that it is unlikely that the benefit of these losses will be realized. If events or circumstances change, valuation allowances are adjusted at that time resulting in an income tax benefit or charge.

The company has $492 million of non-U.S. income and withholding taxes accrued related to its investment in non-U.S. subsidiaries and equity investments. A provision has not been made for any additional non-U.S. income or withholding taxes at December 31, 2025 on unremitted non-U.S. earnings on which the company intends to remain indefinitely reinvested or on other outside basis differences in its investments unrelated to unremitted earnings. A determination of deferred taxes related to these items is not practicable.

Uncertain Tax Positions

Unrecognized income tax benefits represent income tax positions taken on income tax returns but not yet recognized in the consolidated financial statements. The company has unrecognized income tax benefits totaling $315 million and $292 million as of December 31, 2025 and 2024, respectively. If recognized, the majority of the unrecognized tax benefits and related interest and penalties would be recorded as a benefit to income tax expense on the consolidated statement of profit and loss.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(Millions of dollars)	2025	2024
Unrecognized income tax benefits, January 1	$ 292	$ 304
Additions for tax positions of prior years	9	19
Reductions for tax positions of prior years	(2)	(9)
Additions for current year tax positions	22	11
Reductions for settlements with taxing authorities	(4)	(12)
Other (a)	(2)	(21)
Unrecognized income tax benefits, December 31	$ 315	$ 292

(a) Other includes reductions for statute of limitation lapses and foreign currency translation.

The company classifies interest income and expense related to income taxes as tax expense in the consolidated statements of profit and loss. For the years ended December 31, 2025 and 2024 the company recognized net interest expense of $3 million. The company had $19 million and $16 million of accrued interest and penalties as of December 31, 2025 and 2024, respectively, which were recorded in other non-current liabilities in the consolidated statement of financial position (See Note 20).

As of December 31, 2025, the company remained subject to examination in the following major tax jurisdictions for the tax years as indicated below:

Major tax jurisdictions	Open Years
Americas	
United States	2022 through 2025
Canada	2014 through 2025
Mexico	2014 through 2025
Brazil	2008 through 2025
EMEA	
Germany	2018 through 2025
United Kingdom	2022 through 2025
APAC	
Australia	2021 through 2025
China	2020 through 2025
India	2007 through 2025
South Korea	2020 through 2025

[8] Earnings per share

Basic and Diluted earnings per share - Linde plc shareholders is computed by dividing profit for the year – Linde plc by the weighted average number of either basic or diluted shares outstanding, as follows:

	2025	2024
Numerator (Millions of dollars)		
Profit for the year – Linde plc	$ 6,898	$ 6,565
Denominator (Thousands of shares)		
Weighted average shares outstanding	468,673	477,998
Shares earned and issuable under compensation plans	815	775
Weighted average shares used in basic earnings per share	469,488	478,773
Effect of dilutive securities		
Stock options and awards	2,707	3,319
Weighted average shares used in diluted earnings per share	472,195	482,092
Basic Earnings Per Share	$ 14.69	$ 13.71
Diluted Earnings Per Share	$ 14.61	$ 13.62

The weighted-average of antidilutive securities excluded from the calculation of diluted earnings per share were 572 thousand and 268 thousand for the twelve months ended December 31, 2025 and 2024, respectively.

[9] Goodwill

Changes in the carrying amount of goodwill for the years ended December 31, 2025 and 2024 were as follows:

(Millions of dollars)	Americas	EMEA	APAC	Engineering	Other	Total
Balance, December 31 2023	$ 9,703	$ 9,834	$ 4,499	$ 2,422	$ 293	$ 26,751
Acquisitions (Note 3)	191	—	17	—	—	208
Foreign currency translation and other	(56)	(538)	(253)	(150)	(21)	(1,018)
Disposals	—	—	(4)	—	—	(4)
Balance, December 31 2024	9,838	9,296	4,259	2,272	272	25,937
Acquisitions (Note 3)	31	120	99	—	2	252
Foreign currency translation and other	41	1,137	243	306	11	1,738
Disposals	—	—	—	—	—	—
Balance, December 31 2025	$ 9,910	$ 10,553	$ 4,601	$ 2,578	$ 285	$ 27,927

Linde performs its goodwill impairment tests annually as of October 1 or more frequently if events or circumstances indicate that an impairment loss may have been incurred. For the fourth quarter 2025 test, the company applied the FASB's accounting guidance which allows the company to first assess qualitative factors to determine the extent of additional quantitative analysis, if any, that may be required to test goodwill for impairment. Based on the qualitative assessments performed, the company concluded that it was more likely than not that the fair value of each reporting unit substantially exceeded its carrying value and therefore, further quantitative analysis was not required. As a result, no impairment was recorded. There were no indicators of impairment since the annual goodwill impairment test was performed through December 31, 2025.

[10] Other Intangible Assets

The following is a summary of Linde's other intangible assets at December 31, 2025 and 2024:

(Millions of dollars) For the year ended December 31, 2025	Customer Relationships	Brands/ Tradenames	Other Intangible Assets	Total
Cost:				
Balance, January 01, 2025	$ 10,972	$ 2,504	$ 1,934	$ 15,410

Balance, December 31, 2024	(2,571)	(265)	(1,244)	(4,080)
Net balance at December 31, 2024	$ 8,401	$ 2,239	$ 690	$ 11,330

*Other primarily relates to the write-off of fully amortized assets and reclassifications.

There are no expected residual values related to these intangible assets. Amortization expense for the years ended December 31, 2025 and 2024 was $517 million and $554 million, respectively. The remaining weighted-average amortization period for intangible assets is approximately 21 years.

Total estimated annual amortization expense related to finite-lived intangibles is as follows:

(Millions of dollars)	
2026	$ 615
2027	598
2028	580
2029	575
2030	574
Thereafter	7,103
Total amortization related to finite-lived intangible assets	10,045
Indefinite-lived intangible assets at December 31, 2025	1,826
Net intangible assets at December 31, 2025	$ 11,871

[11] Property, plant and equipment

Schedule of Property, plant and equipment - Acquisition Cost

(Millions of dollars)	Production plants (primarily 15-year life)	Storage tanks	Transportation equipment and other	Cylinders (primarily 30-year life)	Buildings	Land and improvements	Construction in progress	Total

Reclassifications	—	—	—	—	—	—	—	—
Currency and other adjustments	2,349	155	336	311	222	1	—	3,374
Ended December 31, 2025	**26,344**	**4,455**	**3,572**	**3,134**	**2,102**	**212**	**—**	**39,819**
NET CARRYING AMOUNT AT 12/31/2024	**13,126**	**1,616**	**1,129**	**2,349**	**1,624**	**845**	**4,086**	**24,775**
NET CARRYING AMOUNT AT 12/31/2025	**$ 13,957**	**$ 1,760**	**$ 1,300**	**$ 2,408**	**$ 1,729**	**$ 976**	**$ 6,130**	**$ 28,260**

The following useful lives apply to the different types of property, plant and equipment for the years ended December 31, 2025 and 2024:

December 31,	**Depreciable Lives (Yrs)**
Production plants (primarily 15-year life) (a)	10-20
Storage tanks	15-20
Transportation equipment and other	3-15
Cylinders	10-30
Buildings	25-40
Land and improvements (b)	0-20
Construction in progress	

(a) Depreciable lives of production plants related to long-term customer supply contracts are generally consistent with the contract lives.

(b) Land is not depreciated.

[12] Investments in associates and joint ventures/other financial assets

Schedule of Financial Assets - Acquisition Cost

(Millions of dollars)	Investments in associates and joint ventures (at equity)	Other financial assets
Year beginning January 1, 2024	**$ 2,190**	**$ 352**
Currency adjustments	(75)	(4)
Share of profit (loss) from associates and joint ventures	170	—
Additions	9	15
Reductions (a)	(164)	(104)
Transfers (b)	—	(104)
Year Ended December 31, 2024	**$ 2,130**	**$ 155**
Currency adjustments	105	10
Share of profit (loss) from associates and joint ventures	150	—
Additions	11	10
Reductions (a)	(381)	(7)
Transfers	—	(2)
Year Ended December 31, 2025	**$ 2,015**	**$ 166**

(a) For investments in associates and joint ventures (at equity), relates primarily to distributions/dividends received from associates and joint ventures, as well as step acquisitions completed in 2025. In 2024, the amount reflected in reductions for other financial assets primarily represents adjustments to the remaining investment value of Russian subsidiaries (see Note 28).

(b) The year beginning January 1, 2024 includes long-term notes receivable from the sale of GIST. These balances were included within Other current assets on the Statement of Financial Position at December 31, 2024 and collected in 2025.

[13] Inventories

(Millions of dollars) December 31,	**2025**	**2024**
Inventories		
Raw materials and supplies	$ 530	$ 529
Work in process	346	371
Finished goods	1,179	1,046
	$ 2,055	$ 1,946

[14] Accounts receivable and other assets

(Millions of dollars) December 31,	**2025**	**2024**
Accounts Receivable		
Trade and Other receivables	$ 5,547	$ 5,043
Less: allowance for expected credit losses	(581)	(421)
	$ 4,966	$ 4,622

Receivables

Linde applies loss rates that are lifetime expected credit losses at initial recognition of the receivables. These expected loss rates are based on an analysis of the actual historical default rates for each business, taking regional circumstances into account. If necessary, these historical default rates are adjusted to reflect the impact of current changes in the macroeconomic environment using forward-looking information. The loss rates are also evaluated based on the expectations of the responsible management team regarding the collectability of the receivables. Gross trade receivables aged less than one year were $5,032 million and $4,573 million at December 31, 2025 and 2024, respectively, and gross receivables aged greater than one year were $377 million and $322 million at December

31, 2025 and 2024, respectively. Gross other receivables were $138 million and $148 million at December 31, 2025 and 2024, respectively. Receivables aged greater than one year are generally fully reserved unless specific circumstances warrant exceptions, such as those backed by federal governments.

Provisions for expected credit losses were $207 million and $180 million for the twelve months ended December 31, 2025 and 2024, respectively. Allowance for expected credit losses increased to $581 million including an adjustment of $150 million to the allowance for homecare receivables, recorded through Other operating (income) expense - net. The allowance activity in the twelve months ended December 31, 2025 related to write-offs of uncollectible amounts, net of recoveries and currency movements is not material.

(Millions of dollars) December 31,	2025	2024
Other Current Assets		
Prepaid and other deferred charges (a)	$ 546	$ 579
VAT recoverable	229	177
Unrealized gains on derivatives (Note 22)	107	302
Other (b)	97	206
	$ 979	$ 1,264

(a) Includes estimated income tax payments of $106 million in 2025 and $221 million in 2024.

(b) In 2024, the balance relates primarily to current notes receivable from the sale of GIST, which were collected in 2025.

(Millions of dollars) December 31,	2025	2024
Other Non-current Assets		
Pension assets (Note 16)	$ 1,298	$ 1,106
Insurance contracts (a)	32	32
Lease assets (Note 19)	1,079	989
Deposits	62	73
Deferred charges	63	58
Deferred income taxes (Note 7)	423	428
Unrealized gains on derivatives (Note 22)	10	4
Contract assets (Note 4)	67	—
Other	219	185
	$ 3,253	$ 2,875

(a) Consists primarily of insurance contracts and other investments to be utilized for non-qualified pension and OPEB obligations.

[15] Called up share capital (and reserves)

Linde plc Shareholders' Equity

At December 31, 2025 and 2024, Linde has total authorized share capital of €1,825,000 divided into 1,750,000,000 ordinary shares of €0.001 each, 25,000 A ordinary shares of €1.00 each, 25,000 deferred shares of €1.00 each and 25,000,000 preferred shares of €0.001 each.

At December 31, 2025 there were 490,766,972 and 463,680,942 of Linde plc ordinary shares issued and outstanding, respectively. At December 31, 2025 there were no shares of A ordinary shares, deferred shares or preferred shares issued or outstanding.

At December 31, 2024 there were 490,766,972 and 473,236,732 of Linde plc ordinary shares issued and outstanding, respectively. At December 31, 2024, there were no shares of A ordinary shares, deferred shares or preferred shares issued or outstanding.

Linde's Board of Directors may from time to time authorize the issuance of one or more series of preferred stock and, in connection with the creation of such series, determine the characteristics of each such series including, without limitation, the preference and relative, participating, optional or other special rights, and the qualifications, limitations or restrictions of the series.

Other Linde plc Ordinary Share and Treasury Share Transactions

Linde may issue new ordinary shares for dividend reinvestment and stock purchase plans and employee savings and incentive plans. No new ordinary shares were issued in 2025 and 2024.

On February 28, 2022, the company's board of directors authorized a new share repurchase program for up to $10.0 billion of its ordinary shares ("2022 program") under which Linde had repurchased 29,552,394 shares through December 31, 2024. Linde completed the repurchases under this program in the second quarter of 2024.

On October 23, 2023, the company's board of directors approved a new share repurchase program for up to $15.0 billion of its ordinary shares ("2023 program") under which Linde has repurchased 17,197,962 shares through December 31, 2025. This program will terminate on the earlier of the date as the maximum authority under the 2023 program is reached or the board terminates the 2023 program.

Redeemable Noncontrolling Interests

Noncontrolling interests with redemption features, such as put/sell options, that are not solely within the company's control ("redeemable noncontrolling interests") are reported separately in the consolidated statements of financial position at the greater of carrying value or redemption value. For redeemable noncontrolling interests that are not yet exercisable, Linde calculates the redemption value by accreting the carrying value to the redemption value over the period until exercisable. If the redemption value is greater than the carrying value, any increase is adjusted directly to retained earnings and does not impact net income. At December 31, 2025 and 2024, the redeemable noncontrolling interest balance includes an industrial gas business in EMEA where the noncontrolling shareholders have put options.

The components of other reserves are as follows:

(Millions of dollars) December 31,	2025	2024
Other reserves		
Cumulative translation adjustment - net of taxes:		
Americas (a)	$ (3,892)	$ (4,422)
EMEA (a)	(958)	(1,235)
APAC (a)	(1,170)	(1,736)
Engineering	283	(432)
Other	(616)	858
	(6,353)	(6,967)
Derivatives – net of taxes	16	(6)
Pension/OPEB funded status obligation (net of $102 million tax obligation in 2025 and $95 million tax obligation in 2024) (Note 16)	104	79
	$ (6,233)	$ (6,894)

(a) Americas consists of currency translation adjustments primarily in Canada, Mexico, Brazil, and Argentina. EMEA relates primarily to Germany, the U.K., the Netherlands, Norway and Switzerland. APAC relates primarily to South Korea, India and Australia.

[16] Provisions for pensions and similar obligations

Defined Benefit Pension Plans - U.S.

The Linde retirement plans are non-contributory defined benefit plans covering eligible employees and its participating affiliates. Effective July 1, 2002, the Linde U.S. Pension Plan was amended to give participating employees a one-time irrevocable choice between a traditional benefit (the "Traditional Design") and an account-based benefit (the "Account-Based Design"). The Traditional Design pays a monthly benefit based on years of service and average pay during the last years of the participant's career with Linde. The Account-Based Design gives participants annual pay credits equal to 4% of eligible compensation, plus interest credits based on long-term treasury rates on the accumulated account balance. This new formula applies to all new employees hired after April 30, 2002 into businesses adopting this plan. The U.S. pension plan assets are comprised of a diversified mix of investments, including corporate equities, government securities and corporate debt securities. Linde has several plans that provide supplementary retirement benefits primarily to higher level employees that are unfunded and are nonqualified for federal tax purposes. Pension coverage for employees of certain of Linde's non-U.S. subsidiaries generally is provided by those companies through separate plans. Obligations under such plans are primarily provided for through diversified investment portfolios, with some smaller plans provided for under insurance policies or by book reserves.

Defined Benefit Pension Plans - Non-U.S.

Linde has Non-U.S., defined benefit commitments primarily in Germany and the U.K that include pension plan assets comprised of a diversified mix of investments. The defined benefit commitments in Germany relate to old age pensions, invalidity pensions and surviving dependents pensions. These commitments also take into account vested rights for periods of service prior to January 1, 2002 based on earlier final-salary pension plan rules. In addition, there are direct commitments in respect of the salary conversion scheme for the form of cash balance plans. The resulting pension payments are calculated on the basis of an interest guarantee and the performance of the corresponding investment. There are no minimum funding requirements. The pension obligations in Germany are partly funded by a Contractual Trust Agreement (CTA). Defined benefit commitments in the U.K. prior to July 1, 2003 are earnings-related and dependent on the period of service. Such commitments relate to old age pensions, invalidity pensions and surviving dependents pensions. Beginning in April 1, 2011, the amount of future increases in inflation-linked pensions and of increases in pensionable emoluments was restricted.

Multi-employer Pension Plans

In the United States Linde participates in eight multi-employer defined benefit pension plans ("MEPs"), pursuant to the terms of collective bargaining agreements, that cover approximately 200 union-represented employees. The collective bargaining agreements expire on different dates through 2030. In connection with such agreements, the company is required to make periodic contributions to the MEPs in accordance with the terms of the respective collective bargaining agreements. Linde's participation in these plans is not material either at the plan level or in the aggregate. For all MEPs, Linde's contributions were less than 1% of the total contributions to each plan for 2025 and 2024.

Linde has obtained the most recently available Pension Protection Act ("PPA") annual funding notices from the Trustees of the MEPs. As of December 31, 2025, there were four Red Zone plans, deemed to be in "critical" or "critical and declining" status that have implemented financial improvement or rehabilitation plans. Linde does not currently anticipate significant future obligations due to the funding status of these plans and any such obligation would be immaterial. If Linde determined it was probable that it would withdraw from an MEP, the company would record a liability for its portion of the MEP's unfunded pension obligations, as calculated at that time. Historically, such withdrawal payments have not been significant.

Defined Contribution Plans

Linde's U.S. employees are eligible to participate in defined contribution savings plans offered by their applicable business. Employee contribution percentages vary by plan and are subject to the maximum allowable by IRS regulations. The cost for these defined contribution plans was $70 million in 2025 and $69 million in 2024 (these costs are not included in the tables that follow).

The defined contribution plans include a non-leveraged employee stock ownership plan ("ESOP") which covers all employees participating in this plan. The collective number of shares of Linde ordinary shares in the ESOP totaled 1,468,183 at December 31, 2025.

Certain non-U.S. subsidiaries of the company also sponsor defined contribution plans where contributions are determined under various formulas. The expense for these plans was $67 million in 2025 and $62 million in 2024 (these expenses are not included in the tables that follow).

Postretirement Benefits Other Than Pensions (OPEB)

Linde provides health care and life insurance benefits to certain eligible retired employees. These benefits are provided through various insurance companies and healthcare providers. The company does not currently fund its postretirement benefits obligations. Linde's retiree plans may be changed or terminated by Linde at any time for any reason with no liability to current or future retirees.

Linde uses a measurement date of December 31, for its pension and other post-retirement benefit plans.

Pension and Postretirement Benefit Costs

The components of net pension and postretirement benefits other than pension ("OPEB") costs for 2025 and 2024 are shown in the table below:

	Year Ended December 31,	
(Millions of dollars)	**2025**	**2024**
Amount recognized in Operating Profit		
Service cost	$ 82	$ 84
Amount recognized in Net pension and OPEB cost (benefit), excluding service cost		
Interest cost	356	362
Expected return on plan assets	(557)	(552)
Net amortization and deferral	(30)	(10)
Settlement charges (a)	2	10
	(229)	(190)
Net periodic benefit cost (benefit)	$ (147)	$ (106)

(a) Settlement charges were triggered by lump sum benefit payments.

Funded Status

Changes in the benefit obligation and plan assets for Linde's pension and OPEB programs, including reconciliation of the funded status of the plans to amounts recorded in the consolidated statement of financial position as of December 31, 2025 and 2024 are shown below.

	Year Ended December 31,			
	2025		2024	
(Millions of dollars)	U.S.	Non-U.S.	U.S.	Non-U.S.
Change in Benefit Obligation ("PBO")				
Benefit obligation, January 1,	$ 2,090	$ 5,486	$ 2,187	$ 6,385
Service cost	28	54	28	56
Interest cost	104	252	103	259
Participant contributions	8	17	11	18
Actuarial loss (gain)	79	9	(73)	(622)
Benefits paid	(160)	(347)	(155)	(348)
Plan settlement	(5)	(27)	(11)	(14)
Foreign currency translation and other changes	—	539	—	(248)
Benefit obligation, December 31,	$ 2,144	$ 5,983	$ 2,090	$ 5,486
Accumulated benefit obligation ("ABO")	$ 2,018	$ 5,891	$ 1,964	$ 5,405
Change in Plan Assets				
Fair value of plan assets, January 1,	$ 2,176	$ 5,950	$ 2,050	$ 6,178
Actual return on plan assets	283	387	267	271
Company contributions	—	25	—	35
Participant contributions	—	17	—	18
Benefits paid from plan assets	(146)	(333)	(141)	(321)
Foreign currency translation and other changes	—	552	—	(231)
Fair value of plan assets, December 31,	$ 2,313	$ 6,598	$ 2,176	$ 5,950
Funded Status, End of Year	$ 169	$ 615	$ 86	$ 464
Recorded in the statement of Financial Position				
Other non-current assets (Note 14)	$ 293	$ 1,005	$ 212	$ 894
Current provisions and similar obligations	(17)	(24)	(16)	(21)
Long-term pensions and similar obligations	(107)	(366)	(110)	(409)
Net amount recognized, December 31,	$ 169	$ 615	$ 86	$ 464
Amounts recognized in other reserves consist of:				
Net actuarial loss (gain)	$ 35	$ (233)	$ 91	$ (256)
Prior service cost (credit)	(8)	—	(9)	—
Deferred tax obligation (benefit) (Note 7)	(7)	109	(21)	116
Amount recognized in other reserves (Note 15)	$ 20	$ (124)	$ 61	$ (140)

Comparative funded status information as of December 31, 2025 and 2024 for select non-U.S. pension plans is presented in the table below as the benefit obligations of these plans are considered to be significant relative to the total benefit obligation:

(Millions of dollars)	United Kingdom 2025	Germany 2025	Other Non-U.S. 2025	Total Non-U.S. 2025
Benefit obligation, December 31,	$ 3,213	$ 1,690	$ 1,080	$ 5,983
Fair value of plan assets, December 31,	3,979	1,624	995	6,598
Funded Status, End of Year	$ 766	$ (66)	$ (85)	$ 615

(Millions of dollars)	United Kingdom 2024	Germany 2024	Other Non-U.S. 2024	Total Non-U.S. 2024
Benefit obligation, December 31,	$ 2,883	$ 1,594	$ 1,009	$ 5,486
Fair value of plan assets, December 31,	3,640	1,418	892	5,950
Funded Status, End of Year	$ 757	$ (176)	$ (117)	$ 464

The changes in plan assets and benefit obligations recognized in other comprehensive income in 2025 and 2024 are as follows:

	Pensions	
(Millions of dollars)	2025	2024
Current year net actuarial losses (gains)*	$ (25)	$ (681)
Amortization of net actuarial gains (losses)	29	9
Amortization of prior service credits (costs)	1	1
Pension settlements	(2)	(10)
Foreign currency translation and other changes	(35)	7
Total recognized in other comprehensive income	$ (32)	$ (674)

* In 2025, pension net actuarial gains were primarily driven by favorable plan asset experience, partially offset by losses from discount rate changes.

In 2024, the net actuarial gains arose due to rising discount rates across both regions which lowered PBO, supplemented by favorable plan asset experience for the U.S. plans.

The following table provides information only for those individual pension plans where the accumulated benefit obligation exceeds the fair value of plan assets:

	Pensions			
(Millions of dollars)	2025		2024	
Year Ended December 31,	U.S.	Non-U.S.	U.S.	Non-U.S.
Accumulated benefit obligation ("ABO")	$ 44	$ 678	$ 44	$ 1,746
Fair value of plan assets	$ —	$ 347	$ —	$ 1,384

The following table provides information only for those individual pension plans where the projected benefit obligation exceeds the fair value of plan assets:

(Millions of dollars) Year Ended December 31,	Pensions			
	2025		2024	
	U.S.	Non-U.S.	U.S.	Non-U.S.
Projected benefit obligation ("PBO")	$ 49	$ 711	$ 47	$ 1,796
Fair value of plan assets	$ —	$ 354	$ —	$ 1,391

Assumptions

The assumptions used to determine benefit obligations are as of the respective financial position dates and the assumptions used to determine net benefit cost are as of the previous year-end, as shown below:

	Pensions			
	U.S.		Non-U.S.	
	2025	2024	2025	2024
Weighted average assumptions used to determine benefit obligations at December 31,				
Discount rate	5.27 %	5.55 %	4.96 %	4.76 %
Interest crediting rate	4.74 %	4.68 %	1.32 %	1.11 %
Rate of increase in compensation levels	3.50 %	3.50 %	2.53 %	2.55 %
Weighted average assumptions used to determine net periodic benefit cost for years ended December 31,				
Discount rate	5.55 %	5.03 %	4.76 %	4.27 %
Interest crediting rate	4.68 %	4.03 %	1.11 %	1.70 %
Rate of increase in compensation levels	3.50 %	3.50 %	2.55 %	2.58 %
Expected long-term rate of return on plan assets (1)	7.00 %	7.00 %	6.01 %	6.02 %

(1) The expected long term rate of return on the U.S. and non-U.S. plan assets is estimated based on the plans' investment strategy and asset allocation, historical capital market performance and, to a lesser extent, historical plan performance.

For the U.S. plans, the expected rate of return of 7.00% was derived based on the target asset allocation of 50%-70% equity securities (approximately 7.00% expected return), 20%-50% fixed income securities (approximately 4.80% expected return) and 2%-8% alternative investments (approximately 6.00% expected return). For the main non-U.S. plans, the expected rate of return was derived based on the weighted average target asset allocation of 20%-40% equity securities (approximately 5.60% expected return), 30%-50% fixed income securities (approximately 5.00% expected return), and 5%-25% alternative investments (approximately 6.20% expected return).

For the U.S. plan assets, the actual annualized total return for the most recent 10-year period ended December 31, 2025 was approximately 8.60%. For the non-U.S. plan assets, the actual annualized total return for the same period was approximately 4.30%. Changes to plan asset allocations and investment strategy over this time period limit the value of historical plan performance as a factor in estimating the expected long term rate of return. For 2026, the expected long-term rate of return on plan assets will be 7.00% for the U.S. plans and 6.01% for non-U.S. plans.

Pension Plan Assets

The investments of the U.S. pension plan are managed to meet the future expected benefit liabilities of the plan over the long term by investing in diversified portfolios consistent with prudent diversification and historical and expected capital market returns. Investment strategies are reviewed by management and investment performance is tracked against appropriate benchmarks. There are no concentrations of risk as it relates to the assets within the plans. The non-U.S. pension plans are managed individually based on diversified investment portfolios, with different target asset allocations that vary for each plan. Weighted-average asset allocations at December 31, 2025 and 2024 for Linde’s U.S. and non-U.S. pension plans, as well as respective asset allocation ranges by major asset category, are generally as follows:

	U.S.				Non-U.S.			
Asset Category	**Target 2025**	**Target 2024**	**2025**	**2024**	**Target 2025**	**Target 2024**	**2025**	**2024**
Equity securities	50% - 70%	50% - 70%	66%	62%	20% - 40%	15% - 25%	32%	24%
Fixed income securities	20% - 50%	20% - 50%	29%	31%	30% - 50%	30% - 50%	35%	29%
Other	2% - 8%	2% - 8%	5%	7%	5% - 25%	30% - 50%	33%	47%

The following table summarizes pension assets measured at fair value by asset category at December 31, 2025 and 2024. Transfers of assets were not material for the year ended December 31, 2025 and 2024. See Note 23 for the definition of levels within the fair value hierarchy:

	Fair Value Measurements Using							
	Level 1		Level 2		Level 3 **		Total

Balance, December 31, 2025	$ 64	$ 337	$ 1,071	$ 1,472

The descriptions and fair value methodologies for the company's pension plan assets are as follows:

Cash and Cash Equivalents – This category includes cash and short-term interest bearing investments with maturities of three months or less. Investments are valued at cost plus accrued interest. Cash and cash equivalents are classified within level 1 of the valuation hierarchy.

Equity Securities – This category is comprised of shares of common stock in U.S. and non-U.S. companies from a diverse set of industries and size. Common stock is valued at the closing market price reported on a U.S. or non-U.S. exchange where the security is actively traded. Equity securities are classified within level 1 of the valuation hierarchy.

Mutual Funds – These categories consist of publicly and privately managed funds that invest primarily in marketable equity and fixed income securities. The fair value of these investments is determined by reference to the net asset value of the underlying securities of the fund. Shares of publicly traded mutual funds are valued at the net asset value quoted on the exchange where the fund is traded and are primarily classified as level 1 within the valuation hierarchy.

Emerging Market Debt - This category includes fixed income debt issued by countries with developing economies as well as by corporations within those nations. They typically have higher yields but lower credit ratings relative to developed country corporate and government bonds. The fair values for these investments are classified as level 2 within the valuation hierarchy.

U.S. and Non-U.S. Government Bonds – This category includes U.S. treasuries, U.S. federal agency obligations and non-U.S. government debt. The majority of these investments do not have quoted market prices available for a specific government security and so the fair value is determined using quoted prices of similar securities in active markets and is classified as level 2 within the valuation hierarchy.

Corporate Bonds – This category is comprised of corporate bonds of U.S. and non-U.S. companies from a diverse set of industries and size. The fair values for U.S. and non-U.S. corporate bonds are determined using quoted prices of similar securities in active markets and observable data or broker or dealer quotations. The fair values for these investments are classified as level 2 within the valuation hierarchy.

Pooled Funds - Pooled fund NAVs are provided by the trustee and are determined by reference to the fair value of the underlying securities of the trust, less its liabilities, which are valued primarily through the use of directly or indirectly observable inputs. Depending on the pooled fund, underlying securities may include marketable equity securities or fixed income securities.

Bank Loans - This category is comprised of traded syndicated loans of larger corporate borrowers. Such loans are issued by sub-investment grade rated companies both in the U.S. and internationally and are syndicated by investment banks to institutional investors. They are regularly traded in an active dealer market comprised of large investment banks, which supply bid and offer quotes and are therefore classified within level 2 of the valuation hierarchy.

Liquid Alternative Investments - This category is comprised of investments in alternative mutual funds whose holdings include liquid securities, cash, and derivatives. Such funds focus on diversification and employ a variety of investing strategies including long/short equity, multi-strategy, and global macro. The fair value of these investments is determined by reference to the net asset value of the underlying holdings of the fund, which can be determined using observable data (e.g., indices, yield curves, quoted prices of similar securities), and is classified within level 2 of the valuation hierarchy.

Insurance Contracts – This category is comprised of purchased annuity insurance contracts (annuity contract buy-ins) and is intended to mitigate the Company's exposure to certain risks, such as longevity risk. The fair value is calculated based on the cash surrender value of the purchased annuity insurance contract, which is determined based on such factors as the fair value of the underlying assets and discounted cash flows. These contracts are with highly rated insurance companies. Insurance contracts are classified within level 3 of the valuation hierarchy.

Real Estate Funds – This category includes real estate properties, partnership equities and investments in operating companies. The fair value of the assets is determined using discounted cash flows by estimating an income stream for the property plus a reversion into a present value at a risk adjusted rate. Yield rates and growth assumptions utilized are derived from market transactions as well as other financial and industry data. The fair value for these investments are classified within level 3 of the valuation hierarchy.

Private Debt - This category includes non-traded, privately-arranged loans between one or a small group of private debt investment managers and corporate borrowers, which are typically too small to access the syndicated market and have no credit rating. This category also includes similar loans to real estate companies or individual properties. Loans included in this category are valued at par value, are held to maturity or to call, and are classified within level 3 of the valuation hierarchy.

Contributions

At a minimum, Linde contributes to its pension plans to comply with local regulatory requirements (e.g., ERISA in the United States). Discretionary contributions in excess of the local minimum requirements are made based on many factors, including long-term projections of the plans' funded status, the economic environment, potential risk of overfunding, pension insurance costs and alternative uses of the cash. Changes to these factors can impact the timing of discretionary contributions from year to year. Pension contributions were $25 million in 2025 and $35 million in 2024. Estimated required contributions for 2026 are currently expected to be in the range of $25 million to $35 million.

Estimated Future Benefit Payments

The following table presents estimated future benefit payments, net of participant contributions:

(Millions of dollars)	Pensions	
Year Ended December 31,	**U.S.**	**Non-U.S.**
2026	$ 217	$ 406

2.00% Notes due 2050	297	297
1.00% Euro denominated notes due 2051	805	707

(a) Amounts are net of unamortized discounts, premiums and/or debt issuance costs as applicable.

(b) December 31, 2025 and December 31, 2024 included a cumulative $25 million and $32 million adjustment to carrying value, respectively, related to hedge accounting of interest rate swaps, including related terminations. Refer to Note 22.

(c) In February 2025, Linde issued €850 million of 2.625% notes due in 2029, €750 million of 3.00% notes due in 2033, and €650 million of 3.25% notes due in 2037.

(d) In February 2025, Linde redeemed $600 million of 4.700% notes that were due in 2025 and repaid $400 million of 2.65% notes that became due.

(e) In June 2025, Linde issued CHF225 million of 0.6150% notes due in 2029 and CHF275 million of 1.0629% notes due in 2033.

(f) In June 2025, Linde repaid €500 million of 3.625% notes that became due.

(g) In November 2025, Linde issued three tranches of euro-denominated notes, €600 million of floating-rate notes due in 2027, at three-month EURIBOR plus a fixed spread and resetting quarterly (2.226% as of December 31, 2025); €650 million of 3.125% fixed-rate notes due in 2032, and €500 million of 3.750% fixed-rate notes due in 2038.

(h) In December 2025, Linde repaid €500 million of notes that became due.

Credit Facilities

On December 7, 2022, the company and certain of its subsidiaries entered into an amended and restated unsecured revolving credit agreement (the "Five Year Credit Agreement") with a syndicate of banking institutions. The Five Year Credit Agreement provides for total commitments of $5.0 billion, which may be increased up to $6.5 billion, subject to receipt of additional commitments and satisfaction of customary conditions. There are no financial maintenance covenants contained within the Credit Agreement. The revolving credit facility expires on December 7, 2027 with the option to request two one-year extensions of the expiration date.

In addition, on December 3, 2025, the company and certain of its subsidiaries entered into an unsecured 364-day revolving credit agreement (the "364-Day Credit Agreement" and, together with the Five Year Credit Agreement, the "Credit Agreements") with a

syndicate of banking institutions. The 364-Day Credit Agreement provides for total commitments of $1.5 billion. There are no financial maintenance covenants contained within the Credit Agreement. The 364-Day Credit Agreement expires on December 2, 2026 with the option to elect to have the entire principal balances outstanding under the Credit Agreement converted into non-revolving term loans, which will be due and payable one year after the commitment termination date.

No borrowings were outstanding under the Credit Agreements as of December 31, 2025.

Other Debt Information

The weighted-average interest rates of short-term borrowings outstanding were 3.0% and 3.8% as of December 31, 2025 and 2024, respectively.

Expected maturities of long-term debt are as follows:

(Millions of dollars)		
2026	$	1,796
2027		2,311
2028		1,730
2029		2,168
2030		1,708
Thereafter		12,766
	$	22,479

As of December 31, 2025, the amount of Linde's assets pledged as collateral was immaterial.

See Note 23 for the fair value information related to debt.

[19] Leases

In the normal course of its business, Linde enters into various leases as the lessee, primarily involving manufacturing and distribution equipment and office space. Linde determines whether a contract is or contains a lease at contract inception. Total lease and rental expenses related to operating lease right of use assets for the twelve months ended December 31, 2025 and 2024 were $311 million and $303 million, respectively. Operating lease costs are included in marketing and selling expenses and cost of sales. The related assets and obligations are included in other non-current assets and other current liabilities and other non-current liabilities, respectively. Total lease and rental expenses related to finance lease right of use assets for the twelve months ended December 31, 2025 and 2024 were $74 million and $70 million, respectively, and the costs are included in depreciation and amortization and interest. Related assets and obligations are included in other non-current assets and other current liabilities and other non-current liabilities, respectively**.** Linde includes renewal options that are reasonably certain to be exercised as part of the lease term. Operating and financing lease expenses above include short term and variable lease costs which are immaterial.

As most leases do not provide an implicit rate, Linde uses the applicable incremental borrowing rate at lease commencement to measure lease liabilities and right-of-use assets. Linde determines incremental borrowing rates through market sources.

The company has elected to apply the short-term lease exception for all underlying asset classes. Short-term leases are leases that, at the commencement date, have a lease term of twelve months or less and do not include a purchase option that the lessee is reasonably certain to exercise. Leases that meet the short-term lease definition are not recognized on the statement of financial position, but rather expensed on a straight-line basis over the lease term.

Some leasing arrangements require variable payments that are dependent on usage, output, or may vary for other reasons, such as insurance. The company does not have material variable lease payments.

Gains and losses on sale and leaseback transactions were immaterial. Operating cash flows used for operating leases for the twelve months ended December 31, 2025 and 2024 were $250 million and $249 million, respectively. Cash flows used for finance leases for the same period were immaterial.

Supplemental financial position information related to leases is as follows:

(Millions of dollars) *December 31,*	2025	2024
Operating Leases		
Operating lease right-of-use assets	$ 886	$ 800
Other current liabilities	199	176
Other non-current liabilities	667	606
Total operating lease liabilities	866	782
Finance Leases		
Finance lease right-of-use assets	193	189
Other current liabilities	62	54
Other non-current liabilities	152	150
Total finance lease liabilities	$ 214	$ 204

Supplemental operating lease information:

(Millions of dollars) *December 31,*	2025	2024
Weighted average lease term (years)	8	8
Weighted average discount rate	4.46 %	4.17 %

Future operating and finance lease payments as of December 31, 2025 are as follows (millions of dollars):

Period	Operating Leases	Financing Leases
2026	$ 232	$ 65
2027	183	55
2028	139	40
2029	103	25
2030	68	12
Thereafter	322	44
Total future undiscounted lease payments	1,047	241
Less imputed interest	(181)	(27)
Total reported lease liability	$ 866	$ 214

[20] Other liabilities

Lease liability (Note 19)	$ 819	$ 756
Unrealized losses on derivatives (Note 22)	2	9
Contract liabilities	1,284	1,098
Other	276	246
	$ 2,381	$ 2,109

[21] Share option schemes

Share-based compensation expense was $164 million in 2025 ($160 million in 2024). The related income tax benefit recognized was $85 million in 2025 ($88 million in 2024). The expense was primarily recorded in selling, general and administrative expenses and no share-based compensation expense was capitalized.

Summary of Plans

The 2021 Linde plc Long Term Incentive Plan (the “2021 Plan") was adopted by the Board of Directors and shareholders of Linde plc on July 26, 2021. The 2021 Plan permits awards of stock options, stock appreciation rights, restricted stock and restricted stock units, performance-based stock units and other equity awards to eligible officer and non-officer employees and non-employee directors of the company and its affiliates. As of December 31, 2025, 6,496,096 shares remained available for equity grants under the 2021 Plan, of which 1,875,605 shares may be granted as awards other than options or stock appreciation rights.

Exercise prices for options granted under the 2021 Plan may not be less than the closing market price of the company’s ordinary shares on the date of grant and granted options may not be re-priced or exchanged without shareholder approval. Options granted under the 2021 Plan subject only to time vesting requirements may become partially exercisable after a minimum of one year after the date of grant but may not become fully exercisable until at least three years have elapsed from the date of grant, and all options have a maximum duration of ten years.

In order to satisfy option exercises and other equity grants, the company may issue authorized but previously unissued shares or it may issue treasury shares.

Stock Option Fair Value

The company utilizes the Black-Scholes Options-Pricing Model to determine the fair value of stock options consistent with that used in prior years. Management is required to make certain assumptions with respect to selected model inputs, including anticipated changes in the underlying stock price (i.e. expected volatility) and option exercise activity (i.e. expected life). Expected volatility is based on the historical volatility of the company’s stock over the most recent period commensurate with the estimated expected life of the company’s stock options and other factors. The expected life of options granted, which represents the period of time that the options are expected to be outstanding, is based primarily on historical exercise experience. The expected dividend yield is based on the company’s most recent history and expectation of dividend payouts. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for a period commensurate with the estimated expected life. If factors change and result in different

assumptions in future periods, the stock option expense that the company records for future grants may differ significantly from what the company has recorded in the current period.

The weighted-average fair value of options granted during 2025 was $110.50 ($112.63 in 2024) based on the Black-Scholes Options-Pricing model. The decrease in the grant date fair value year-over-year is primarily attributable to a lower expected volatility.

The following weighted-average assumptions were used to value the grants in 2025 and 2024:

Year Ended December 31,	2025	2024
Dividend yield	1.3 %	1.2 %
Volatility	21.9 %	22.5 %
Risk-free interest rate	4.05 %	4.01 %
Expected term years	5	5

The following table summarizes option activity under the plans as of December 31, 2025 and changes during the period then ended (averages are calculated on a weighted basis; life in years; intrinsic value expressed in millions):

Activity	Number of Options (000's)	Average Exercise Price	Average Remaining Life	Aggregate Intrinsic Value
Outstanding at January 1, 2025	5,023	$ 204.50		
Granted	317	468.77		
Exercised	(842)	146.09		
Cancelled or expired	(18)	407.03		
Outstanding at December 31, 2025	4,480	$ 233.38	4.4	$ 889
Exercisable at December 31, 2025	3,865	$ 199.39	3.7	$ 881

The aggregate intrinsic value represents the difference between the company's closing stock price of $426.39 as of December 31, 2025 and the exercise price multiplied by the number of in the money options outstanding as of that date. The total intrinsic value of stock options exercised during 2025 was $267 million ($327 million in 2024).

Cash received from option exercises under all share-based payment arrangements for 2025 was $23 million ($31 million in 2024). The cash tax benefit realized from share-based compensation totaled $82 million for 2025 ($89 million in 2024).

As of December 31, 2025, $22 million of unrecognized compensation cost related to non-vested stock options is expected to be recognized over a weighted-average period of approximately 1 year.

Performance-Based and Restricted Stock Unit Awards

In 2025, the company granted 237,584 performance-based stock unit awards under the 2021 Plan to senior management that vest, subject to the attainment of pre-established minimum performance criteria, principally on the third anniversary of their date of grant. These awards are tied to either after tax return on capital ("ROC") performance or relative total shareholder return ("TSR") performance versus that of a blended group of companies that is comprised of the S&P 500, excluding the Financial sector, and Eurofirst 300. The actual number of shares issued in settlement of a vested award can range from zero to 200 percent of the target number of shares granted based upon the company's attainment of specified performance targets at the end of a three-year period. Compensation expense related to these awards is recognized over the three-year performance period based on the fair value of the closing market price of the company's ordinary shares on the date of the grant and the estimated performance that will be achieved. Compensation expense for ROC awards will be adjusted during the three-year performance period based upon the estimated performance levels that will be achieved. TSR awards are measured at their grant date fair value and not subsequently re-measured. The number of performance-based stock unit awards granted in 2025 includes an increase of 123,718 stock units to the target number of performance-based awards originally granted in 2021, as these awards achieved a higher payout factor upon completion of the three-year performance period.

The weighted-average fair value of ROC awards granted in 2025 was $452.75 ($450.53 in 2024). These fair values are based on the closing market price of Linde's ordinary shares on the grant date adjusted for dividends that will not be paid during the vesting period.

The weighted-average fair value of TSR awards granted in 2025 was $653.41 ($664.77 in 2024) and was estimated using a Monte Carlo simulation performed as of the grant date.

There were 137,008 restricted stock units granted to employees by Linde during 2025. The weighted-average fair value of restricted stock units granted during 2025 was $450.68 ($449.10 in 2024). These fair values are based on the closing market price of Linde's

ordinary shares on the grant date adjusted for dividends that will not be paid during the vesting period. Compensation expense related to the restricted stock units is recognized over the vesting period.

The following table summarizes non-vested performance-based and restricted stock unit award activity as of December 31, 2025 and changes during the period then ended (shares based on target amounts, averages are calculated on a weighted basis):

	Performance-Based		Restricted Stock	
	Number of Shares (000's)	Average Grant Date Fair Value	Number of Shares (000's)	Average Grant Date Fair Value
Non-vested at January 1, 2025	558	$ 339.50	591	$ 271.59
Granted	237	550.48	137	450.68
Vested	(272)	274.73	(149)	252.66
Cancelled and Forfeited	(6)	534.96	(13)	411.61
Non-vested at December 31, 2025	517	$ 403.69	566	$ 316.24

There are approximately 8 thousand performance-based stock units and 13 thousand restricted stock units that are non-vested at December 31, 2025 which will be settled in cash due to foreign regulatory limitations. The liability related to these grants reflects the current estimate of performance that will be achieved and the current share price.

As of December 31, 2025, $55 million of unrecognized compensation cost related to performance-based awards and $51 million of unrecognized compensation cost related to the restricted stock unit awards is expected to be recognized primarily through the first quarter of 2028.

[22] Financial instruments

In its normal operations, Linde is exposed to market risks relating to fluctuations in interest rates, foreign currency exchange rates, energy and commodity costs. The objective of financial risk management at Linde is to minimize the negative impact of such fluctuations on the company's earnings and cash flows. To manage these risks, among other strategies, Linde routinely enters into various derivative financial instruments ("derivatives") including interest-rate swap and treasury rate lock agreements, forward contracts, and commodity-swap agreements. These instruments are not entered into for trading purposes and Linde only uses commonly traded and non-leveraged instruments.

There are three types of derivatives that the company enters into: (i) those relating to fair-value exposures, (ii) those relating to cash-flow exposures, and (iii) those relating to foreign currency net investment exposures. Fair-value exposures relate to recognized assets or liabilities, and firm commitments; cash-flow exposures relate to the variability of future cash flows associated with recognized assets or liabilities, or forecasted transactions; and net investment exposures relate to the impact of foreign currency exchange rate changes on the carrying value of net assets denominated in foreign currencies.

When a derivative is executed and hedge accounting is appropriate, it is designated as either a fair-value hedge, cash-flow hedge, or a net investment hedge. Currently, Linde designates all interest-rate and treasury-rate locks as hedges for accounting purposes when used. Currency contracts are generally not designated as hedges for accounting purposes. However, currency contracts related to certain forecasted transactions and net investments in foreign-denominated subsidiaries are designated as hedges for accounting purposes. Whether designated as hedges for accounting purposes or not, all derivatives are linked to an appropriate underlying exposure. On an ongoing basis, the company assesses the hedge effectiveness of all derivatives designated as hedges for accounting purposes to determine if they continue to be highly effective in offsetting changes in fair values or cash flows of the underlying hedged items. If it is determined that the hedge is not highly effective, through the use of a qualitative assessment, then hedge accounting will be discontinued prospectively.

Counterparties to Linde's derivatives are major banking institutions with credit ratings of investment grade or better. The company has Credit Support Annexes ("CSAs") in place for certain entities with their principal counterparties to minimize potential default risk and to mitigate counterparty risk. Under the CSAs, the fair values of derivatives for the purpose of interest rate and currency management are collateralized with cash on a regular basis. As of December 31, 2025, the impact of such collateral posting arrangements on the fair value of derivatives was insignificant. Management believes the risk of incurring losses on derivative contracts related to credit risk is remote and any losses would be immaterial.

The following table is a summary of the notional amount and fair value of derivatives outstanding at December 31, 2025 and 2024 for consolidated subsidiaries:

			Fair Value			
(Millions of dollars)	Notional Amounts		Assets (a)		Liabilities (a)	
December 31,	2025	2024	2025	2024	2025	2024
Derivatives Not Designated as Hedging Instruments:						
Currency contracts:						
Financial position items	$ 9,509	$ 9,935	$ 79	$ 256	$ 34	$ 64
Forecasted transactions	164	168	3	2	1	6
Total	$ 9,673	$ 10,103	$ 82	$ 258	$ 35	$ 70
Derivatives Designated as Hedging Instruments:						
Currency contracts:						
Forecasted transactions	$ 560	$ 780	$ 24	$ 7	$ 1	$ 11
Forward exchange contracts	3,420	1,059	6	30	28	—
Commodity contracts	N/A	N/A	5	11	10	20
Total Hedges	$ 3,980	$ 1,839	$ 35	$ 48	$ 39	$ 31
Total Derivatives	$ 13,653	$ 11,942	$ 117	$ 306	$ 74	$ 101

(a) Amounts at December 31, 2025 and 2024, respectively, included current assets of $107 million and $302 million, which are recorded in other current assets; non-current assets of $10 million and $4 million, which are recorded in other non-current assets; current liabilities of $72 million and $92 million, which are recorded in other current liabilities; and non-current liabilities of $2 million and $9 million, which are recorded in other non-current liabilities.

In addition, during 2024, Linde issued credit default swaps ("CDS") to third-party financial institutions. The CDS relate to secured borrowings provided by the financial institutions to a government customer in Mexico, that were utilized to pay certain of Linde's outstanding receivables. The notional amount of the CDS, which was $73 million and $102 million for the two programs as of December 31, 2025, will reduce on a monthly basis over their respective 24-month and 22-month terms. As of December 31, 2025, the fair value of the associated derivative asset and liability positions were not material.

Financial Position Items

Foreign currency contracts related to financial position items consist of forward contracts entered into to manage the exposure to fluctuations in foreign-currency exchange rates on recorded financial position assets and liabilities denominated in currencies other than the functional currency of the related operating unit. Certain forward currency contracts are entered into to protect underlying monetary assets and liabilities denominated in foreign currencies from foreign exchange risk and are not designated as hedging instruments. For financial position items that are not designated as hedging instruments, the fair value adjustments on these contracts are offset by the fair value adjustments recorded on the underlying monetary assets and liabilities.

Forecasted Transactions

Foreign currency contracts related to forecasted transactions consist of forward contracts entered into to manage the exposure to fluctuations in foreign-currency exchange rates on (1) forecasted purchases of capital-related equipment and services, (2) forecasted sales, or (3) other forecasted cash flows denominated in currencies other than the functional currency of the related operating units. For forecasted transactions that are designated as cash flow hedges, fair value adjustments are recorded to other reserves with deferred amounts reclassified to earnings over the same time period as the profit and loss impact of the associated purchase. For forecasted transactions that do not qualify for cash flow hedging relationships, fair value adjustments are recorded directly to earnings. Linde is hedging forecasted transactions for a maximum period of four years.

Commodity Contracts

Commodity contracts are entered into to manage the exposure to fluctuations in commodity prices, which arise in the normal course of business from its procurement transactions. To reduce the extent of this risk, Linde enters into a limited number of electricity, natural gas, and propane gas derivatives. For forecasted transactions that are designated as cash flow hedges, fair value adjustments are recorded to other reserves with deferred amounts reclassified to earnings over the same time period as the profit and loss impact of the associated purchase. Linde is hedging commodity contracts for a maximum period of three years.

Net Investment Hedges

Foreign Currency-Denominated Debt Designations

As of December 31, 2025, Linde has €17.3 billion ($20.4 billion) Euro-denominated notes and intercompany loans, ¥5.2 billion ($0.7 billion) CNY-denominated intercompany loans and CHF500 million ($631 million) CHF-denominated notes that are designated as hedges of the net investment positions in certain foreign operations. Since hedge inception, the deferred loss recorded within the cumulative translation adjustment component of other reserves in the consolidated statement of financial position is $1,558 million (deferred loss of $2,704 million in the consolidated statement of comprehensive income for the year ended December 31, 2025), which is largely offset by an offsetting loss or gain on the underlying foreign net investment being hedged.

Foreign Currency Forward Exchange Contract Designations

The Company enters into forward exchange contracts to partially hedge its net investment in certain foreign-denominated subsidiaries. The Company assesses the forward exchange contracts used as net investment hedges under the spot method. This results in the difference between the spot rate and the forward rate of the forward exchange contract being excluded from the assessment of hedge effectiveness and recorded as incurred as a reduction in interest expense - net in the consolidated statement of profit and loss. Since hedge inception and for the year ended December 31, 2025, the deferred loss recorded within the cumulative translation adjustment component of other reserves in the consolidated statement of financial position is $23 million (deferred loss of $23 million in the consolidated statement of comprehensive income for the year ended December 31, 2025), which is largely offset by an offsetting loss or gain on the underlying foreign net investment being hedged. The amount of net interest income recorded in 2025 and 2024 for all forward exchange contracts was $62 million and $6 million, respectively.

Effects of Previous Hedge Designations

As of December 31, 2025, exchange rate movements relating to previously designated hedges that remain in other reserves is a loss of $86 million. These movements will remain in other reserves, until appropriate, such as upon sale or liquidation of the related foreign operations at which time amounts will be reclassified to the consolidated statement of profit and loss.

Interest Rate Swaps

Linde has historically used interest rate swaps to hedge the exposure to changes in the fair value of financial assets and financial liabilities as a result of interest rate changes. When used, these interest rate swaps would effectively convert fixed-rate interest exposures to variable rates; fair value adjustments were recognized in earnings along with an equally offsetting charge/benefit to earnings for the changes in the fair value of the underlying financial asset or financial liability (See Note 18).

Derivatives Impact on Consolidated Statement of Profit and Loss

The following table summarizes the impact of the company's derivatives on the consolidated statement of profit and loss:

(Millions of dollars)	Amount of Pre-Tax Gain (Loss) Recognized in Earnings *	
December 31,	**2025**	**2024**
Derivatives Not Designated as Hedging Instruments		
Currency contracts:		
Financial position items:		
Debt-related	$ (65)	$ 88
Other financial position items	6	—
Total	$ (59)	$ 88

* The gains (losses) on financial position items are offset by gains (losses) recorded on the underlying hedged assets and liabilities. Accordingly, the gains (losses) for the derivatives and the underlying hedged assets and liabilities related to debt items are recorded in the consolidated statement of profit and loss as interest expense - net. Other financial position items are recorded in the consolidated statement of profit and loss as interest expense - net.

The amounts of gain or loss recognized in other reserves and reclassified to the consolidated statement of profit and loss were not material for the years ended December 31, 2025 and 2024. Net impacts expected to be reclassified to earnings during the next twelve months are also not material.

[23] Fair value

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels as follows:

Level 1 – quoted prices in active markets for identical assets or liabilities
Level 2 – quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 – inputs that are unobservable (for example, cash flow modeling inputs based on assumptions)

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table summarizes assets and liabilities measured at fair value on a recurring basis at December 31, 2025 and 2024:

(Millions of dollars)	Fair Value Measurements Using					
	Level 1		Level 2		Level 3	
	2025	2024	2025	2024	2025	2024
Assets						
Derivative assets	$ —	$ —	$ 117	$ 306	$ —	$ —
Investments and securities *	20	16	—	—	13	12
Total	$ 20	$ 16	$ 117	$ 306	$ 13	$ 12
Liabilities						
Derivative liabilities	$ —	$ —	$ 74	$ 101	$ —	$ —

* Investments and securities are recorded in other current assets and other non-current assets in the company's consolidated statement of financial position.

Level 1 investments and securities are marketable securities traded on an exchange. Level 2 investments are based on market prices obtained from independent brokers or determined using quantitative models that use as their basis readily observable market parameters that are actively quoted and can be validated through external sources, including third-party pricing services, brokers and market transactions. Level 3 investments and securities consist of a venture fund. For the valuation, Linde uses the net asset value received as part of the fund's quarterly reporting, which for the most part is not based on quoted prices in active markets. In order to reflect current market conditions, Linde proportionally adjusts these by observable market data (stock exchange prices) or current transaction prices.

Changes in Level 3 investments and securities were immaterial.

The fair value of cash and cash equivalents, current debt, accounts receivable, and accounts payable approximate carrying value because of the short-term maturities of these instruments.

The fair value of long-term debt is estimated based on the quoted market prices for the same or similar issues. Long-term debt is categorized within Level 2 of the fair value hierarchy. At December 31, 2025, the estimated fair value of Linde’s long-term debt portfolio was $21,064 million versus a carrying value of $22,479 million. At December 31, 2024, the estimated fair value of Linde’s long-term debt portfolio was $16,234 million versus a carrying value of $17,400 million. Differences between the carrying value and the fair value are attributable to fluctuations in interest rates subsequent to when the debt was issued and relative to stated coupon rates.

[24] Segment information

Linde’s operations consist of two major product lines: industrial gases and engineering. As further described in the following paragraph, Linde’s industrial gases operations are managed on a geographic basis, which represent three of the company's reportable segments - Americas, EMEA (Europe/Middle East/Africa), and APAC (Asia/South Pacific); a fourth reportable segment, which represents the company's Engineering business, designs and manufactures equipment for air separation and other industrial gas applications specifically for end customers and is managed on a worldwide basis operating in all three geographic segments. Other consists of corporate costs and a few smaller businesses, which individually do not meet the quantitative thresholds for separate presentation.

The industrial gases product line centers on the manufacturing and distribution of atmospheric gases (oxygen, nitrogen, argon, rare gases) and process gases (hydrogen, helium, carbon dioxide, carbon monoxide, electronic gases, specialty gases, acetylene). Many of these products are co-products of the same manufacturing process. Linde manufactures and distributes nearly all of its products and manages its customer relationships on a regional basis. Linde’s industrial gases are distributed to various end-markets within a regional segment through one of three basic distribution methods: on-site or tonnage; merchant or bulk; and packaged or cylinder gases. The distribution methods are generally integrated in order to best meet the customer’s needs and very few of its products can be economically transported outside of a region. Therefore, the distribution economics are specific to the various geographies in which the company operates and are consistent with how management assesses performance.

The CODM consists of the CEO, COO, CFO and senior or executive vice president of each respective segment. The company’s measure of profit/loss for segment reporting is segment operating profit. Segment operating profit is defined as operating profit excluding purchase accounting impacts of the Linde AG merger, cost reduction and other charges, and items not indicative of ongoing business trends. The CODM uses operating profit to assess overall segment performance, which includes monitoring opportunities for

growth and to make capital decisions across the respective segments, while assessing both industry and macroeconomic conditions. Total assets have not been included as this is not provided to the CODM for their assessment.

The table below presents information about reportable segments for the years ended December 31, 2025 and 2024.

(Millions of dollars)	Americas	EMEA	APAC	Engineering	Other	Total
2025						
Sales (a)	15,208	8,549	6,661	2,250	1,318	33,986
Variable Costs (b)	5,763	2,943	3,270	853	484	13,313
Fixed Costs and other (c)	3,194	1,870	784	957	745	7,550
Depreciation and amortization (d)	1,504	681	674	32	95	2,986
Operating Profit (e)	4,747	3,055	1,933	408	(6)	10,137
Expenditures for long-lived assets	3,428	729	1,177	35	304	5,673
2024						
Sales (a)	14,442	8,352	6,632	2,322	1,257	33,005
Variable Costs (b)	5,375	3,129	3,304	920	408	13,136
Fixed Costs and other (c)	3,067	1,803	769	959	694	7,292
Depreciation and amortization (d)	1,450	640	641	33	93	2,857
Operating Profit (e)	4,550	2,780	1,918	410	62	9,720
Expenditures for long-lived assets	2,805	702	1,059	25	223	4,814

(a) Sales reflect external sales only. Intersegment sales, from Engineering to the industrial gases segments, were $2,702 million and $1,958 million for the year ended December 31, 2025, and 2024, respectively. Intersegment sales from Helium, were $436 million and $ 477 million for the year ended December 2025, and 2024, respectively.

(b) Variable costs represents the variable portion of cost of sales, exclusive of depreciation and amortization.

(c) Fixed costs and other represent the fixed portion of cost of sales (exclusive of depreciation and amortization), selling, general and administrative, research and development and other income (expenses) - net.

(d) Refer to the reconciliation of depreciation and amortization to consolidated results below.

(e) Refer to the reconciliation of operating profit to consolidated results below.

Reconciliations to Consolidated Results

Depreciation and Amortization

The table below reconciles total depreciation and amortization disclosed in the table above to consolidated depreciation and amortization as reflected on our consolidated statement of profit and loss:

(Millions of dollars)	2025	2024
Total segment depreciation and amortization	$ 2,986	$ 2,857
Purchase accounting impacts - Linde AG	777	923
Total depreciation and amortization	$ 3,763	$ 3,780

Income Before Income Taxes and Equity Investments

The table below reconciles total operating profit disclosed in the table above to consolidated income before income taxes and equity investments as reflected on our consolidated statement of profit and loss:

(Millions of dollars)	2025	2024
Total segment operating profit	$ 10,137	$ 9,720
Cost reduction program and other charges	273	145
Purchase accounting impacts - Linde AG	941	940
Interest expense - net	255	256
Net pension and OPEB cost (benefit), excluding service cost	(229)	(190)
Total consolidated income before income taxes and equity investments	8,897	8,569

Geographic Information

The geographic information presented below is based on country of origin.

Sales by Major Country

(Millions of dollars)	2025	2024
United States	$ 12,182	$ 11,497
China	2,600	2,649
Germany (a)	2,432	2,509
United Kingdom	1,510	1,540
Australia	1,287	1,354
Mexico	1,391	1,346
Brazil	1,325	1,263
Other – non-U.S.	11,259	10,847
Total Sales	$ 33,986	$ 33,005

(a) Sales in Germany include Engineering sales to third parties, locally and internationally, which represent 25%, and 28% of Germany sales in 2025 and 2024, respectively.

Long-lived Assets

(Millions of dollars)	2025	2024
United States	$ 11,229	$ 9,663
China	2,129	2,022
Germany	1,550	1,386
Brazil	896	738
Mexico	852	704
United Kingdom	718	668
Australia	621	573
Other – non-U.S.	10,265	9,021
Total long-lived assets (a)	$ 28,260	$ 24,775

(a) Long-lived assets include property, plant and equipment - net.

[25] Employees

In 2025, the average number of employees was 65,038 (2024: 65,815). As of December 31, 2025, the total number of employees of Linde plc was 65,177 (65,289 in 2024) of which 1,032 (1,075 in 2024) are designated as senior management based upon their level within the overall organization.

All in all, personnel expenses in 2025 totaled $6.0 billion (2024: $5.9 billion), of which $4.0 billion (2024: $3.9 billion) related to salaries (including social security contributions of approximately $688 million in 2025 and $670 million in 2024), $82 million (2024: $84 million) to pensions, and share-based compensation expense of $164 million in 2025 ($160 million in 2024). In 2025,

approximately $506 million ($348 million in 2024) of personnel costs were primarily capitalized within property, plant and equipment and other intangible assets.

[26] Related party transactions

In addition to the subsidiaries included in the consolidated financial statements, Linde plc is related, directly or indirectly, while carrying out its normal business activities, to other investments, joint ventures and associates. The business relationships with these companies are conducted under the same conditions as for non-related third parties. Related companies which are controlled by Linde plc or over which Linde plc may exercise significant influence are disclosed in the list of shareholdings, arranged by division.

The information about the remuneration of the Board of Directors is set out in Note 27.

Revenue With Related Parties

(Millions of dollars)	2025				2024			
	Other investments	Associates or joint ventures	Other related parties	Total	Other investments	Associates or joint ventures	Other related parties	Total
Revenue	$ 23	$ 65	$ 192	$ 280	$ 89	$ 123	$ 6	$ 218

Purchased Goods And Services From Related Parties

(Millions of dollars)	2025				2024			
	Other investments	Associates or joint ventures	Other related parties	Total	Other investments	Associates or joint ventures	Other related parties	Total
Goods and services purchased from related parties	$ 40	$ 309	$ 68	$ 417	$ 40	$ 333	$ 44	$ 417

Related persons are mainly the members of the Board of Directors. In 2025 and 2024, there were no material transactions between Linde plc and members of the Board of Directors or their family members which were outside the bounds of existing employment, service or appointment agreements or remuneration contracts.

Some members of Linde's Board of Directors hold similar positions in other companies. Linde has normal business relationships with virtually all of these companies. The sale and purchase of goods and services to and from these companies take place under the usual market conditions.

Receivables and payables related to other investments, joint ventures and associates, and other related parties are conducted under the same terms and conditions as those with non-related third parties and were not material for 2025 and 2024, respectively.

There were no material charge-free guarantee agreements in place for associates or joint ventures on the reporting date, nor any material open purchase orders relating to joint ventures.

[27] Directors' Remuneration

Directors Remuneration under Irish Companies Act

The following table discloses the remuneration for members of the Board of Directors of Linde plc for the current and preceding year as required under Irish Companies Act 2014.

(Millions of dollars)	2025	2024
Emoluments in respect of qualifying services [1]	$ 7	$ 6
Long-term incentive plans [2]	20	13
Post-employment benefits	—	—
Gain on exercise of share options [3]	—	7
TOTAL EMOLUMENTS	**$ 27**	**$ 26**

(1) Represents the aggregate emoluments (including salary, fees, bonuses, expenses and estimated money value of other benefits received) for the period.

(2) Represents non-equity incentive plans and stock awards that have vested in the year.

(3) Represents gain on exercise of share options.

[28] Contingent liabilities and other financial commitments

The company accrues non income-tax liabilities for contingencies when management believes that a loss is probable and the amounts can be reasonably estimated, while contingent gains are recognized only when realized or realizable. In the event any losses are sustained in excess of accruals, they will be charged against income at that time. Attorney fees are recorded as incurred. Commitments represent obligations, such as those for future purchases of goods or services, that are not yet recorded on the company's statement of financial position as liabilities. The company records liabilities for commitments when incurred (i.e., when the goods or services are received).

Contingent Liabilities

Linde is subject to various lawsuits and government investigations that arise from time to time in the ordinary course of business. These actions are based upon alleged environmental, tax, antitrust and personal injury claims, among others. Linde has strong defenses in these cases and intends to defend itself vigorously. It is possible that the company may incur losses in connection with some of these actions in excess of accrued liabilities. Management does not anticipate that in the aggregate such losses would have a material adverse effect on the company's consolidated financial position or liquidity; however, it is possible that the final outcomes could have a significant impact on the company's reported results of operations in any given period.

Significant matters are:

- During 2009, the Brazilian government published Law 11941/2009 instituting a new voluntary amnesty program ("Refis Program") which allowed Brazilian companies to settle certain federal tax disputes at reduced amounts. During 2009, the company decided that it was economically beneficial to settle many of its outstanding federal tax disputes and such disputes were enrolled in the Refis Program, subject to final calculation and review by the Brazilian federal government. The company recorded estimated liabilities based on the terms of the Refis Program. Since 2009, Linde has been unable to reach final agreement on the calculations and initiated litigation against the government in an attempt to resolve certain items. Open issues relate to the following matters: (i) application of cash deposits and net operating loss carryforwards to satisfy obligations and (ii) the amount of tax reductions available under the Refis Program. It is difficult to estimate the timing of resolution of legal matters in Brazil.

- On and after April 23, 2019 former shareholders of Linde AG filed appraisal proceedings at the District Court (*Landgericht*) Munich I (Germany), seeking an increase of the cash consideration paid in connection with the previously completed cash merger squeeze-out of all of Linde AG's minority shareholders for €189.46 per share. Any such increase would apply to all 14,763,113 Linde AG shares that were outstanding on April 8, 2019, when the cash merger squeeze-out was completed. The period for plaintiffs to file claims expired on July 9, 2019. In November 2023, the court issued a decision rejecting the plaintiffs' claims in their entirety and determining that the cash merger squeeze-out consideration was appropriate. The plaintiffs have appealed this decision.

  The company believes the consideration paid was fair and that the claims are not supported by sufficient evidence, and no reserve has been established. We cannot estimate the timing of resolution.

- On May 27, 2022, performance of all Linde Engineering agreements in Russia were lawfully suspended in compliance with applicable sanctions. In December 2022, at RusChemAlliance's (RCA) request a Russian St. Petersburg court ("St. Petersburg Court") issued an injunction preventing sale of Linde Russia subsidiaries and assets. Since then, in accordance with the dispute resolution provisions of the related engineering agreements Linde secured judgments reenforcing jurisdiction of the agreements with RCA outside of Russia and ordering the St. Petersburg proceedings stayed and injunctions lifted. However, RCA has continued to pursue its claims in Russia and during 2024 two Linde Russian joint ventures were sold locally pursuant to a St. Petersburg court order and the proceeds provided to RCA. Linde does not expect a material adverse impact on earnings given the combined $1.9 billion liabilities recorded as of December 31, 2025 and the immaterial investment value of its remaining deconsolidated Russia subsidiaries. Please see further detail on the Russian legal cases below.

  RCA LNG and GPP

  In December 2022, the St. Petersburg Court issued an injunction preventing (i) the sale of any shares in Linde's subsidiaries and joint ventures in Russia, and (ii) the disposal of any of the assets in those entities exceeding 5% of the relevant company's overall asset value. RusChemAlliance is owned 50% by PJSC Gazprom. The injunction was requested by RCA to secure payment of a possible award under an arbitration proceeding RCA intended to file against Linde Engineering for alleged breach of contract under the agreement to build a gas processing plant in Russia entered into in July 2021. In 2023, RCA filed a claim in St. Petersburg against Linde GmbH for recovery of advance payments under the agreement ("GPP Claim"), and subsequently (i) added Linde and other Linde subsidiaries as defendants, and (ii) is seeking payment of alleged damages from Linde and guarantor banks. In 2024, RCA filed a similar claim for repayment and damages against Linde for alleged breach of contract under the agreement to build a liquefied natural gas plant in Russia entered into in September 2021 ("LNG Claim", and together with the GPP Claim, the "Russian Claims").

Dispute resolution provisions

In accordance with the dispute resolution provisions of the agreements, in 2023, Linde filed a notice of arbitration with the Hong Kong International Arbitration Centre ("HKIAC") against RCA to claim that (i) RCA has no entitlement to payment, (ii) RCA's Russian Claims are in breach of the arbitration agreement which requires HKIAC arbitration, and (iii) RCA must compensate Linde for the losses and damages caused by the injunction. During 2024, Linde secured awards on exclusive jurisdiction with HKIAC.

In January 2024, the Hong Kong court issued a final judgment in Linde's favor (i) granting a permanent anti-suit injunction against RCA to seek a stay of the GPP claim and not start an LNG claim, (ii) granting a permanent, global anti-enforcement injunction against RCA for the GPP claim, and (iii) ordering that the injunction issued by the St. Petersburg Court be lifted ("HK Court Judgement").

Despite the judgments of the Hong Kong court and similar orders issued by the HKIAC arbitration tribunals, RCA is continuing to pursue its claims in Russia and neither the St. Petersburg injunction affecting Linde's shares and assets has been lifted, nor the proceeding in St. Petersburg been stayed. The HKIAC arbitration proceedings are ongoing.

Local seizures

During 2024, the St. Petersburg Court decided the GPP Claim in favor of RCA (the "GPP Decision") and later that year, decided the LNG Claim in favor of RCA (the "LNG Decision"). Linde unsuccessfully appealed the GPP Decision in 2024. During the fourth quarter of 2024, RCA executed enforcement actions related to the GPP Decision within Russia for Linde's shares in two Linde Russian joint ventures and locally RCA received payment from the purchase of these shares by Linde's joint venture partners. RCA previously initiated the enforcement process for the GPP Decision within Russia for the remainder of Linde's local assets, and these proceedings are currently ongoing.

Linde intends to claim all damages related to or rising from RCA's enforcement of the GPP and LNG Decisions in the HKIAC arbitration proceedings. Linde subsidiaries affected by the GPP Decision have also filed claims for damages against RCA and/or its controlling shareholder in the Southern District of New York, the Netherlands and Germany.

As of December 31, 2025, Linde has a contingent liability of $1.2 billion, which represents advance payments previously recorded in contract liabilities related to terminated engineering projects with RCA. As a result of the contract terminations, Linde no longer has future performance obligations for these projects.

It is difficult to estimate the timing of resolution of these matters. The company intends to vigorously defend its interests in the Russian Claims, Hong Kong arbitration proceedings and other jurisdictions.

Amur GPP

In July 2015, Gazprom Pererabotka Blagoveshchensk LLC ("Gazprom"), a 100% subsidiary of PJSC Gazprom, entered into an engineering, procurement and construction contract with OJSC NIPIgazpererabotka ("Nipigas") for the construction of a gas processing plant and other components located in the Amur Region, Russia ("Amur GPP"). Subsequently, in December 2015, Nipigas and Linde Engineering, executed a subcontract for engineering, procurement, and site services ("EPSS Contract") for licensed production units for the Amur GPP project. Additionally, Linde also entered into (i) a license agreement with Gazprom in 2017 for the operation of the plants, and (ii) a direct owner agreement with Gazprom and Nipigas ("DOA") which included limitation of liability provisions. Performance of the Amur GPP agreements were lawfully suspended in compliance with applicable sanctions on May 27, 2022.

On October 8, 2021 and January 5, 2022, fires occurred at the Amur GPP facility. Following the initial fire in 2021, Linde undertook a comprehensive review of the incident, including a detailed local inspection conducted by Linde employees. The Linde report concluded that the fire was attributable to the quality of construction and assembly work, responsibilities falling under the scope of Nipigas.

On October 29, 2024, Gazprom submitted a claim to the Arbitration State Court in the Amur Region, Russia ("Amur Court") against Linde Engineering and project-unrelated Linde entities claiming damages and lost profits arising from the fire incidents.

During 2025, Linde Engineering formally initiated arbitration proceedings against Gazprom before the Arbitration Institute of the Stockholm Chamber of Commerce (SCC) in Stockholm, Sweden, as provided for in the DOA.

As of December 31, 2025, Linde has a contingent liability of $0.7 billion for this and other Amur GPP contract matters. It is difficult to estimate the timing of resolution of this matter. The company intends to vigorously defend its interests in this case.

Commitments

At December 31, 2025, Linde had undrawn outstanding letters of credit, bank guarantees and surety bonds valued at approximately $3.5 billion from financial institutions. These relate primarily to customer contract performance guarantees (including plant construction in connection with certain on-site contracts), self-insurance claims and other commercial and governmental requirements, including non-U.S. litigation matters.

Other commitments related to leases, tax liabilities for uncertain tax positions, long-term debt, other post retirement and pension obligations are summarized elsewhere in the financial statements (see Note 7, 16, 18 and 19).

[31] Events since the statement of financial position date

Dividends After Year End

On February 24, 2026, the directors of Linde plc declared an interim dividend of $1.60 per share for the first quarter of 2025 (the “Q1 Dividend”). The Q1 Dividend was payable on March 26, 2026 to shareholders of record on March 11, 2026.

On April 27, 2026, the directors of Linde plc declared an interim dividend of $1.60 per share for the second quarter of 2025 (the "Q2 dividend"). The Q2 Dividend is payable on June 18, 2026 to shareholders of record on June 4, 2026.

Own Shares

From the period January 1, 2026 through March 31, 2026, an additional 1,662 thousand ordinary shares were purchased by the company for total consideration of $791 million, or an average price of $470.58 per share.

[32] Date of approval of the financial statements

The financial statements of Linde plc for the year ended December 31, 2025 were authorized for issue by the Board of Directors on April 27, 2026.

1. Balances may not sum due to rounding to the nearest million USD.

The accompanying notes are an integral part of these financial statements.

Notes to the Company Financial Statements

1. Organization and Basis of Presentation

The company is a public limited company registered in Ireland under the registration number 606357 and with its registered office located at Ten Earlsfort Terrace, Dublin 2, D02 T380 Ireland and principal executive offices at Forge, 43 Church Street West, Woking, Surrey, GU21 6HT, United Kingdom and 10 Riverview Drive, Danbury, Connecticut, 06810 United States.

The principal activity of Linde plc, the legal entity, is to act as an investment holding company.

2. Statement of compliance

The company's financial statements have been prepared in accordance with applicable accounting standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland, including FRS 102, 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Irish Companies Act 2014.

3. Summary of significant accounting policies

The preparation of these financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the company's accounting policies. The significant accounting policies used in the preparation of the entity financial statements are set out below. These policies have been consistently applied to all financial years presented, unless otherwise stated.

Basis of preparation

The financial statements are prepared on a going concern basis under the historical cost convention, in USD, which is the functional currency of the company and rounded to the nearest million USD.

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the amounts reported for assets and liabilities as at the statement of financial position date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates.

The financial statements present the entity financial position for the year ended December 31, 2025. Comparative information is for the year ended December 31, 2024.

In accordance with section 304 of the Companies Act 2014, the company is availing of the exemption from presenting its individual profit and loss account to the annual general meeting and from filing it with the Registrar of Companies.

Disclosure exemptions

FRS 102 allows a qualifying entity certain disclosure exemptions. The company is a qualifying entity and has availed of the following disclosure exemptions:

i. Exemption from the requirements of Section 7 of FRS 102 and FRS 102 paragraph 3.17(d) to present a statement of cash flows.
ii. Exemption from the financial instrument disclosure requirements of Section 11 paragraphs 11.40 to 11.48C and Section 12 paragraphs 12.26 to 12.30 of FRS 102 as the equivalent disclosures are included in the consolidated financial statements of the company in which the entity is consolidated.
iii. Exemption from certain disclosure requirements of Section 26 of FRS 102 (paragraphs 26.18(b), 26.19 to 26.21 and 26.23), in respect of share-based payments as the share-based payment concerns its own equity instruments and its separate financial statements are presented alongside the consolidated financial statements of the company; and the equivalent disclosures are included in the consolidated financial statements of the company in which the entity is consolidated.
iv. Exemption from the requirement of FRS 102 paragraph 33.7 to disclose key management personnel compensation in total.

Critical accounting judgments and estimation uncertainty

Estimates and judgments made in the process of preparing the entity financial statements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

The estimation process required to prepare the company's financial statements requires assumptions to be made about future events and conditions, and as such, is inherently subjective and uncertain. The company's actual results could differ materially from those estimates.

Carrying value of investment in subsidiary

The company is a holding company and at the statement of financial position has an investment in subsidiary carried at cost of $111,510 million. The investment is reviewed for impairment indicators. Recoverability of the investment is dependent on the financial condition of the subsidiaries of the company. As of December 31, 2025, no impairments were noted.

Foreign currency translation

Items included in these financial statements are measured using the currency of the primary economic environment in which the entity operates (‘the functional currency’). The financial information is presented in U.S. Dollars ("USD").

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit and loss.

Shares in group undertakings

Shares in group undertakings are stated in the company’s statement of financial position at cost less any return of capital, unless it has been impaired in which case it is carried net of any impairment loss recognized.

Cash at bank and in-hand

Cash and cash equivalents consist of cash at banks or other highly liquid securities with original maturities of three months or less.

Financial instruments

The company has chosen to apply the provisions of Sections 11 and 12 of FRS 102 to account for all of its financial instruments.

Where a derivative financial instrument is designated as a hedge of the variability in fair value of a recognized asset or liability or an unrecognized firm commitment, all changes in the fair value of the derivative are recognized immediately in the profit and loss account. The carrying value of the hedged item is adjusted by the change in fair value that is attributable to the risk being hedged (even if it is normally carried at cost or amortized cost) and any gains or losses on remeasurement are recognized immediately in the profit and loss account (even if those gains would normally be recognized directly in reserves). The company elects to designate certain forward exchange contracts and a portion of its foreign currency borrowings as fair value hedges of the foreign currency exposure of its foreign group undertakings (primarily Euro). For all hedge relationships that meet the criteria for hedge accounting, the gain or loss related to foreign exchange risk on the foreign group undertakings is reflected in the profit and loss, where it offsets the foreign exchange gain or loss on the designated foreign currency financial liabilities.

On the discontinuance of hedge accounting, any adjustment made to the carrying amount of the hedged item as a consequence of the fair value hedge relationship is recognized in the profit and loss account over the remaining life of the hedged item.

Financial assets

Basic financial assets, including trade and other receivables and cash and cash equivalents are initially recognized at transaction price (including transaction costs), unless the arrangement constitutes a financing transaction. Where the arrangement constitutes a financing transaction the resulting financial asset is initially measured at the present value of the future receipts discounted at a market rate of interest for a similar debt instrument.

At the end of each financial year, financial assets measured at amortized cost are assessed for objective evidence of impairment. If there is objective evidence that a financial asset measured at amortized cost is impaired an impairment loss is recognized in profit and loss. The impairment loss is the difference between the financial asset’s carrying amount and the present value of the financial asset’s estimated cash inflows discounted at the asset’s original effective interest rate. No impairments were recognized in the periods ended December 31, 2025 or December 31, 2024.

Financial assets are derecognized when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of ownership of the financial asset are transferred to another party or (c) control of the financial asset has been transferred to another party who has the practical ability to unilaterally sell the financial asset to an unrelated third party without imposing additional restrictions.

Financial liabilities

Basic financial liabilities, including accrued liabilities, and amounts due to related parties, are initially recognized at transaction price, unless the arrangement constitutes a financing transaction. Where the arrangement constitutes a financing transaction

the resulting financial liability is initially measured at the present value of the future payments discounted at a market rate of interest for a similar debt instrument. Amounts due to related parties, and financial liabilities from arrangements which constitute financing transactions, are subsequently carried at amortized cost using the effective interest method.

Financial liabilities are derecognized when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are capitalized and upon the closing of the associated equity transaction are reclassified to equity as a deduction, net of tax, from the proceeds.

Treasury shares

Treasury shares comprise the company's ordinary shares that have been purchased under the company's approved share buyback programs, which allow for the repurchase of ordinary shares from time to time in the open market subject to market and business conditions. Subsequent sales, transfers or cancellations of treasury shares held by the company are accounted for within equity.

Income taxes

The company establishes provisions based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience with previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Management estimation is required to determine the amount of deferred tax assets that can be recognized, based upon likely timing and level of future taxable profits together with an assessment of the effect of future tax planning strategies.

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. Current tax is the amount of income tax payable in respect of the taxable profit for the financial year or past financial years. Current tax is measured at the amount of current tax that is expected to be paid using tax rates and laws that have been enacted or substantively enacted by the end of the financial year.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Dividends

Dividends and other distributions to the company's equity shareholders are recognized as a liability in the financial statements in the financial year in which the dividends and other distributions are approved by the company's shareholders.

Income from shares in group undertakings represent dividend income from group undertakings, which is recognized when the right to receive payment is established.

Other debtors

Other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Other receivables are stated at the lower of amortized cost or recoverable amount. If collection of the amounts is expected in one year or less they are classified as current assets.

Share-based compensation

The company and its subsidiaries operate various share based payment plans. The share-based payment expense associated with the share plans is recognized as an expense by the entity which receives services in exchange for the share-based compensation. In these company only financial statements, the expense related to the options vested is recorded in other reserves and recorded as a capital contribution to the appropriate entity that receives the services of the employees.

4. Shares in group undertakings

The directly held subsidiaries of the company include the following:

Name	Nature of Business	Registered office, Country of Incorporation and Principal Place of Business	Proportion of Ownership (Ordinary Shares) Interest at December 31, 2025
Zamalight Holdco LLC	Holding Company	10 Riverview Dr, Danbury, CT 06810	100%
Linde Holding GmbH	Holding Company	Dr.-Carl-von-Linde-Strasse 6-14, 82049 Pullach, Germany	100%
Linde UK Holdings No.2 Limited	Holding Company	Forge, 43 Church Street West, Woking, Surrey, GU21 6HT	100%
Medispeed	Financing Company	Forge, 43 Church Street West, Woking, Surrey, GU21 6HT	100%
Linde Canada Holdings Limited	Holding Company	Forge, 43 Church Street West, Woking, Surrey, GU21 6HT	100%
Linde Investments No.1 Limited	Holding Company	Forge, 43 Church Street West, Woking, Surrey, GU21 6HT	100%
Linde Finance UK Limited	Financing Company	Forge, 43 Church Street West, Woking, Surrey, GU21 6HT	100%

Company's investment in subsidiaries - shares (in millions of USD)	
At January 1, 2025	$ 100,065
Additions	9,037
Reductions	(581)
Fair value hedge (Note 12)	2,989
At December 31, 2025	$ 111,510

The investment of $111,510 million is mainly related to Linde Holding GmbH and Zamalight Holdco LLC. Linde Holding GmbH's sole investment is in Linde GmbH and Zamalight Holdco LLC's sole investment is in Linde Inc. Investment additions in the year relate to a capital injection to an existing subsidiary, Linde UK Holdings No. 2 Limited, of $8,962 million. Remaining increases in investments are attributable to the effect of share option scheme awards granted to employees in group subsidiaries. Investment reductions in the year relate to a dividend from Medispeed that was treated as a return of the investment and subsequent reduction to the carrying amount. No new subsidiaries were acquired in 2025 (2024 nil).

5. Income from shares in group undertakings

The company received $9,822 million in income from shares in group undertakings. $9,550 million was received from Linde Holding GmbH ($588 million and $8,962 million in October and December 2025, respectively). $7 million was received from Linde Canada Holdings in October 2025, and $265 million was received from Linde Finance UK Limited in December 2025. (2024: $12,744 million received in total. $6,435 million received from Linde Holding GmbH in June 2024 and $6,309 million received in December 2024 from Zamalight Holdco LLC, primarily as a distribution-in-kind of its investment in Linde Finance UK Limited to Linde plc).

6. Share capital and share premium

Authorized

As set out in the Constitution of the company, the authorized share capital of the company is €1,825,000 divided into 1,750,000,000 Ordinary Shares of €0.001 each ("Ordinary shares"), 25,000 A ordinary shares of €1.00 each ("A Ordinary Shares"), 25,000 deferred shares of €1.00 each ("Deferred Shares") and 25,000,000 preferred shares of €0.001 each ("Preferred Shares").

Allotted, called up and fully paid (in millions of USD)

	December 31, 2025	December 31, 2024
490,766,972 Ordinary shares of €0.001 each at both December 31, 2025 and December 31, 2024	—	—
	$ —	$ —

Share Premium

Share premium represents proceeds received from the issuance of share capital in excess of par value.

7. Other reserves and profit and loss account

Other reserves

Other reserves include treasury shares, the impact of share-based compensation, currency translation adjustment and other undenominated capital as a result of the cancellation of some of the company's shares during the period since incorporation.

Treasury shares

As of December 31, 2025 29,406 thousand ordinary shares were purchased by the company for total consideration of $12,458 million, or an average price of $423.66 per share (€0.001 nominal value) (19,144 thousand ordinary shares purchased for total consideration of $7,852 million, or an average price of $410.15 per share in 2024). The consideration includes stamp duty, commission and all customary fees. The ordinary shares acquired represented less than 1% of the called-up ordinary share capital immediately prior to the acquisition and at the date of the statement of financial position.

These shares were acquired in order to reduce the shares in issue or to meet obligations under Linde plc equity awards.

On February 28, 2022, the company's board of directors approved the repurchase of $10.0 billion of its ordinary shares ("2022 program") which could take place from time to time on the open market (and could include the use of 10b5-1 trading plans), subject to market and business conditions. The 2022 program had a maximum repurchase amount of 15% of outstanding shares, beginning on March 1, 2022, and expired on July 31, 2024. Linde completed the repurchases under this program in the second quarter of 2024.

On October 23, 2023, the company's board of directors approved a new share repurchase program for up to $15.0 billion of its ordinary shares ("2023 program") which could take place from time to time on the open market (and could include the use of 10b5-1 trading plans), subject to market and business conditions. This program will terminate on the earlier of the date as the maximum authority under the 2023 program is reached or the board terminates the 2023 program.

As of December 31, 2025, the company had purchased ordinary shares for consideration of $7.7 billion pursuant to the 2023 program, leaving an additional $7.3 billion remaining shares authorized under the 2023 program.

Share-based compensation

Refer to Note 21 to the consolidated financial statements for further information regarding share-based compensation plans.

Profit and loss account

Retained profit/loss represents accumulated comprehensive profit/loss for the period since incorporation plus the distributable profit created by the Irish High Court approved capital reduction, and the realized profit arising on the capital reduction approved by the Irish High Court, less dividends paid to shareholders.

Dividends in the current year

On February 25, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the first quarter of 2025 (the "Q1 Dividend"). The Q1 Dividend was paid on March 27, 2025 to shareholders of record on March 13, 2025.

On April 28, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the second quarter of 2025 (the "Q2 Dividend"). The Q2 Dividend was paid on June 18, 2025 to shareholders of record on June 4, 2025.

On July 29, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the third quarter of 2025 (the "Q3 Dividend"). The Q3 Dividend was paid on September 18, 2025 to shareholders of record on September 4, 2025.

On October 27, 2025, the directors of Linde plc declared an interim dividend of $1.50 per share for the fourth quarter of 2025 (the "Q4 Dividend"). The Q4 Dividend was paid on December 17, 2025 to shareholders of record on December 3, 2025.

8. Other Debtors

At December 31, 2025 and 2024, other debtors consisted of the following:

(in millions of USD)	December 31, 2025	December 31, 2024
Derivative assets (Note 12)	5	30
Non-trade receivables	—	5
	$ 5	$ 35

9. Accruals

At December 31, 2025 and 2024, accruals consisted of the following:

(in millions of USD)	December 31, 2025	December 31, 2024
Interest payable on financial liabilities (Note 11)	264	175
Derivative liabilities (Note 12)	29	—
Share repurchase accrual	26	21
Accrued liabilities	15	18
UK multinational top-up tax	13	6
	347	220

At December 31, 2025 and 2024, accrued liabilities consisted primarily of interest payable on the company's financial liabilities (refer to Note 11), share repurchases not yet settled at year-end due to the one day settlement period, and accruals primarily for accounting and advisory services.

Accruals within the Statement of Financial Position also includes a United Kingdom ("UK") multinational top-up tax. UK multinational top-up tax is payable under the UK legislation enacted to implement the provisions of the OECD Pillar Two rules. The company is liable to UK multinational top-up tax because it is tax resident in the UK.

The Pillar Two rules are intended to ensure that multinational enterprise groups with global revenue over €750 million pay a minimum tax rate of 15% on the income in the jurisdictions where they operate. The company applies the exception for recognizing and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes as provided in the amendments to FRS 102 section 29 issued in July 2023.

10. Amounts owed by and to group undertakings

On December 17, 2018, the company entered into a US Dollar denominated unsecured loan facility agreement with Praxair International Finance for up to a maximum principal amount of $1.0 billion with a variable interest rate of the one-month Secured Overnight Financing Rate ("SOFR"). The facility is partially or fully repayable on demand, automatically renews every twelve months and has no termination date, unless either party gives written notice 30 days or more prior to renewal.

On March 1, 2019, the company entered into a US Dollar denominated loan facility agreement with BOC Helex for up to a maximum principal amount of $5.0 billion at a fixed interest rate of 5.03%. The facility's expiration is currently set for January 30, 2026.

On May 19, 2020, the company entered into two equal Euro denominated loan facilities with Linde Finance BV for a principal amount of €1.5 billion with fixed interest rates of 0.22805% and 0.59902%. These facilities expire on May 19, 2027 and May 19, 2032, respectively.

On March 29, 2021, the company entered into a Euro denominated loan facility agreement with Linde Holdings Netherlands BV for up to a maximum principal amount of €4.0 billion. Under the loan facility agreement the company has the ability to request draw downs, via utilization requests, at specified fixed interest rates. As of December 31, 2025, the company had three draw downs at fixed interest rates of 0%, 1% and 2.61%. The facility expires on September 30, 2027.

On March 5, 2020, the company entered into a Euro denominated loan facility agreement with Linde GmbH for up to a maximum principal amount of €3.5 billion with a fixed interest rate of (0.546)% and maturity date of March 28, 2025. On March 28, 2025, the company terminated the Euro denominated loan facility with Linde GmbH and established a new loan facility with Linde Finance BV. Under the loan facility agreement, the company has the ability to request drawdowns, via utilization requests, at specified fixed interest rates. As of December 31, 2025, the company had one drawdown of €195 million, with a fixed interest rate of 2.22% and a maturity date of July 31, 2026.

On October 27, 2022, the company entered into a Chinese Yuan denominated facility agreement with Linde GmbH for up to a maximum principal amount of CNY 6.5 billion. The company has the ability to request draw downs, via utilization requests, at specified fixed interest rates (calculated based on the 12-month SHIBOR plus margin). As of December 31, 2025, the company had three draw downs of CNY 900 million, CNY 650 million, and CNY 3.67 billion at fixed interest rates of 1.763%, 1.508%, and 1.540%, respectively. The draw downs mature on March 27, 2026, April 29, 2026, and October 27, 2026, respectively.

On October 27, 2025, the company entered a US dollar denominated loan facility agreement with Linde UK Holdings No. 2 Limited for a principal amount of $4 billion with a fixed interest rate of 3.755% and a maturity date of April 27, 2026. On December

23, 2025, the company entered a USD denominated loan facility agreement with Linde UK Holdings No.2 Limited for a principal amount of $1.539 billion with a fixed interest rate of 3.685% and a maturity date of March 23, 2026.

On May 16, 2025, the company entered into a Euro denominated loan facility agreement with Linde UK Holdings Limited for a principal amount of €159 million with a fixed interest rate of 2.363% and a maturity date of May 18, 2026.

On July 10, 2025, October 24, 2025, and December 16, 2025, the company entered into three Canadian Dollar denominated loan facility agreements with Linde Canada Investments Limited. The principal amounts were $1.431 billion, $37 million, and $103 million at fixed interest rates of 3.06%, 2.647%, and 2.814%, respectively. The first two loan facilities mature on July 10, 2026, with the third maturing on December 15, 2026.

On October 1, 2025, the company entered into a Euro denominated loan facility agreement with Linde GmbH for a principal amount of €500 million at a fixed rate of 2.33% and a maturity date of October 1, 2026.

(a) On February 18, 2025, Linde issued €850 million of 2.625% notes due in 2029, €750 million of 3.20% notes due in 2033 and €650 million of 3.25% notes due in 2037.

(b) On June 5, 2025, Linde issued CHF225 million of 0.615% notes due in 2029 and CHF275 million of 1.0629% notes due in 2033.

(c) On November 20, 2025, Linde issued €600 million of floating-rate notes (three-month EURIBOR plus a fixed spread resetting quarterly - 2.271% as of December 31, 2025) due in 2027, €650 million of 3.125% notes due in 2032, and €500 million of 3.750% notes due in 2038.

The company's financial liability agreements contain standard covenants. The company was in compliance with these covenants as of December 31, 2025 and expects to remain in compliance for the foreseeable future.

12. Financial Instruments

The company has elected to designate certain forward exchange contracts and a portion of its foreign currency borrowings as fair value hedges of the foreign currency exposure of its foreign group undertakings (primarily Euro). For all hedge relationships that meet the criteria for hedge accounting, the gain or loss related to foreign exchange risk on the foreign group undertakings is reflected in profit and loss, where it offsets the foreign exchange gain or loss on the designated foreign currency financial liabilities.

Forward exchange contracts that are designated in a fair value hedging relationship are initially recognized at fair value on the date the contract is entered into and subsequently re-measured at their fair value through Profit and Loss. The forward exchange contracts are measured at fair value, which is determined using valuation techniques that utilize observable inputs (e.g., forward exchange rates) and can be validated through external sources, including third-party pricing services, brokers, and market transactions.

As of December 31, 2025, the company recorded $5 million of derivative assets and $29 million of derivative liabilities within Other debtors and Accruals in the Statement of Financial Position, respectively (2024: $30 million and nil, respectively).

The following are the amounts reflected in the financial position (and Profit and Loss account) for the foreign exchange movements for items in fair value hedges.

in millions of USD	December 31, 2025	December 31, 2024
Foreign exchange loss/(gain) on investments in subsidiaries	(2,989)	1,198
Foreign exchange loss/(gain) on financial liabilities in fair value hedges	2,952	(1,201)
	$ (37)	$ (3)

In addition, as of December 31, 2023, Linde was using interest rate swaps with a notional value of €1 billion to hedge the variability of future cash flows of forecasted transactions due to interest rate risk and has designated this as a cash flow hedge. The interest rate swaps were terminated with the February 2024 debt issuance. The cumulative settlement gain of $10 million ($8 million net of deferred taxes) was recorded within other comprehensive income and will be amortized to profit and loss over its remaining life.

13. Related party transactions

The company is exempt from disclosing related party transactions with entities that are wholly owned within the company it heads. The disclosure of directors' remuneration is in Note 27 to the consolidated financial statements.

14. Contingent liabilities and other financial commitments

See Note 28 to the consolidated financial statements. There were no additional commitments or contingencies required to be disclosed for the company.

15. Auditors' remuneration

For the year ended December 31, 2025, $380,700 (2024: $360,500) was payable for the statutory audit of the company financial statements to its auditors, PricewaterhouseCoopers, Ireland.

16. Subsequent events

Refer to Note 31 to the consolidated financial statements of the company for subsequent events impacting the consolidated company.

17. Date of approval of the financial statements

The financial statements of Linde plc for the year ended December 31, 2025 were authorized for issue by the Board of Directors on April 27, 2026.
